PREFACE

1976 EDITION

It is now 22 years since the first edition of the directory was published. In the period between the first and the fifteenth editions (the present) the volume has nearly doubled in size.

Since 1954 it has come to be accepted as the definitive directory of the food processing industry in the U.K. It is clear from the demand for copies that it has won an important place in the industry.

As has been the practice with previous editions the new one represents a complete revision of its predecessor.

A detailed study of the food processing section of the directory during its fifteen editions would provide the material for a history of the development of the industry during the last two decades. Such a study would show that in the past two or three years there has been more stability in the pattern than at any time since the early fifties.

Since its inception the directory has contained a section summarising the food standards and regulations of all important trading countries of the world. There are 97 in this volume in addition to the sub-section concerning the EEC. Once again the revision has been the responsibility of Mrs C. S. Burke in whose expert hands the section continues to increase in importance and usefulness. During the past year there have been many changes in the UK regulations. The increasing tempo of growth and change here is in no small way an outcome of our partnership in the European Economic Community. Mrs. Burke has drawn attention to the more important of these changes in her introduction to the section.

In this industry, what you don't know CAN hurt you.

The food processing industry doesn't stand still. There's so much to know, so much to keep up with in frozen, canned and dehydrated foods; prepared meals; sugar, cocoa and flour confectionery; dairying; soft drinks; and many other aspects of food technology.

In today's complex constantly-changing marketing situation, you must keep up-to-date. And there's one sure way: Read Food Processing Industry, the journal that exists to inform the qualified executive* about every major technical development in every relevant field.

The value of the information it provides is literally incalculable to you and your career. And yet, in all probability, it won't cost you a penny to have a regular copy. Send now for a reader registration application form on the coupon below.

*Food Processing Industry is circulated free on written application to qualified executives in the food processing industry, government departments and research institutions within the food industry and processors of edible raw materials for the food industry in the United Kingdom. Overseas readers and those outside the terms of control: £10 per annum.

This is a colour advertisement.

We make caramel.
And we make it so it gives a rich colour and an appetising appearance.
Also we powder it so it's easy to handle.
We think these are the things that count.
Tell us what you think.

Food for thought, for everyone in catering.

Caterer & Hotelkeeper – for 97 years the leading journal of your industry – is a crucially important information source today. Specially-commissioned surveys, in-depth analyses, weekly advice from experts . . . in these and many other ways, we make sure that you are as well briefed on the business side of catering as the big groups themselves.

We don't tell you how to run your business or do your job. But every question confronting you is clarified; potential answers are expertly presented, possible courses of action precision-charted. To face your problems with Caterer & Hotelkeeper is to come a lot closer to solving them . . . every week of the year.

Make sure you never miss an issue. Just fill in and post – or hand to your newsagent – the order coupon below.

Please send me **Caterer & Hotelkeeper** regularly each week until countermanded at £14.00 per annum.

The story of St Ivel Milk

–straight from the Cow's mouth!

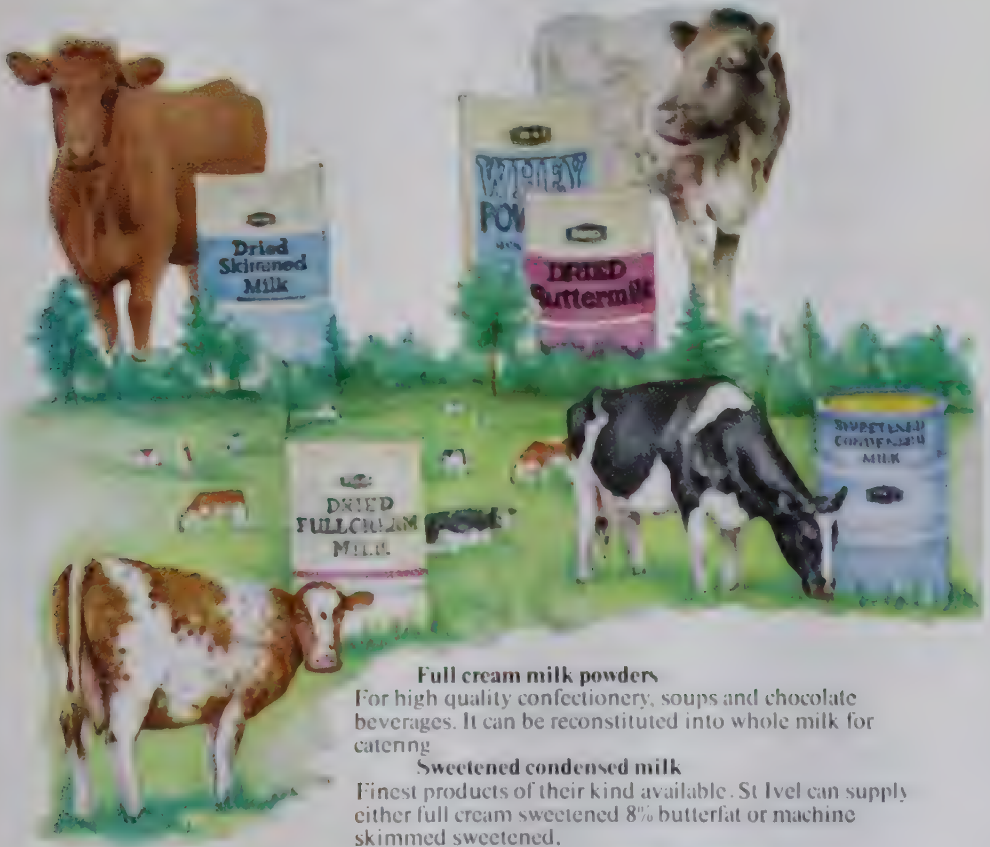
St Ivel produce milk in so many different ways–the poor cow just doesn't know what she started! We've got at least four different milk powders, to say nothing of liquid sweetened condensed varieties.

And we're for ever keeping on top of research and new product development. Our quality control is exceptional too–every batch is produced under identical hygienic conditions, and measures up to the same set of quality criteria.

Skimmed milk powders
Best sellers of the whole range. Used for confectionery, bread, ice cream, and in schools and hospitals.

Whey powders
Spray dried for ice cream or roller dried for animal feeds.

Specialist milk powders
Guaranteed quality specialist powders can cut secondary processing costs.



Full cream milk powders
For high quality confectionery, soups and chocolate beverages. It can be reconstituted into whole milk for catering

Sweetened condensed milk
Finest products of their kind available. St Ivel can supply either full cream sweetened 8% butterfat or machine skimmed sweetened.

St Ivel

All the best produce from St Ivel.

Millac

Millac

Millac

The Spray Dried Separated Milk enriched with Vegetable Fats and Vitamins A, D & C.

Millac is a nutritious, economical and handy replacement for fresh milk. Because of its convenience Millac is widely used by Caterers – all you do is stir the powder into water.

Try Millac yourself – in custards, batters, soups, sauces, desserts and, of course, in tea and coffee.

Millac is so easy to use. Send for details today.

FOOD PROCESSING INDUSTRY

FPI, the leading publication in its field, meets the total information needs of food manufacturing companies, from the purchasing of raw materials, through the various manufacturing processes, to packaging and marketing of end-products, quick freezing, dehydration, flour confectionery, sugar confectionery, cocoa, chocolate and dairy products, soft drinks and milling. Profit improvement through increased efficiency, better marketing and cost control is the underlying theme.

FPI is circulated free each month on written application to qualified executives in the food processing industry, government departments and research institutions within the food industry and processors of edible raw materials for the food industry in the United Kingdom. It is available on subscription to overseas readers and those outside the terms of control: £10 per annum.

Destination Unknown

Shipping frozen food into Europe? How much of it is going to unknown destinations, to cold stores you don't know? Don't do it the hard way. Frigoscandia offer you a network of 20 strategically sited cold stores across Europe. Just *one* contact for you instead of 20 and you have the guarantee of an integrated service to the highest possible standard, with specially trained personnel.

50 million cu. ft. of cold storage space at sub-zero temperatures and fleets of temperature controlled trucks make Frigoscandia the leading service organisation to Europe's frozen food industry. So wherever and whenever you link into the food chain, it makes sense to make Frigoscandia the destination for your products.

Contact us now and let us tell you more about the world of Frigoscandia. About the comprehensive and flexible range of industrial freezing equipment using advanced refrigeration technology that has established Frigoscandia as the world's leading supplier of in-line freezing systems. About more of Frigoscandia's specialised services – freezing, thawing, inspection, sorting, packing, break-up and distribution.

FOOD PROCESSING INDUSTRY

FPI, the leading publication in its field, meets the total information needs of food manufacturing companies, from the purchasing of raw materials, through the various manufacturing processes, to packaging and marketing of end-products, quick freezing, dehydration, flour confectionery, sugar confectionery, cocoa, chocolate and dairy products, soft drinks and milling. Profit improvement through increased efficiency, better marketing and cost control is the underlying theme.

FPI is circulated free each month on written application to qualified executives in the food processing industry, government departments and research institutions within the food industry and processors of edible raw materials for the food industry in the United Kingdom. It is available on subscription to overseas readers and those outside the terms of control: £10 per annum.

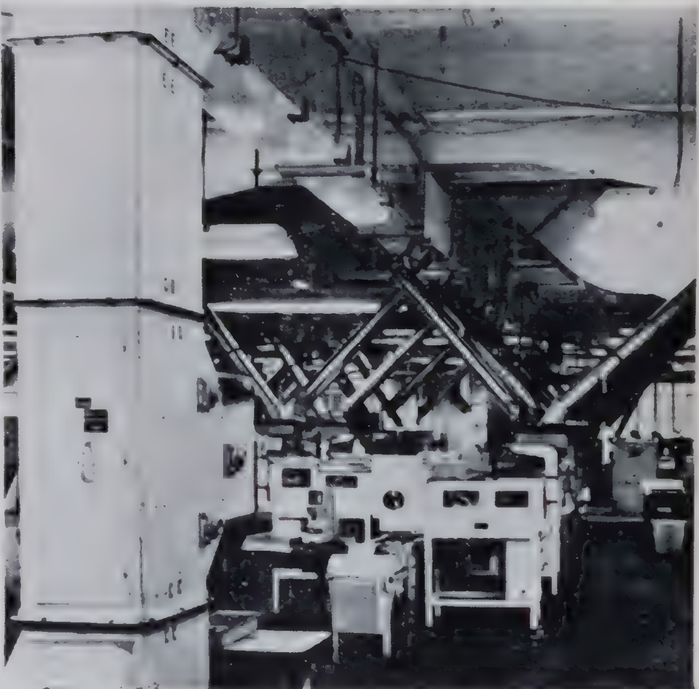
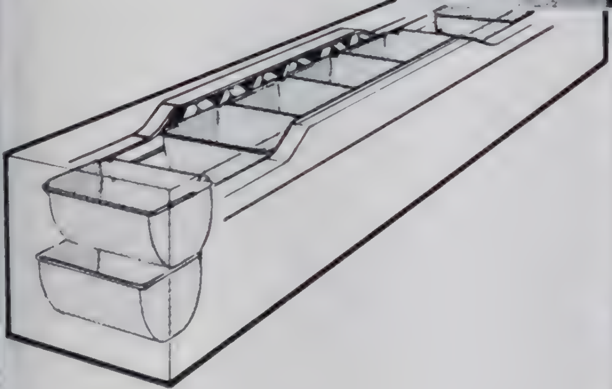
ECON-O-LIFT

The Econ-O-Lift is a unique bucket elevator/conveyor system which will move your product smoothly without spillage, degradation or contamination, to distribute it to as many processing stations as required.

The buckets are not dredged as is the case with conventional chain or belt elevators, they are filled whilst in the normal horizontal position by a special chain collapse section which lips the buckets together at the feed sections.

There is no limit to the number of tipping points, nor to the number of levels at which these can be positioned. The discharge being operated manually, pneumatically or electrically as required.





Further information can be obtained on the Econ-O-Lift by completing the [illegible]

Please send me further information on the Econ-O-Lift.

ask

For Blanchers
Hygienic direct steam injection or hot-water immersion for continuous processes. Economical because of their low steam consumption, low maintenance and compact design.

For Thermascrews
Efficient continuous or batch heat transfer for pre-heating, braising, defrosting and cooling processes. Easy to clean and space saving.

For Disintegrators
Combined impact and attrition action for pulping and wet or dry milling. Secondary discharge provides built-in safety system for rejection of tramp and/or fibrous material.

For Extructors
High torque results in high throughputs of frozen meat, fruit, fish or vegetable blocks. Interchangeable orifice plates determine final particle size.

For Torque Flow Pumps
The recessed impeller is located completely out of the flow pattern and fragile liquid-borne solids are handled with minimum of product damage.

For Advice
In the company's extensive Research and Development Centre at Leven, your own materials can be processed to demonstrate the suitability of particular equipment *before* you specify. Balfour will also rent equipment to you on a full-refund-if-purchased basis.

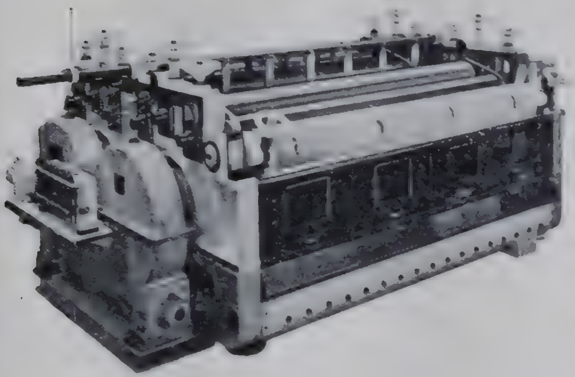
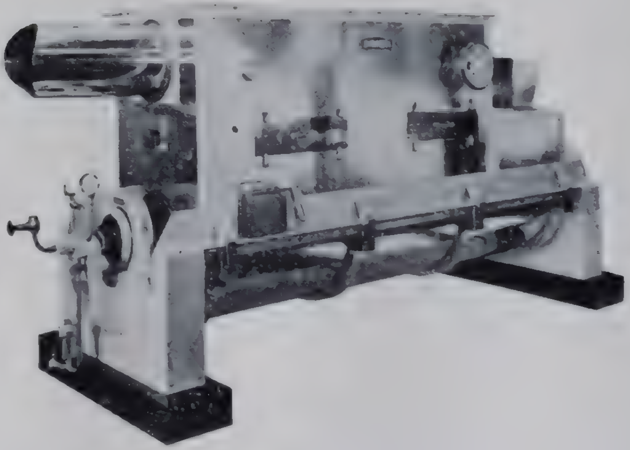
DRYING? COOLING?

enquire first from
RICHARD SIMON
Nottingham



36″ × 100″ TWIN DRUM DRYER for the production of cereal foods and instant foods. The enclosure of the side conveyors was specially designed to suit the customer's hygiene requirements. The output and the quality of the finished product have been optimised by the Richard Simon automatically controlled feeding system which employs the latest solid state transistorised techniques. As the result of successful operation with the first machine we have received several repeat orders.

Illustration shows a versatile processing machine which in its various forms will heat, dry or cool a wide variety of cereals and their derivatives. The heating and cooling is by indirect means, thus ensuring the highest standard of hygiene.
Send for leaflets 540 and 572.



We have over 70 years' experience in solving drying problems. Many of the machines we build are designed specifically for customers' unique products.

The range includes 20 sizes of drum dryers and 20 sizes of tubular dryers. Vibrating conveyor dryers, pneumatic pre-dryers, rotary dryers, static tray dryers, etc.

Investigations to ascertain optimum drying techniques for customers' materials carried out by experienced staff in our well-appointed test house.

In this industry, what you don't know CAN hurt you.

The food processing industry doesn't stand still. There's so much to know, so much to keep up with in frozen, canned and dehydrated foods, prepared meals; sugar, cocoa and flour confectionery; dairying; soft drinks; and many other aspects of food technology.

In today's complex constantly-changing marketing situation, you must keep up-to-date. And there's one sure way: Read Food Processing Industry, the journal that exists to inform the qualified executive* about every major technical development in every relevant field

The value of the information it provides is literally incalculable to you and your career. And yet, in all probability, it won't cost you a penny to have a regular copy. Send now for a reader registration application form on the coupon below.

*Food Processing Industry is circulated free on written application to qualified executives in the food processing industry, government departments and research institutions within the food industry and processors of edible raw materials for the food industry in the United Kingdom. Overseas readers and those outside the terms of control: £10 per annum.

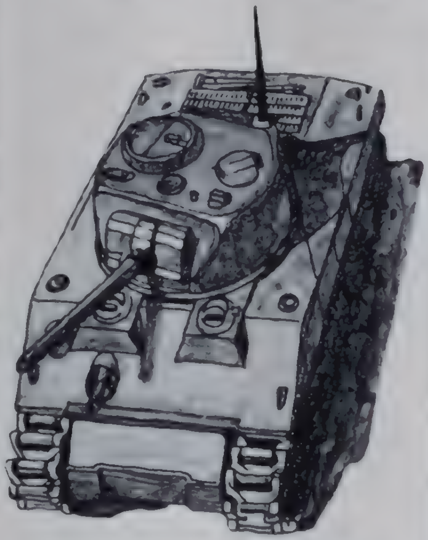
PORTLAND

we build tanks



We must be honest, we don't actually build fighting tanks down here in Elland just off the M62!

But we do fabricate storage tanks and pressure vessels in stainless steel and special steels for most of the big names in petrochemical, food and process engineering. Chances are there's a Portland fabrication in your plant, or your customer's.

We're just as good at mild steel fabrications, too.

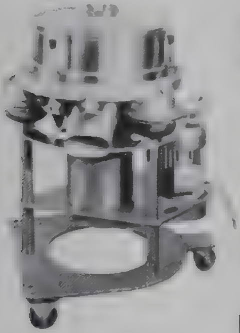
KEK

range of sieving, straining and grinding equipment

Kek have been specialists in all types of grinding, sifting and sieving machinery since 1912. That's how they can combine advanced technology with exceptionally competitive prices, even by European standards.



New Vortair air-mounted high speed sieve

The air suspension system allows the mesh to oscillate vertically and horizontally, giving exceptionally high throughput. Available in single and two speed models, adjustable for amplitude of vibration.

New Major sifter

Output up to 30 tons/hr. Sieves can be completely replaced in minutes. Quiet, smooth operation. Sealed design prevents contamination.

New 3H grinding mill

Few moving parts and accessible design make the 3H reliable and simple to operate. Outputs from 1,200 to 10,000 lb/hr. Can be proofed against explosion hazards.

For full details of all Kek products, contact:

There's always some packaging problem.

Some are harder to crack than others, especially when nature's packaging seems to be doing a good job. But as Europe's leading packaging organisation we at Metal Box are ideally equipped to find the solutions more apt for modern living.

Our research and development programmes are taking care of how to make the most of existing resources as well as exploring new methods, new materials. The solution is in our hands—and that's what keeps us in the lead.

So come and talk to us about your future packaging—it's what we're working on right now.

metal breakdown?

Metlokate gets to the trouble before it gets back to you.

Metal breakdown in process machinery can cause fragments of unwanted tramp metal to accidently contaminate your product.
Metlokate is the latest metal detector from Goring Kerr and it will swiftly locate that unwanted metal precisely, safely and reliably. It will protect your product, your machinery and your reputation. To avoid **your** mental breakdown over tramp metal contamination send now for our new first aid kit - it will bring you all the latest information and there is no prescription charge.

How we give your pest problems the *new:*

1 **Problem Identification** – our surveyor assesses your pest problem, considering all the relevant factors, and prepares an individually detailed report on the infestation, its causes and how best to treat it.

2 **Immediate Action** – the surveyor then acts upon his own recommendations. Protim Pest Control have only one level of service – the best, therefore we use responsible experts for each stage in combating your problem.

3 **Pest Prevention Programme** – a sequence of inspections and precautionary treatments designed to highlight, to your staff, any potential danger, encourage vigilance and check any further inroads. And of course any reinfestation through altered circumstances brings immediate action.

Protim Pest Control is a national organisation committed to high standards of quality service and provides a new concept in pest control.
Our *new* **1, 2, 3,** can help you. Call in

NISIN
PRESERVES
YOUR
REPUTATION

The reputation of any food manufacturer depends to a large extent on the reliable preservation of his products. That's why all over the world manufacturers of processed cheese and cheese spreads are using Nisin.

Nisin, which is an approved additive in the U.K. and many other countries, is the most effective method of controlling butyric clostridia—the organisms which are so often the cause of spoilage in processed cheese. Nisin inhibits a whole range of bacteria, even the heat resistant ones which survive sterilisation.

Nisaplin is a unique preparation of Nisin specially developed in our laboratories. Its convenient form allows it to be simply added to the mix at the same time as the melting salts.

Nisaplin is used as a preservative in many other foods, such as flavoured milks and canned milk puddings, soups and vegetables.

TRADE AND BRAND NAMES

This section lists alphabetically many of the distinctive descriptions used for products in the food industry, and indicates the name of the manufacturer and the type of product. Some are registered trade names for specific products; some are the word or words forming part of a registered trade mark; and some may not be registered at all. Inclusion in this list does not imply that any manufacturer possesses exclusive rights in the word set opposite his name.

Trade names in this section enable the user to identify the manufacturer. If the names are identical no reference appears since the name of the company can be found under the appropriate section.

Food for thought, for everyone in catering.

Caterer & Hotelkeeper – for 97 years the leading journal of your industry – is a crucially important information source today. Specially-commissioned surveys, in-depth analyses, weekly advice from experts . . . in these and many other ways, we make sure that you are as well briefed on the business side of catering as the big groups themselves.

We don't tell you how to run your business or do your job. But every question confronting you is clarified; potential answers are expertly presented, possible courses of action precision-charted. To face your problems with Caterer & Hotelkeeper is to come a lot closer to solving them . . . every week of the year.

Make sure you never miss an issue. Just fill in and post – or hand to your newsagent – the order coupon below.

Please send me **Caterer & Hotelkeeper** regularly each week until countermanded at £14.00 per annum.

SUMMARY OF

FOOD STANDARDS AND REGULATIONS

Revised by MRS. C. S. BURKE, B.SC., A.I.Inf.SCI., A.I.F.S.T.

(*British Food Manufacturing Industries Research Association*)

GENERAL NOTES

THE SUMMARIES OF regulations given on the following pages have been amended to cover revisions and new regulations promulgated during the past year. They are intended as a guide to existing legislation in the various countries, but cannot for obvious reasons cover every detailed regulation, although every effort has been made to be as precise as possible on the more important foodstuffs. Generally, the information given applies to the position at January, 1976, but it must be remembered that changes in legislation may have occurred after that date and will occur during the currency of this edition of the Directory.

The information given covers mainly standards and limits of a quantitative kind, and regulations referring to permissible ingredients. It can be assumed to be a general requirement in all countries that materials used must be of satisfactory hygienic quality, degree of maturity, etc., and that the finished goods must be free from spoilage, deterioration, and dirt. These aspects, therefore, have not been covered, except when they are quantitative standards, *e.g.*, for mould, yeast, and bacterial count.

Some notes on labelling requirements, where these appear to be somewhat special for the particular food, have been included. Name and address of manufacturer or importer, net weight of contents, and proper designation, are usually basic requirements on labels. Before export of a new product or pack, it is often desirable to submit specimens of proposed labels for official approval. The regulations of some countries, *e.g.*, Australia, New Zealand, and South Africa, make very detailed stipulations as to designation, form and size of type, wording of declarations, etc., for each kind of food. Because of the importance of the Canadian and U.S. and the increasing importance of the French and German markets, details of the labelling requirements for these countries are given.

Many of the smaller countries have no detailed food regulations with respect to standards of composition, additives, labelling, etc., but they may have a general food act which requires foodstuffs to be of good quality etc., as mentioned above. Such countries either accept foodstuffs complying with the regulations of the country in which they were produced or of a particular country, *e.g.*, Uganda accepts foodstuffs complying with U.K. regulations, the Lebanon accepts foodstuffs complying with the regulations of the country of origin. This information is given in the following form in this Summary: UGANDA, as for U.K.; LEBANON, as for country of origin.

The most important changes in U.K. legislation since the last edition of this Directory are the Emulsifiers and Stabilisers in Food Regulations, 1975, the Fluorine in Food (Amendment) Regulations, 1975, the Miscellaneous Additives in Food (Amendment) Regulations, 1975, the Preservatives in Food Regulations, 1975, the Colouring Matter in Food (Amendment) Regulations, 1975, the Weights and Measures (Marking of Goods and Abbreviations of Units) Regulations, 1975, the Weights and Measures Act, 1963 (Sugar; Cereal Breakfast Foods and Oat Products; Flour and Flour Products; Dried Vegetables Orders), 1975, and the Zoonoses Order, 1975. Regulations under review include those relating to arsenic in food, artificial sweeteners (aspartame), colouring matter, infant foods (and additives in infants foods), flavourings, labelling of foods, meat products, soft drinks, solvents in foods, sorbic acid in food, starches and modified starches, water in food. The Food Standards Committee has issued reports on novel proteins, on soft drinks (part I fruit juices and nectars) and on yogurt. The Food Additives and Contaminants Committee has issued a report on antioxidants in foods. The Steering Group on Food Freshness has issued an interim report on the date marking of foods. Proposals to introduce regulations on cocoa and chocolate, on honey, on sugar products and to amend the regulations on labelling of food, skim-milk with non-milk fat and soft drinks have been issued by the Ministry of Agriculture, Fisheries and Food during 1974 and 1975. The Department of Prices and Consumer Protection has issued proposals on prescribed quantities for prepacked biscuits and shortbread, and a Code of Practice for rounding of indications of quantity.

Industrial Evaporated Milk. From wholly or partly skim milk. Labelling: degree of concn.; whether full cream, partly or wholly skim; declar. that for industrial use.

Dried Milks. Max. 50000 bacteria per gm. (if whole milk), 150000 per gm. (if partly or wholly skim for retail), 500000 per gm. (if partly or wholly skim for industrial use), when tested as for sweetened condensed milk. No pathogens. Imports: authorization reqd. for each consignment; registration no. of product (see below) and certified analysis of lot reqd., showing moisture, fat content, acidity (as lactic), solubility index, sediment, no. of bacteria; also class of product (*i.e.*, whole, skim, or partly skim, retail or industrial), name and address of manufacturer, country of manufacture. Packing: retail packs to be in plastic or other impermeable liners to tins or cartons; other retail packs, also industrial packs, as approved by Ministry of Health if satisfied that product is adequately protected.

Processed Cheese. Optional: alkalis approved by Ministry of Health; turmeric, annatto, and other authorized colours (but not in skim milk cheese); salt, refined sugar, harmless micro-organisms, and other substances if approved in advance by Ministry of Health.

SALT

Iodized Salt. Addition of iodine, max. 0.10 g./kg., is permitted, in the form of sod. or potass. iodide or iodate (declar.). If iodine is added, the following stabilizers also allowed (declar.): basic magn. carbonate, 1.0%; the same with sod. thiosulphate, 0.1%; basic magn. or calc. carbonate, 0.75%, with calc. oxide, 0.1% and sod. thiosulphate, 0.1%; tricalc. phosphate, 1.0%; tricalc. phosphate, 0.9% with 0.05% sod. bicarb. and 0.9% dextrose. (Others may be allowed in special cases.)

REGISTRATION

All manufd. foods and drinks sold in closed containers or packages must be authorized and registered with Ministry of Health. Triplicate applications to be sent stating (a) name of product; (b) name of manufacturer; (c) name and address of applicant; (d) location of place of manuf. or prepn.; (e) name and business address of importer or manufacturer's representative (for imports); (f) name of responsible technical expert (where required by the Ministry); (g) recipe of product specifying ingreds. qualitatively (if

alkaloids or glucosides present, declar. of proportion reqd.); (h) name and proportion of any preserv. present; (i) use for which product is intended. Following documents must accompany application: (a) 3 photos (16 × 24 cm.) of containers as proposed; (b) chem. analysis of product (for alcoholic bevs.); (c) for imports, a certif. that sale of the product is permitted in country of origin, issued by an official authority or, failing this, by the Chamber of Commerce, and stamped by the Mexican Consul; (d) 3 copies each of labels, prospectuses, notices, pamphlets, and other printed and advertising matter proposed to be used; (e) when requested by Ministry, samples for analysis or other investigation deemed necessary. Products and labels, etc., must not be modified from those registered, except with prior approval of the Ministry.

LABELLING

Labels on containers of foods which can undergo spontaneous alteration must give date of prepn. (which may be a code disclosed to Ministry of Health) and date by which period of preservation will have elapsed. Presence of preserv. or stabilizer must be declar., with statement of proportion present. The only reference to official approval must be "Acceptado—D.S.P.", and the registration no.

ADDITIVE SUBSTANCES

The position has been regularized by the listing of additive substances of various classes which it is permissible to add to foods. Detailed regs. apply to the registration and labelling of these by the Ministry of Health and Welfare before they can be imported. Following are the substances at present permitted Others may be added in any of the classes when their harmlessness has been demonstrated to the satisfaction of the Ministry of Health and Welfare, and they have been accorded registration. Additives may only be used in foods and beverages when strictly necessary for proper manuf., presentation and/or preservation.

Colouring Matters. Mineral colour prohib. For permitted colours see Tables, pp. 806-812.

Flavourings. The usual common flavouring essences and materials. with a specified list of prohib, harmful substances. (The prohib. includes coumarin). Vehicles: ethy. alc., propylene glycol, or "other suitable diluent."

Preservatives. Benzoic acid, sod. benzoate ; propionic acid and its sod. and potass. salts; sorbic acid and its sod. salt; oxygenated water; sod. diacetate; sulphur dioxide, chlortetracycline, oxytetracycline. Use of particular preservs. may be restricted to particular types of product.

Oxidants. Pot. bromate, chlorine, nitrosyl chloride, chlorine dioxide. sod. and potass. nitrites and nitrates (max. 200 p.p.m. nitrite in finished product), oxides of nitrogen, benzoyl peroxide, calc. peroxide, hydrogen peroxide, ammon. persulphate, potass. iodate.

Antioxidants. (for use in edible fats and oils and essential oils). See under "Fats and Oils".

Emulsifiers and Stabilizers. Glyceryl mono- and di-esters of fatty acids; carboxymethyl-cellulose and its sod. salt; alginates, casein, pectin, gelatine, glycerine; sugars, propylene glycol; gums arabic, karaya, tragacanth, agar, carrageen; harmless seed mucilages; sod. or potass. polyphosphates; enzyme preparations; propylene glycol; terpenes; alc. extracts of harmless resins, gum resins and oleoresins; brominated edible oils, sulpho-acetates of mono- and diglycerides; sod. salt of phosphoric ester of mono- and diglycerides.

Foaming Agents. Gelatine, veg. mucilages, albumens, gums (except gum gutta), liquorice and derivs., carboxymethylcellulose.

Antifoaming Agents. Methyl-polysiloxane.

Antispattering Agents. Polyglyceride monostearate; sod. salt of sulpho-acetate of monostearin.

Sweeteners. Sugars and natural sweetening materials. In diabetic foods and drinks only: calc. or sod. cyclamate; saccharin, soluble saccharin.

Acidifiers. Orthophosphoric, acetic, citric, tartaric, lactic, and malic acids.

Humectants. Glycerine, propylene glycol, sorbitol, invert sugar.

Anti-humectants. Calcined magnesia, tricalc. phosphate.

PANAMA

COLOURING MATTERS

See Tables, pp. 806–812.
Colours permitted in some alc. beverages, confectionery, dessert powders, cheese rinds.

OTHER ADDITIVES

Lists of additives, incl. antioxidants, preservatives, in force.

BEVERAGES, NON-ALCOHOLIC

Citrus flavoured beverages. Optional: Brominated veg. oil, max. 15 p.p.m. or sucrose acetate isobutyrate, max. 50 p.p.m., in citrus flavour.

Fruit Juices. Optional: Sugar, invert sugar or dextrose (declar. by name and per cent. by wt.), preserv. (declar.); SO_2, max. 100 p.p.m., benzoic acid, sorbic acid, max. 1000 p.p.m. Limits of compn.: *Apple:* spec. grav. (20°C.) 1.041—1.065, ash 0.24—0.60 g./100 ml. (min. 50% K_2CO_3). *Grape:* spec. grav. 1.0400—1.1240, ash 0.20—0.55 g./100 ml., citric acid (anhydr.) P_2O_5, 0.015—0.070 g./100 ml. *Grapefruit:* sol. solids min. 9.5 g./100 ml., citric acid (anhydr.) 0.75—2.2 g./100 ml. *Lemon:* sol. solids min. 8.0 g./100 ml., citric acid (anhydr.), min. 5.0 g./100 ml. stannous chloride (decl.). *Lime juice:* sol. solids, min.8 g./100 ml., citric acid, min. 5.5 g./100 ml., spec. grav. 1.030—1.040, optical rotation (20°C., 200 ml.), + 0.5° to —1.5° V. *Pineapple:* Fruit juice and "optional" additives. *Orange:* sol. solids, min. 10 g./100 ml., citric acid, 0.5-1.9 g./100 ml.

CANADA (cont.)

Concentrated Fruit Juices. Concd. at least to half orig. vol. Optional: permitted colour, vitamin C, stannous chloride; otherwise as for Fruit Juices.

COCOA, CHOCOLATE, AND SUGAR CONFECTIONERY

Chocolate Liquor, Chocolate, Plain Chocolate, Bitter Chocolate. Cocoa butter, min. 50%; on dry fat-free matter: crude fibre, max. 7%, total ash, max. 8% (proportionately higher if alkalized), ash insol. in HCl, max. 0.4%. Alkalization: with alkali hydroxides, carbonates, max. 3% as K_2CO_3.

Cocoa Powder. Breakfast cocoa pdr.: fat, min. 22%. Cocoa pdr. with less than 10% fat to be sold as "low fat". Emulsifier, max. 0.5%.

Sweet Chocolate, Sweet Chocolate Coating. Fat-free dry matter as for chocolate liquor; 25% of the sugar may be dextrose. Emulsifier max. 0.5%. Coumarin prohibd.

Milk Chocolate. Whole milk solids, min. 12%; 25% of the sugar may be dextrose. Emulsifier, max. 0.5%

Cocoa Butter. Refract. ind., N_D^{40} 1.453—1.458; iodine value, 32—41; saponif. value 188—202; acid value, max. 5.0.

Sugar Confectionery. Mineral oil, max. 0.3% allowed if in good manufacturing practice. Coumarin prohbd.

Chewing Gum. May contain paraffin wax base, tannic acid.

FOODS FOR SPECIAL DIETARY USE

Carbohydr.-reduced food, max. 50% of carbohydr. in normal foods in which min. 25% of cals from their carbohydr. Sugar-free foods, max. 0·25% avail. carbohydr. and max. 1 cal./100 g. or ml. (except chewing gum) and max. 50% of cals. of normal food. Low-calorie food, max. 15 cals./aver. serving and max. 30 cals. in reasonable daily intake of that food. Low-sod. food, max. 50% of sod. normally present and max. 40 mg sod./100 g. food (80 in flesh foods), no added sod. salts. Declr. cals., carbohydr., protein and fat content and mannitol and sorbitol when used, in g/unit of ready-to-serve food and g./100 g. or ml when sold. On low-sod. food also declr. sod. and potass. content. Declr. saccharin.

FATS AND OILS

Antioxidants. Veg. and animal fats and oils may contain Class IV preservatives (see p. 643) (declar. by name).

Lard. Subst. other than fatty acids and fat, max. 1%.

Shortening. Optional: permitted antioxidants (declar.); antifoaming agent; stearyl monoglyceridyl citrate; monoglycerides, max. 10% or a mixture of mono- and diglycerides, total max. 20%, lactylated monoglycerides or combination with diglycerides, max. 8%.

Monoglycerides, Mono- and Diglycerides. Glyceryl derivs. of fat-forming fatty acids. May contain glycine, max. 0.02%; phosphoric acid; glycerol, max. 2.5%; permitted antioxidants (declar.).

Shredded Suet. Optional: cereal, max. 3%; salt, max. 1%.

FISH PRODUCTS

Canned Fish, Canned Shellfish. Labelling (imports): kind and quality of contents; min. wt. avdp. of contents (canned fish) or of dry meat in can (canned shellfish); place of origin; name and address of packer or importer. Declar. of citric acid in canned shellfish and mackerel.

Fish Paste or Spread, etc. Filler and binder, max. 4%, calcd. as dextrose (official method). (See under meat paste for definition of filler.) Water: not more than in the fresh fish, with max. 70% if filler present. Labelling: if any fish named, a complete list of all fish used must be given, in descending order of proportion.

Fish protein. Protein, min. 75%; bacteria, max. 10,000/g, no *E. coli*; phosphoric acid (optional).

Binder for Fish Paste, etc. Any combn. of filler (as for meat products), salt, sugar, glucose, dextrose, spices, and other seasonings. Labelling: directions for use in accordance with limits for cereal content in product in which used.

Colouring Matter. Only in smoked fish, lobster paste, and fish roe (caviar) (declar. for lobster and fish roe).

Preservatives. Certain class I preserv. permitted in fish products. Sorbic acid and salts (declar.) in smoked or salted dried fish, and benzoic acid and salts (declar.) in marinated and similar products.

Antibiotics. Chlortetracycline, oxytetracycline, total max. 5 p.p.m. (declar. of one or both by name on main panel).

FLOUR AND FLOUR PRODUCTS

Flour (White). Moisture, max. 15%; ash, max. 1.20% (on dry matter); bolted through cloth with openings, max. 149 microns. Optional: malted wheat flour, malted barley flour (max. 0.50%); harmless prepn. of enzymes of *A. flavus oryzae*; chlorine, ClO_2 (declar. "Bleached", and "Maturing agents added"; benzoyl peroxide (declar. "Bleached"), max. 100 p.p.m., with max. 6 times its wt. of one or a mixture of: calcium carbonate, calcium sulphate, dicalcium phosphate, mag. carb., potass. alumin. sulphate, sod. alumin. sulphate, starch, tricalcium phosphate; potass. bromate, max. 50 p.p.m., ammon. persulphate, max. 250 p.p.m.. ammon. chloride, max. 2000 p.p.m. acetone peroxide, azodicarbonamide, max. 45 p.p.m. ascorbic acid, 200 p.p.m., l-cysteine (hydrochlorde), 90 p.p.m. (declar. for these: "Maturing agents added").

Special Flours. Standards also for Enriched Flour, Vitamin B White Flour, Enriched Vitamin B White Flour, Whole Wheat Flour, Graham Flour, Gluten Flour.

Alimentary Pastes. Noodles, etc. sold as containing egg must contain at least 4% egg yolk solids (on dry basis.)

Bakery Products. (cakes, biscuits, pies, etc.). Optional: permitted colour (declar.); sorbic acid and Ca, K, Na salts, max. 1000 p.p.m.; propionic acid and Ca, Na salts, max. 2000 p.p.m.; sod. diacetate, max. 3000 p.p.m. Special certificate required for Christmas puddings made with suet.

FLOUR CONFECTIONERY MATERIALS

Lemon Curd, Fruit Curd. Optional: permitted colour; artif. flav.; preserv., SO_2, max. 500 p.p.m., sorbic or benzoic acid, max. 1000 p.p.m. (declar. by name).

Canned Fruits. Optional: sugar, invert sugar, dextrose, glucose, citric acid (canned pears only), firming agent (canned apples only). Added colour prohibited.

CANADA (cont.)

FRUIT AND VEGETABLE PRODUCTS

Canned Vegetables. Optional: sugar, invert sugar, dextrose, salt, firming agent (calc. chloride, citrate, sulphate, or mono-calc. phosphate, max. 0.026% as Ca.—declar.). Added colour prohibd.

Canned Mushrooms. Optional: ascorbic acid and salt.

Canned Peas. Optional: calc. hydroxide, max. 0.01% $Ca(OH)_2$, magnes. hydroxide, max. 0.05% $Mg(OH)_2$ (declar. "Alkalis Added"). Added colour prohibd.

Canned Tomatoes. Drained tomato solids, min. 50% (official method). Optional: as above, also citric acid. Mould count as tomato juice.

Tomato Juice. No dilution. Optional: salt, sugar, invert sugar, dextrose (declar. by name). Mould count (Howard test), max. 25% positive.

Tomato Pulp, Puree. Sp. gr. (20°/20°), min. 1.050. Optional: salt (declar.). Class II Preserv. Mould count, max. 50% positive.

Tomato Paste. Tomato solids, min. 20%. Optional: salt (declar.). Class II preserv. Mould count as for Pulp.

Concentrated Tomato Paste. Tomato solids, min. 30%. Otherwise as for Paste.

Tomato Ketchup. Optional: preserv. (declar.) SO_2, max. 500 p.p.m., sorbic acid, max. 1000 p.p.m. or benzoic acid, max. 1000 p.p.m. permitted colour (declar.). Mould count, max. 50% positive fields. Use of trimmings requires declar.

Glacé Fruit. Optional: glucose; artif. flav. (declar.); permitted colour (declar.); SO_2, max. 500 p.p.m., sorbic or benzoic acid' max. 1000 p.p.m. (declar. by name).

Jams. Prepd. from fresh fruit, fruit pulp, or canned fruit and sweetening agent. Optional: pectins or acids to compensate for deficiencies in fruit; class II preservative (declar. by name): SO_2, max. 500 p.p.m.; benzoic or sorbic acids, max. 1000 p.p.m.; pH adjusting agent; anti-foaming agent. *Three grades:* **(1)** Named fruit, min. 45% (strawberry, 52%). Sol. solids (by refract.), min. 66%. Optional ingredients as above. No apple or rhubarb. Labelling: if no preserv., "pure", "genuine", or similar, may be used. **(2)** Named fruit, min. 27% (strawberry, 32%). Sol. solids as **(1)**. Must contain added pectin (no limit). Optional ingredients as given above and permitted colour (declar). No apple or rhubarb. Labelling: description as ". . . jam with added pectin"; no use of word "pure", etc. **(3)** Apple or rhubarb mixtures. Named fruit, min. 12.5% (strawberry, 15%). Apple or rhubarb pulp, min. 20%. Sol. solids and optional ingredients as given above and permitted colour (declar.). Declar. for added pectin.

Preserves or Conserves. Sol. solids, min. 60%. Fruit content, min. 45 lb. per 55 lb. sugar, invert sugar or dextrose. No special requirement for the condition of the fruit in preserves as distinct from jams. No apple or rhubarb.

Fruit Jellies. Sol. solids, min. 62%. Optional in all: sweetening agent, acids as for jams. *Two grades:* (1) No min. for fruit juice. Pectin as for jams (grade 1). (2) Fruit juice, min. 32%. Must contain added pectin. Optional: gelatine, agar, carrageen; permitted colour; preserv. as for jams (declar. for all). Labelling: no use of word "pure", etc.

Citrus Marmalades. Prepd. from peel, pulp or juice and sweetening agent. Sol. solids, min. 65%. Optional: acids as for jams, pH adjusting and foaming agents. *Two grades:* (1) No min. for fruit. (2) Fruit, min. 27% of any combination of peel, pulp or juice of named citrus fruit. Must contain added pectin. Class II preservative as for jams.

Pineapple, Fig, Ginger Marmalades. Sol. solids, min. 65%, Optional: as for citrus marmalades. *Two grades:* (1) Fruit, min. 45%. (2) Fruit, min. 27%. Optional: permitted colour (declar.), Class II preserv., as for jams (grade 2).

Mint Jelly. Mint juice with or without leaves (no min.) Optional: flavouring prep.; permitted colour; acids as for jams; pectin.

Mincemeat. Suet, fruit or dried fruit, salt, spices, sweetening agent, thickening agent, citric acid and caramel (declar.). Optional: vinegar, fruit juice (fresh, concd. or fermented), spirituous liquor, nuts, cooked meat, preserv. (declar.) as for jam. Special certificate required for entry on account of suet as "meat" ingred.

GELATINE AND GELATINE PREPARATIONS

Gelatine. Ash-free solids, min. 82%. Ash, max. 2.6% of dry matter. Preserv.: SO_2, max. 500 p.p.m. Bacteria. max. 10,000/g. No coli-aerogenes in 0.01 g. Special certificate required for entry.

Jelly Powders, Tablets. Optional: permitted colour (no declar.).

MEAT PRODUCTS

Note: Meat or meat products from animals fed diethylstilbestrol (DES) prohibited. On meat and poultry products frozen and then thawed prior to sale must declr. "previously frozen".

Meat Extenders. New regulations specify conditions under which simulated meat prods. may be sold alone or mixed with meat. Min. protein contents laid down for various prods. and min. vitamin and trace elements obligatory. Simulated meat prods. or mixts. of these with meat must be nutritionally equiv. to the meat prod. they resemble.

Meat Binder. Any combn. of filler, salt, sugar, glucose, dextrose, dried corn syrup solids, spices and other seasoning except tomato. If for use in salted, pickled, corned, cured or smoked meat, may contain KNO_3, KNO_2, $NaNO_3$, $NaNO_2$, ascorbic, erythorbic acids and their Na salts and $NaCo_3$. If for use in prepd. meat or by-product (meat paste, etc.) in which gelling agent allowed, may contain gelling agent. Labelling: directions for use in accordance with limits for cereal and nitrite content in product in which used.

Meat Paste or Spread, Potted Meat, Meat Loaf, Meat Roll, Meat Lunch, Luncheon Meat. Filler, meat binder, etc., max. 4%, calc. as dextrose (official method). "Filler" includes: flour or meal from grain or potato (not legume); processed wheat flour of min. 80% dextrose equiv.; bread, bread roll or bakery product; milk, skim milk, buttermilk or whey powder. Water, not more than in the fresh meat or by-product, with max. 60% if filler present. Optional: filler, meat binder, salt, sugar, dextrose, glucose, spices, other seasonings, eggs (not in paste, spread or potted meat), modif. dried skim milk, max. 3%, milk, glucono-delta-lactone, partially defatted pork or beef fatty tissue, gelling agent (declar. of latter, or word "jellied" in name of food). Labelling: if one kind of meat mentioned, all meats present

CANADA (cont.)

to be listed in descending order of amt. (list may form part of name). Label on pastes or spreads must indicate the ingredients.

Salted, Pickled, Corned, Cured, Smoked Meats. Optional: Class I preserv. (see p. 642).

Pumping Pickle. Optional: Class I preserv., citric acid and Na salt, certain sugars, salt, spices, seasoning, vinegar, sod. bicarb., sod. hydroxide and (for cured pork and beef cuts only) sod. phosphates (mono-, di-, meta-, pyro-, etc.), max. 0.5%. In dry cure, anti-caking agent or humectant.

Canned Poultry. Optional: attached bones or pieces of bone, broth, salt, seasoning, gelling agent, small amts. fat. (Declar. of gelling agent, or word "jellied".) Boneless pack: poultry flesh, min. 50%; broth used: poultry broth s.g. min. 1,000 at 50°C.

Poultry Paste. Filler (as for meat paste), etc., max. 4% as dextrose. Moisture (when filler present), max. 60%.

Gelling Agents. Include gelatine, agar, Irish moss gelose. Agar: total ash, max. 7%; ash insol. in HC1, max. 1%.

Meat Extract. Total solids, min. 75%.On, dry matter: NaC1, max. 12%; fat m ax. 0.6%; ash, max. 27%; total nitrogen, min. 12%. Nitrogen comps. to contain min. 40% total meat bases, and min. 10% creatin and creatinine.

Fluid Meat Extract. Total solids, min. 50%. Otherwise as for meat extract.

Soup Cubes, Bouillon Cubes. Labelling: list of ingreds. reqd.

SPICES, CONDIMENTS, AND FLAVOURINGS

Spices and Herbs. Numerical standards for ash, fibre, starch, etc., in a large number of spices. Ethylene oxide for fumigation (not for mixtures cont. salt), max. 1500 p.p.m. ethylene chlorhydrin residue.

Mustard. Ash, max. 8% on oil-free basis; natural starch, max. 1.5%; volatile mustard oil, min. 0.40%.

Curry Powder. Salt, max. 5%.

Onion Salt, Garlic Salt, Celery Salt. Salt, max. 75%. Optional (onion and garlic salt): anti-caking agent, max. 2%.

Celery Pepper. Ground black pepper, max. 70%.

Salt (Table). Must contain 0.01% potass. iodide (declar.). Optional: calcium sulphate, max. 1.4%; material to prevent caking (max. 2% in *free-running flour salt*). Impuri-ites other than calcium sulphate, max. 0.1%. 13 p.p.m. Na ferrocyanide in dendritic crystals. 10 p.p.m. polysorbate 80 for coarse salt. Dextrose Na thiosulphate, or Na bicarbonate as iodide stabilizer.

Flavours and Essences. Min. limits for active constituents of many natural flav. essences or extracts. Vehicles: water, ethyl alcohol, glycerine, and propylene glycol, or mixtures of these; also (but not in essences or extracts) edible veg. oil. Optional: sugars, dextrose, glucose, honey, permitted colour, preserv. (SO_2, max. 500 p.p.m., or benzoic acid, max. 1000 p.p.m. or sorbic acid, max. 1000 p.p.m.), permitted antioxidant (see p. 643). Fortified fruit extracts, essences or flavours: derived from named fruit with addition of other natural extractives; min. 51% of flav. strength from ingred. by which named. Vanilla extr.: in 100 ml at least quantity of sol. substances in nat. proportions extractable from min. 10 g of beans (max. 25% moisture) or min. 7.5 g of beans on moisture-free basis (min. 25% moisture). No added colour. *Prohibited:* coumarin, tonka bean extract, dihydrosafrole, *iso*safrole; oils of sassafras, camphor, sassafrassy and micranthum; safrole.

SUGARS AND SUGAR PRODUCTS

Icing Sugar. Optional: starch or anti-caking agent, max. 5%; permitted colour (no declar.).

Refiners' Syrup, Refiners' Molasses. Moisture, max. 25%; sulphated ash, max. 12%. Optional: SO_2, max. 500 p.p.m.

Glucose. Moisture, max. 22%; ash, max. 1%; reducing sugars as dextrose, min. 40% (on dry matter). Optional: SO_2, max. 500 p.p.m.

VINEGAR AND VINEGAR PRODUCTS

Vinegar. Acetic acid, min. 4.1%; max. 12.3% (max. does not apply to vinegar "for manufacturing use only" if so labelled and invoiced, etc.). Optional: caramel colour (except in spirit vinegar or its blends). Malt vinegar: to be dextro-rotatory; total solids, min. 1.8 g./100 ml.; ash, min. 0.2 g./100 ml. Blended vinegar: spirit vinegar to contribute max. 55% of total acetic acid; if any variety named, a complete list to be

given in descending order of amts. based on acetic acid content. Labelling: if any ref. to strength, declar. of % acetic acid reqd.

Pickles. Veg. or fruits with salt. Optional: vinegar, sugar, invert sugar, glucose or dextrose, spices, seasonings, permitted colour (declar.), Class II preserv. (declar. by name), firming agent, polysorbate 80, max. 0.05%, lactic acid, vegetable oils. Thickener in Mustard Pickles and Relishes only.

Sauces. Optional: caramel colour, thickening agents.

Salad Dressings, etc. Mayonnaise: veg. oil, min. 65%; egg yolk required, but no min.; acid ingred. must include vinegar or lemon juice, and citric, tartaric, or lactic acid optional. No turmeric or saffron in the spice or seasoning. Salad dressing: veg. oil, min. 35%; otherwise as for mayonnaise, but with cereal; optional: emulsifier; xanthan gum. French dressing: as salad dressing, but without cereal.

LIMITS FOR METALLIC, ETC. CONTAMINATION

Tolerances only as in Table p. 641.

Mineral Oil: Only where reqd. in production, and use cannot be avoided in good practice: max. 0.3%.

Insecticidal and Fungicidal Residues: Tolerances for a wide range of substances on listed fruits and veg.

Aflatoxins. In nuts and nut products, max. 15 p.p.b.

Vinyl Chloride: *Proposed* prohibition of migration of any amt. into food from packaging material.

FOOD ADDITIVES

Permitted lists include anti-caking, bleaching, etc., thickening, firming, glazing, release, anti-foaming, pH adjusting, sequestering and starch modifying agents, food enzymes, artificial sweeteners, pesticides.

Colours. See Tables, pp. 806-812. Synthetic colours limited to 300 p.p.m. in total but the following must not exceed (in total) 100 p.p.m.: Brilliant Blue FCF and Fast Green FCF.

Acids. The usual food acids and adipic, fumaric, malic and gluconic acids are permitted in unstandardised foods and "good manufacturing practice".

Preservatives and Antioxidants. In foods for which a standard is laid down, no preserv. may be used unless permitted as one of the optional ingreds. In general, declaration of the presence of preserv. is reqd., except for sulphur dioxide and its salts in glucose and in syrups or confectionery containing glucose; in malt liquor, molasses, refiners' syrup, sugar-cane syrup and wine; and for Class III preserv. in bread, bakery products, cheese and processed cheese.

Class I preservs. are the "natural" ones, salt, sugar, dextrose, glucose, alcohol, acetic acid, ascorbic and erythorbic acid and their salts, potassium and sodium nitrates and nitrites, wood smoke, vinegar, spices. Class II preservs. are, benzoic acid, methyl and propyl *p*-hydroxy-benzoic acid, sulphurous acid and sorbic acid and their salts with the following limits: benzoic acids, 1000 p.p.m.; sorbic, 1000 p.p.m.; SO_2, 100 p.p.m. in beverages as prepared for consumption according to label directions, 2500 p.p.m. in dried fruits and vegetables, 500 p.p.m. in other foods. These preservs. must not be used together. Class III includes propionic acid and its salts, max. 2000 p.p.m., sorbic acid and its salts, max. 1000 p.p.m. and sod. diacetate, max. 3000 p.p.m. Class IV (usable in veg. and animal fats and oils, except milk fat) comprises the antioxidants gum guaiacum, vegetable oil containing tocopherols, lecithin, citric, tartaric and ascorbic acids, propyl gallate, butylated hydroxyanisole, butylated hydroxytoluene, ascorbyl palmitate and monoisopropyl citrate. Not more than 0.02% of BHA, BHT, PG or a combination of them in fats and oils. Different limits in other foods. A harmless carrier may be also used (limit includes carrier).

CONTAINERS

Specific sizes of containers (metal or glass) are laid down for certain classes of canned foods, *e.g.* soups, spaghetti with meat or meat sauce, pork and beans, canned fruits, canned vegetables, jam.

LABELLING

All prepacked foods must have the following: the common name of the food and the net contents on the main panel; the name and address of the person by or for whom the product was made on any panel; the list of ingredients on any panel and the shelf life. Common name must be that used in the standard for the food where one exists. Min. type sizes specified for declrn. of net contents; must be both metric and avoirdupois. Certain foods exempt from declr. of ingredients. Additives must be declr. unless food exempt from declrn. of ingreds. May show adds. at end of list in any order. Declr. colours, natural and artificial flavours by "colours", "natural flavours", "artificial flavours"; declr. preservatives and antioxidants by specific names. Declr. shelf-life and storage instructions on products with durable life date of 90 days or less by words "best before" and "meilleur avant".

All obligatory declrns. must be in French and English, except name and address. Min. type size (see also type sizes for net contents) $\frac{1}{16}''$ high ($\frac{1}{32}''$ if princ. display surface max. 1·55 sq. in.).

U.S.A. FEDERAL

GENERAL NOTE

Foods indicated by an asterisk are those for which precise names, definitions and standards of identity have been formulated. The composition must conform with these standards, and only substances shown in these standards as permissible additions may be added to these foods. Declaration of the presence of such additions is only necessary if such is required by the standard, and must then be in specified wording. For all other foods, the label must bear a list of all ingredients present (see under "Labelling").

BEVERAGES, NON-ALCOHOLIC

***Frozen Concentrate for Lemonade.** Lemon juice (fresh, frozen or conc.). Lemon pulp may be removed. Water and sweetener (sugar, and/or invert sugar syrup, may be mixed with dextrose, corn syrup, dried corn syrup, glucose syrup, dried glucose syrup (sugar or invert sugar, min. 2/3 of mixture)). Soluble solids, min. 48% by refrac-

tometer corr. for acidity. When dil. according to directions acidity as anhydr. citric acid, min. 0.70 g/100 ml lemonade and sol. solids, min. 10.5% by wt. Decl. directions for diln.

***Frozen Concentrate for Coloured Lemonade.** As for Frozen conc. for lemonade plus colour from added fruit or veg. juice and/or permitted colour (declr.).

Diluted Orange Juice Beverage. Non-carbonated bev. with less than 100% and more than 0% orange juice. Declr. % orange juice in 5% increments as multiple of 5. If less than 5% may just state "less than 5%".

Non-Carbonated, Non-Fruit Juice Drinks. Contains no fruit or veg. juice. Inc. conc., dehydrtd. and powdered prods. Optional: as for soda water except quinine and calc. disod. EDTA. Declr. contains no juice.

***Soda Water (Carbonated Beverages).** CO_2 min. 1 atmos. at 60°F. Alcohol max. 0.5%

Optional ingredients: any food additive permitted in non-standardized foods; sugar, invert, dextrose, glucose syrup, sorbitol; *no* artific. sweeteners; fruit juices, nat. and art. flavours and colours; acetic, adipic, citric, fumaric, lactic, malic, phosphoric, tartaric acids; buffering salts; locust bean gum, glycerol ester of wood rosin, gums guar, acacia, and tragacanth, hydroxylated lecithin, lecithin, methyl cellulose, mono- and diglycerides of fatty acids, pectin, polyglycerol esters of fatty acids, propylene glycol alginate, sod. alginate, sod. carboxymethylcellulose, sod. hexametaphosphate; ammoniated glycyrrhizin, gum ghatti, licorice, yucca; caffeine (max. 0.02%, obligatory in "cola" or "pepper" drinks); quinine (max. 83 p.p.m.); ascorbic acid, benzoic acid, BHA, BHT, erythorbic acid, glucose-oxidase-catalase, methyl or propyl paraben, propyl gallate, pot. or sod. benzoates, sulphites or sorbates, sorbic acid, SO_2 tocopherols; dimethyl polysiloxane, max. 10 p.p.m. For canned soda water: stannous chloride, max. 11 p.p.m., calc. disod. EDTA, max. 33 p.p.m.

Labelling: If not flav. or sweetened, name is "soda water," "club soda" or "plain soda"; if flav. and sweetened, ". . . soda" (e.g. "grape soda") or " . . . carbonated beverage," but common names such as "ginger ale" or "root beer," or a proprietary name commonly used by the public may be used. Waters containing caffeine, art. flavour or colour must be labelled accordingly; preservatives (incl. antioxidants) must be declared by name; if quinine salts present, word "quinine" must appear prominently in name of article or by separate declaration.

COCOA, CHOCOLATE, AND SUGAR CONFECTIONERY

Good manufacturing practice in the cocoa prods. and confy. ind. laid down in regs. Hygiene, processing controls and keeping of records specified.

***Cocoa Nib.** Shell, max. 1.75% (by A.O.A.C. method). Optional: alkalization (declar.) with bicarb., carb., or hydroxide of sod., potass. or ammon.; or $MgCO_3$ or MgO; or with any mixture of these. Total added alkali, max. 3% (as K_2CO_3).

***Chocolate Liquor, Chocolate, Bitter Chocolate, Baking Chocolate, Cooking Chocolate, Chocolate Coating, Bitter Chocolate Coating.** Cocoa butter, min. 50%, max. 58%.

---

* *See beginning of section.*

Optional: alkalis as for Cocoa Nib; ground spice (declar.); ground vanilla beans (declar.); any natural food flav. oil, oleoresin, or extract (declar.); vanillin, ethyl vanillin, or other artif. food flavouring (not coumarin), (all declar.); butter, milk fat, dried malted cereal extract, ground coffee, ground nut meats (all declar.); salt. No flav. ingred. which simulates flav. of choc ., milk or butter.

***Breakfast Cocoa, High Fat Cocoa.** Cocoa butter, min. 22%. Optional as for chocolate liquor (except butter, etc.).

***Cocoa, Medium Fat Cocoa.** Cocoa butter, min. 10%, max. 22%. Otherwise as for breakfast cocoa.

***Low-Fat Cocoa.** Cocoa butter, less than 10%.

***Sweet Chocolate, Sweet Chocolate Coating.** Choc. liquor content, min. 15% (calc. as 2.2 × % fat-, alkali-, flavouring-free cacao material). Optional: as for chocolate liquor; also honey, molasses, brown sugar, maple sugar; as emulsifier (declar.), lecithin (max. 0.5%), or mono- and diglycerides of fat acids in combn. with their monosod. phosphate derivatives (max. 0.5%), or mixtures of the two types of emulsifier, (total max. 0.5%) sorbitan monostearate, max. 1%; polysorbate 60, max. 0.5% (total max. of last three emulsifiers max. 1.0%); butter or milk ingred., if less than 12% milk solids in finished product. Sweetening ingreds.: sugar; mixtures of dextrose and sugar, with dextrose solids max. one-third of total sweetening solids; mixtures of dried glucose syrup and sugar, with glucose syrup solids max. one-fourth of total sweetening solids; mixtures of sugar, dextrose, glucose syrup solids in which 3 × solids of dextrose plus 4 × glucose syrup solids is not more than total wt. of sweetening solids.

***Milk Chocolate, Sweet Milk Chocolate, Milk Chocolate Coating, Sweet Milk Chocolate Coating.** Milk fat, min. 3.66%; milk solids, min. 12%; choc. liquor, min. 10%. Non-fat dry milk, max. 2.43 times, min. 1.20 times, wt. of milk fat. Optional and sweetening ingreds. as for sweet chocolate.

***Skim Milk Chocolate, Sweet Skim Milk Chocolate, etc.** Milk fat, less than 3.66%; skim milk solids, min. 12%. Otherwise as for milk chocolate.

***Buttermilk Chocolate, Buttermilk Chocolate Coating.** Milk fat, less than 3.66%; sweet cream buttermilk solids, min. 12%. Otherwise as for milk chocolate.

***Mixed Dairy Product Chocolate or Coating.** Dairy ingreds. may be two or more of: full cream milk products, skim milk products, sweet cream buttermilk products, malted milk. Milk fat may be less than 3.66%; milk solids, min. 12%. No component to contribute less than one-third amt. of milk solids contribd. by component used in largest proportion. When mixture is of full cream and skim milk products, non-fat milk solids will exceed 2.43 times the milk fat. Name of product must include names of dairy ingreds. used, in order of wts. present.

***Sweet Chocolate and Vegetable Fat (Other than Cacao Fat) Coating.** As for sweet chocolate, but containing one or more veg. fats or oils (other than cocoa butter), with a melting pt. below that of cocoa butter. The fat may be hydrogenated. Milk solids, no max. limit.

---

* *See beginning of section, p. 643.*

U.S.A. (FEDERAL) (cont.)

***Sweet Cocoa and Vegetable Fat (Other than Cacao Fat) Coating.** As for sweet chocolate, but with cocoa instead of choc. liquor, and with one or more veg. fats, oils, or stearins, with a melting pt. higher than that of cocoa butter. The fat may be hydrogenated. Fat-, alkali-, flavour-free cocoa, min. 6.8%. Milk solids, no max. limit.

Chocolate-covered Confectionery. The couverture must comply with above requirements for kind used, and the correct official designation must be declared in the list of ingreds. Natural or artif. flav. and emulsifiers also to be declared.

Sugar Confectionery. Optional: permitted colour (see p. 651); harmless flav. (see p. 652); harmless resinous glaze, max. 0.4%; natural gum; pectin; alcohol, max. 0.5% by vol., solely from flav. extracts; chewing gum containing harmless non-nutritive masticatory substances. Other non-nutritive substances (*e.g.*, artificial sweeteners) permitted if safe and serve some practical purpose. Sod. bicarb., sod. acetate, sod. citrate, sod. and calc. phosphates, cream of tartar, calcium carbonate, and other additives are also permissible (see lists, pp. 653-665). Labelling: list of all ingreds., and statements of artif. colour and natural or artif. flav. reqd. Caramel is an artif. colour; may be declared "coloured with caramel", or similarly.

CHEESE

*Standards have been issued for a wide variety of cheeses, processed cheeses, cheese foods, cheese spreads and related foods, embodying prescribed methods of preparation, permissible additions, required compositions, etc.

FATS AND OILS

***Margarine.** The Standard lists optional for ingred., art. colours, flav., preserv., vitamins, BHA and or BHT, max. 0.02% (declar.).

Rendered Animal Fat (or shortenings containing animal fat). Optional: monoglycerides, diglycerides. Optional in or with shortening: glyceryl lactostearate, with certain composition requirements, max. 8% of shortening *plus* additive (declar. on shortening and on finished food containing it); also mixtures of mono- and diglycerides and their lactic acid mono-esters, total lactic acid content max. 16%, acid no. max. 14, total free and combined lactic acid in shortening *plus* additive, max. 1.75%. Antioxidants (declar., name and %): (1) guaiac resin, max. 0.1%; (2) tocopherols, max. 0.03%; (3) lecithin; (4) BHA, max. 0.01%; (5) propyl gallate, max. 0.01%; (6) citric and/or phosphoric acid and/or monoisopropyl citrate, max. 0.01 %, alone or with (4) or (5). Permitted colouring matters: annatto, carotene, cochineal, green chlorophyll, turmeric and U.S.-certified coal-tar colours as in Table, pp. 806-811, declar. "artificially coloured".

FISH PRODUCTS

***Canned Shrimp.** Standard of fill (non-transparent containers): wet pack, cut-out wt. (official method) min. 64% of water capacity; dry pack, min. 60% of water capacity (except in cans $2\frac{11}{16}$ in. dia. by 4 in. high, for which min. is $6\frac{1}{2}$ oz. per container). Labelling as substandard fill if below. $CaCl_2$ may be added for improving firmness. Ingredients to be declared.

**See beginning of section, page 643.*

***Canned Oysters.** From whole oysters, broken pieces or cut oysters. Naming: "Oysters", or "Cove Oysters" (if *O. virginica*), "Pacific Oysters" (if *O. gigas*) or "Olympia Oysters" (if *O. lurida*); preceded by "Pieces of" or "Cut" if the pack is of these types; if a mixture, names of types combined in order of predominance by wt. Packing medium: water, and/or liquid draining out before or during processing. Optional: salt. Standard of fill: drained wt. (official method) min. 59% of water capacity.

FLOUR AND FLOUR PRODUCTS

***Flour (White).** Moisture, max. 15%. Ash, on dry matter, max. 0.35% plus 1/20 of % protein on dry matter. Optional: malted wheat, malted wheat flour; malted barley flour, max. 0.25%; oxides of nitrogen, chlorine, NOCl, ClO_2, benzoyl peroxide mixed with max. six times wt. of one or more of potass. alum, $CaSO_4$, $MgCO_3$, sod. alumin. sulphate, dicalcium phosphate, tricalcium phosphate, starch, $CaCO_3$, acetone peroxides, azodicarbonamide (max. 45 p.p.m.). (Bleachers may not be added in amt. more than sufficient for bleaching or, where ageing effect also, for bleaching and ageing; their use must not conceal damage or inferiority or make flour appear better or of greater value than it is.) Labelling: when bleachers used, word "Bleached" required immediately in association with name of food wherever it appears.

***Self-rising Flour.** Acid-reactor to be calcium acid phosphate or sod-acid pyrophos., or both, in sufficient amt. to neutralize the sod. bicarb. Total of acid-reactor and sod. bicarb., max. 4.5% of flour used. CO_2 evolution, min. 0.5% (by official method). Optional: salt; bleachers as for flour.

***Semolina.** Moisture, max. 15%; ash, max. 0.92% of dry matter.

***Special Flours.** Standards also for enriched flour, bromated flour, enriched bromated flour, durum flour, enriched self-rising flour, phosphated flour, whole wheat flour, bromated whole wheat flour, whole durum wheat flour, farina, enriched farina.

***Corn Flour (White).** Moisture, max. 15%.

***Macaroni Products.** Total solids, min. 87%. Optional in all: egg-white (liquid, frozen, or dried), solids min. 0.5%, max. 2.0% of finished food; disod. phosphate, min. 0.5%, max. 1.0%; onions, celery, garlic, bay leaf; salt; gum gluten, to give protein max. 13% in finished food. Labelling: declar. of disod. phosphate, and of herb seasonings, when present. *Macaroni*, diam. min. 0.11 in., max. 0.27 in. *Spaghetti* (cord or tube), min. 0.06 in., max. 0.11 in. *Vermicelli*, (cords only), max. 0.06 in. Derived products from these as follows. *Milk macaroni products*. Total milk solids, min. 3.8%; non-fat dry milk, max. 2.275 times milk fat. No egg, disod. phosphate. If gluten added, total gluten protein plus flour protein, max. 13%. *Whole-wheat macaroni products*. No egg, disod. phosphate or gum gluten. *Wheat and soy macaroni products*. Soy flour, min. 12.5% of wheat plus soy. Otherwise as for milk macaroni. *Vegetable macaroni products*. Contain tomato, artichoke, beet, carrot, parsley or spinach; veg. dry matter, min. 3%.

---

* *See beginning of section, page 643*

U.S.A. (*FEDERAL*) (*cont.*)

Otherwise as for milk macaroni. *Macaroni products made with non-fat milk* 12-25% milk solids-not-fat. Carrageenan and salts (decl.) optional. No egg white, disod. phosphate or gluten. Otherwise as for Macaroni products. *Enriched macaroni products, Enriched vegetable macaroni products.* As for corresp. prod. and in ea. lb., 4-5 mg. thiamine; 1.7–2.2 mg. riboflavin; 27–34 mg. niacin or niacinamide; 13–16.5 mg. iron (Fe). Vit. D optional, 250–1000 U.S. P. units.

***Noodle Products.** As macaroni products, but with egg yolk or whole egg with no disod. phosphate. Egg solids, min. 5.5% of total solids. Varieties are noodles, egg noodles (ribbon-shaped), and egg macaroni, egg spaghetti, egg vermicelli. Wheat and soy noodle products, veg. noodle products, as for corresp. macaroni products, with egg as for noodles, enriched noodle products, enriched veg. noodle products as for corresp. macaroni products but no carrot in enriched veg. noodle products.

FRUIT AND VEGETABLE PRODUCTS

***Tomato Ketchup, Catsup, Catchup.** Tom. pulp concd., with sugar or sugar and dextrose, salt, vinegar, spices and/or flav., onions and/or garlic. Optional: glucose syrup solids max. ⅓ of total sweetening solids. Labelling: declar. of raw materials (specified wording).

***Tomato Juice.** Unconcd. juice of red or yellow varieties. (If latter, must be designated as such). Optional: homogenization; salt.

***Jams, Preserves.** Fruit, fresh, conc., frozen and/or canned, Group I: blackberry, black raspberry, blueberry, boysenberry, cherry, crabapple, dewberry, elderberry, grape, grapefruit, huckleberry, loganberry, orange, pineapple, red raspberry, rhubarb, strawberry, tangerine, tomato, yellow tomato, youngberry; Group II: apricot, cranberry, damson, fig, gooseberry, greengage, guava, nectarine, peach, pear, plum, quince, red currant (not black currant). Comb. of fruit: any comb. of 2, 3, 4 or 5 fruits, wt. of each min. ⅕th wt. of comb. (pineapple min. ⅒th); any comb. of apple and 1, 2, 3 or 4 fruits, wt. of each min. ⅕th and wt. of apple max. ½ wt. of comb. (pineapple min. ⅒th). *Optional ingreds.:* nutritive carbohydrate sweeteners, spice, acidifying agents, pectin to replace natural deficiency, buffering agents, preservatives (not specified which), antifoam agents (not from animal fat). *Fruit content:* Group I fruits min. 47 parts by wt. fruit to 55 parts saccharine ingredient, all other cases 45 parts by wt. fruit to 55 parts saccharine ingred. Sol. solids min. 65% (uncorrected). *Labelling:* on single fruit jam state "preserve" or "jam" and name of fruit used, on mixed fruit jam state "preserve" or "jam" prededed or followed by "mixed fruit" or by names of fruit in order of predominance, if any. Declare all optional ingreds., need not declare form of fruit used, may state "used as needed" after acidifying agents, pectin, buffering agents if these are not always used.

Blackcurrant Jam or Jelly. No standard for these. Must be labelled as for unstandardised foods. No min. fruit content.

See beginning of section, page 643.

***Fruit Jelly.** "Fruit juice ingred." min. 45 parts per 55 parts saccharine ingred. True wt. of fruit juice ingred. defined as:—

$$F \times \left[\frac{(\text{Per cent. sol. solids in juice}) \times (\text{Wt. of juice})}{100} - \text{Wt. of sugar or other solids added to juice}\right]$$

where F has values: pomegranate, fig, 5.5; crabapple, 6.5; apricot, cherry, damson, greengage, plum, grape, pineapple, 7.0; apple, quince, 7.5; orange 8.0; peach, 8.5; black raspberry, 9.0; cranberry, loganberry, raspberry, red currant, 9.5; blackberry, boysenberry, dewberry, youngberry, 10.0; grapefruit, prickly pear, 11.0; gooseberry, 12.0; strawberry, 12.5; guava, 13.0. Sol. solids, min. 65%. Mixtures of juices up to five allowed wt. of each min. $\frac{1}{5}$th wt. of comb. Optional additions as for jams; also, in apple, crabapple and pineapple: mint flav., artif., green colour; and in apple, crabapple, or mixtures of the two: cinnamon flav. (natural), artif., red colour. Labelling: as for jam.

***Fruit Butter.** From fresh, frozen, canned, and/or dried fruit (declar. of latter), with skins, seeds, pits [stones] and cores screened out. "Fruit ingred." min. 5 parts per 2 parts sweetening ingred. (but fruit juice, as defined under fruit jelly, may be used instead of sweetening ingred. if not less than half wt. of "fruit ingred."; declar. of name of juice so used.) True wt. of fruit ingredient by formula similar to that for fruit jelly, with following values for F: pear, 6.5; apricot, grape, plum, prune, 7.0; apple, quince, 7.5; peach, 8.5 (no other fruits). Sol. solids, min. 43%. Mixtures up to five allowed (wt. of each, min. 20% of wt. of mixed fruit ingred.). Optional: spice (declar.), acid ingreds. as for jams; salt; natural flavouring (declar.). Sweetening ingreds. as for jams, with optional addition of brown sugar or invert brown sugar syrup. Labelling: as for fruit jelly.

Orange Marmalades. No Food Law standards. Following are U.S. Dept. of Agric. standards, for use in Govt. purchases and commerce. Bitter orange marmalade: min. 25 parts (bitter) orange fruit ingred. per 75 parts sweetening ingred. Sol. solids, min. 68%. Optional additions: food acids, food pectins, lemon juice, lemon peel. Sweetening ingreds. include dextrose, glucose syrup. "Styles" are "sliced" (peel in thin strips) and "chopped" (peel in small pieces, *e.g.*, irregular, or dice-like). "Type I, Clear": peel in translucent semi-solid or gel-like mass. "Type II, Natural": peel in cloudy or opaque semi-solid or gel-like mass. "U.S. Grade A" (Fancy) and "U.S. Grade B" (Choice) defined on a scoring of quality factors. "U.S. Grade D" (Substandard) below Grade B requirement. U.S. Dept. of Agric. standards also for sweet orange marmalade, sweet and bitter orange marmalade (both 30 parts fruit to 70 parts sugar).

MEAT PRODUCTS

Cured Hams, Pork Shoulder Picnics. Pumping pickle may contain monosod. phos., disod. phosphate, sod. hexametaphosphate, sod. tripolyphosphate, sod. pyrophosphate, sod. acid pyrophosphate; max. 0.5% added phosphate in finished product. Pickle for pumping, curing or packing may contain max. 75 oz. ascorbic acid or sod. ascorbate per 100 gal. pickle.

U.S.A. (FEDERAL) (cont.)

Potted Meat, Devilled Meat. No cereal, veg. flour, dried milk, etc.

Luncheon Meat, Meat Loaf. Water, max. 3% allowed; if used, must be included in list of ingreds; glucose syrup, max. 2% (as dry solids) of all ingreds. used.

Ham Spread, Tongue Spread, etc. Min. 50% of meat named, in addition to any other meat or meat by-product (including fat).

Devilled Ham. Fat, max. 35%. Moisture, max. as in the fresh meat.

Liver Sausage, Liver Paste, Loaf, etc. Liver, min. 30%.

Meat Stews. Min. 25% of meat named, calcd. on wt. of the fresh meat.

Meat Extract. Moisture, max. 25%.

Fluid Extract of Meat. Moisture, max. 50%.

Meat Products Generally. Optional: salt, approved sugars (sucrose, maple sugar, dextrose, invert, honey, glucose syrup or solids), wood smoke, vinegar, flavourings, spices, sod. and pot. nitrate, sod. and pot. nitrite. In cooked, cured, comminuted, meat food products: ascorbic acid, max. $\frac{3}{4}$ oz. per 100lbs. product. Use of nitrites and nitrates must not result in over 200 p.p.m. nitrite in finished product. Labelling: list of ingredients in order of predominance; labels must be submitted for approval of Meat Inspection Division, Washington (if meat is from sheep, cattle, pigs, or goats).

Canned Meat Products (Imports). Official meat-inspection certificate reqd. for all meat products.

Max. 0.25% of unsound or suspicious cans or both (leakers, swells, short vacuum, over-stuffed).

VINEGAR PRODUCTS

***Mayonnaise, Mayonnaise Dressing.** Veg. oil, min. 65%. Acid ingred.: (1) vinegar or diluted vinegar, acidity min. 2.5% by wt. (as acetic acid), optionally with citric acid (declar.) max. 25% of wt. of acids of vinegar present; and/or (2) lemon or lime juice or dilutions of same, acidity min. 2.5% by wt. (as citric acid). Egg yolk ingred.: liquid or frozen yolks or whole eggs; optional, liquid or frozen egg white. Ca. disod. EDTA or disod. EDTA or mixt., max. 75 p.p.m. (decl.). Optional ingred.: salt; sugar, dextrose, glucose syrup, invert syrup, non-diastatic maltose syrup, honey; mustard, paprika, other spice, spice oil or extract (but no turmeric or saffron or oil or extract giving colour similar to that given by egg yolk); monosod. glutamate; any suitable harmless seasoning or flav. (except imitations) if not giving colour similar to that given by egg yolk. May be packed in CO_2 or nitrogen.

***French Dressing.** Veg. oil, min. 35%. Acid ingreds.: as for mayonnaise, but no min. for acetic or citric acids. Optional emulsifiers (max. 0.75%): (a) acacia, carob bean, guar, karaya, tragacanth gums, Irish moss extract, pectin, propylene glycol ester of alginic acid, sod. carboxymethyl-cellulose, methylcellulose (U.S.P.; methoxy content, min. 27.5%, max. 31.5%, on dry wt.), hydroxypropyl methylcellulose, max. 0.75%, or any mixture of these. Dioctyl sod. sulphosuccinate, max. 0.5% of emulsifiers used; (b) egg ingred. as for mayonnaise (max. egg-yolk solids, 0.75%). (Declar. for non-egg emulsifiers). EDTA as for mayonnaise. Optional ingreds. as for mayonnaise, but no exclusion of turmeric, or substances simulating egg yolk colour; also tomato paste, puree or ketchup; sherry wine; permitted colour. Packing as for mayonnaise.

**See beginning of section, page 643.*

***Salad Dressing.** Veg. oil, min. 30%. Egg-yolk ingreds. as for mayonnaise, min. 4% as liquid egg-yolk. EDTA as for mayonnaise. Acid ingreds. as for French dressing. Starch ingreds.: food starch, tapioca, wheat or rye flour. Optional emulsifiers: as for (a) in French dressing (declar.). Optional flav. ingreds. as for mayonnaise. Packing as for mayonnaise.

COLOUR ADDITIVES

All colour additives, whether synthetic or not, were removed from the general Food Additives Regulation by the Colour Additives Amendments of 1960 under which all such additives had to be retested for suitability for use in foods.

The synthetic coal tar dyes which have for long been subject to certification before use are listed in the Tables on pp. 806-811. Under the Transitional Regulations these have all been provisionally listed for use in foods. Since then the following colours have been removed from the provisional list and are listed for food use, subject to certification: Tartrazine, Erythrosine, Brilliant Blue FCF, Citrus Red No. 2 (oranges only), Orange B (sausage skins only). An entirely new colour, Allura Red AC, was added to this list in 1973.

The non-coal tar colour, which has not been subject to certification and which is provisionally listed for use in food on the basis of prior commercial sale is: carbon black (prepared by the "impingement" or "channel" process). The following colours are permitted for food use exempt from certification: dried algae meal, β-apo-8′-carotenal, caramel, carmine, β-carotene, annatto extract, tagetes meal, paprika and oleoresin, turmeric and oleoresin, saffron, fruit juice, vegetable juice, toasted partially defatted cooked cottonseed flour, titanium dioxide (not more than 1%), carmine, grape skin extract, ultramarine blue (in salt for animal feed only), ferrous gluconate (colouring olives), beet powder, corn endosperm oil (in chicken feed), riboflavin, synthetic iron oxide (cat and dog food only, max. 0.25% of food), carrot oil, canthaxanthin.

All coal tar colours used must be taken from a batch of colour which has been officially certified by the U.S. Food and Drug Administration. The U.S. name of any added colouring matter used in food imports must be stated in the consular declaration by the shippers. The shipper should hold a guarantee that it has been taken from a certified batch.

Artificial colouring only allowed in standardized products if specifically permitted by the standard. Not allowed in meat products (except rendered fat and casings for sausages, etc.). In other foods artificial colouring is permitted subject to mention of "colouring" or the actual name of the colouring in list of ingreds. on label. In addition, the labelling must state that the food contains artificial colouring. The declaration may run "U.S. certified colour added", or "U.S. certified food colour added". The only exceptions to declaration of artificial colouring are butter, cheese, ice cream.

Even though their presence is

declared, colouring matters must not be added to food to make it appear of better quality or of greater value than it really is.

FLAVOURINGS

Natural flavours are defined as the essential oil, oleoresin, essence or extract, hydrolysate, distillate or other reaction products which contain the flavouring constituents derived from a spice, fruit or fruit juice, vegetable or veg, juice, edible yeast, herb, bark, bud, root, leaf or similar plant material, meat, fish, poultry, eggs, dairy products of fermentation products thereof whose significant function in food is flavouring rather than nutritional. Artificial flavour is a flavouring not derived from any of these.

Solvents: ethanol, glycerol, triacetin, propylene glycol, benzyl alcohol, ethyl acetate, butylene glycol. Spice, natural flavour, artificial flavour may be declared as such. Salt and monosodium glutamate must be declr. as such. Artificial smoke flavour must be declr. as such or as artific. flav., no reference to smoking or true smoke flav. Where ref. made to a flavour in label on food by words or pictures must be declr. as follows: if no artif. flav. name of food shall be accompanied by name of flav., e.g. "vanilla" except that if sufficient characterizing ingred. present e.g. strawberries in strawberry shortcake, may state "flavour added" after name of food; if insuff. or no characterizing ingred. name of this ingred. must be followed by word "flavoured", e.g. "strawberry flavoured shortcake", the letters for "flavour added" and "flavoured" must not be less than half the height of the letters in the name of the characterizing ingred. It nat. flav. used to simulate a different flav. in the food must declr. the product from which flav. derived or state "artific. flavoured". If contains artif. flav. name of flav. must accompany name of food preceded by words "artificial" or "artificially flavoured", e.g. "artificially flavoured strawberry shortcake". Letters in "strawberry" min. half those in "shortcake" and letters in "artificially flavoured" min. half height those in "strawberry". If name of characterizing ingred. conspicuous then obligatory statements must also be conspicuous.

An ingredient which is both a spice and a colouring, or both a flavouring and a colouring, must be described as "spice and colouring" or "flavouring and colouring", unless it is given its own specific name.

Artificial flavouring may not be added to foods for which a standard exists unless the addition is permitted by the standard.

In other foods, (except meat products, unless approved by the Chief of the Meat Inspection Division), artificial flavouring is permitted.

PRESERVATIVES

Substances not included in the description "chemical preservative" are common salt, sugars, vinegars, spices or oils extracted from spices, and substances added to food by directly exposing it to wood smoke. For lists of chemical preservatives accepted as safe for use as such in foods, with or without tolerances, see lists, pp. 654-665. Acetic acid, lactic acid and glycerine not mentioned in this group, but permitted as ingredients of foods. The only chemical preservatives (apart from antioxidants—see below) permitted in meat products are sodium nitrate, sodium nitrite, potassium nitrate (saltpetre) or potassium nitrite. The amount of nitrite must not exceed 200 p.p.m., and its presence must be declared. Preservatives are not permitted in standardized foods except where specifically allowed by the standard. Preservatives in foods generally or nitrite in meat products must be declared by name as ingreds. in the list displayed on the label (except where no list of ingreds. is required, as in standardized foods), followed by its function, e.g. "preservative" or "to retard spoilage" etc. When benzoic acid or sod. benzoate is used in meat products, the percentage amount as well as the name of the preservative must be stated.

ANTIOXIDANTS

The substances listed on p. 656 may be used in fats and oils to the limits given, and require declaration by name. Further permitted uses for BHA and BHT are given in the lists of additives for particular purposes on p. 658. Antioxidants present in a food must be declared by name followed by a description of its function, e.g. "to prevent rancidity".

ADDITIVES (GENERAL)

Direct Additives—The substances listed on pp. 654-655 are "generally recognized as safe" for use in foods, subject only to their purity and the needs of good commercial practice. The substances listed on pp. 655-656 are similarly recognized as safe but subject to certain restrictions. The substances listed on pp. 656-657 have been affirmed "generally recognised as safe" and eventually all GRAS foods will be reviewed and their status affirmed. Use of these substances in foods subject to a standard is not permitted unless specifically allowed by the standard.

Substances which had been judged safe for particular purposes, generally with maximum limits, are listed alphabetically on pp. 657-664. Omitted from these lists are substances (such as antibiotics, etc., from use in animal feeds, etc.) for which 'zero tolerances' have been set.

There are also in existence lengthy lists of natural seasonings and flavourings which are safe for their intended use; synthetic flavouring substances generally recognized as safe; and natural flavouring substances used in conjunction with flavours which are permitted for use in alcoholic beverages.

Indirect Additives. Besides the lists of substances fully or provisionally recognized as safe for direct addition to foods similar lengthy lists have been issued by the Food and Drug Administration of substances used in the manufacture of food packaging materials, of adhesives used in food packaging, of linings of food packaging containers, of cotton and cotton fabrics used in dry food packaging, and of rubber and other products used in food processing and handling, and which may migrate from these articles into a food.

IRRADIATION

Sources for purposes of inspection of foods, food packages, and for control of processes may be used as follows: (1) X-ray tubes producing X-radiation from operation of the tube at energy levels of 300kV peak or lower; (2) sealed units producing radiations at energy levels of max. 2.2 million eV from one of following: caesium 137, strontium 90.

Potassium metabisulphite (ditto)
Propyl *p*-hydroxybenzoate (max. 0.1 %)
Sodium benzoate (max. 0.1 %)
Sodium bisulphite (not in meats or in foods recognizable as a source of Vitamin B_1)
Sodium metabisulphite (ditto)
Sodium sulphite (ditto)
Stannous chloride (max. 15 p.p.m., as Sn
Sulphur dioxide (as sodium bisulphite)

ANTIOXIDANTS

Butylated hydroxyanisole	Total content of these antioxidants not to exceed 0.02 % of fat or oil content of a food, including essential (volatile) oil content.
Butylated hydroxytoluene	
Dilauryl thiodipropionate	
Propyl gallate	
Thiodipropionic acid	

Gum guaiac (in edible fats or oils, max. 0.1 %, but equivalent antioxidant activity in mixtures with other antioxidants taken as 0.01 %)

EMULSIFYING AGENTS

Cholic acid	In dried egg whites (max. 0.1 %)
Desoxycholic acid	
Glycocholic acid	
Ox bile extract	
Taurocholic acid (or its sodium salt)	

NUTRIENTS

Copper gluconate (max. 0.005 %)
Cuprous iodide (in table salt as a source of dietary iodine, max. 0.01 %)
Glycine (in animal feeds)*
Methionine (in animal foods)
Methionine hydroxy analogue and its salts (ditto)
Potassium iodide (in table salt as a source of dietary iodine, max. 0.01 %)

SEQUESTRANTS

Isopropyl citrate (max. 0.02 %)
Sodium thiosulphate (in salt, max. 0.1 %)
Stearyl citrate (max. 0.15 %)

MISCELLANEOUS

Caffeine (in cola type beverages, max. 0.02%)
Ethyl formate (as fumigant for cashew nuts, max. 0.0015 %)
Glutamic acid (as salt substitute)
Glutamic acid hydrochloride (ditto)
Hydrogen peroxide (as bleaching agent)
Magnesium stearate (migratory substance from packaging materials when used as stabilizer)
Nitrous oxide (as propellant for certain dairy and vegetable fat toppings in pressurized containers)
Silica aerogel (min. silica content 89.5 %, as component of antifoaming agent)
Triethyl citrate (in egg whites, max. 0.25 %)

CHEWING GUM BASE

NATURAL (COAGULATED OR CONCENTRATED LATICES) OF VEGETABLE ORIGIN

Chicle; chiquibul; crown gum; gutta hang kang; massaranduba balata (and the solvent-free resin extract of massaranduba balata); massaranduba chocolate; nispero; rosidinha (rosadinha); Venezuelan chicle; jelutong; leche caspi (sorva); pendare; perillo; leche de vaca; niger gutta; tunu (tuno); chilte; natural rubber (smoked sheet and latex solids).

OTHER INGREDIENTS

Butadiene-styrene rubber; isobutylene-isoprene copolymer (butyl rubber); paraffin (Fischer-Tropsch process); petroleum wax; polyethylene; polyisobutylene (isobutylene resin); polyvinyl acetate.

PLASTICIZING MATERIALS (SOFTENERS)

Glycerin ester of partially hydrogenated wood rosin; glycerin ester of polymerized rosin; lanolin; rice bran wax; stearic acid; sodium and potassium stearates.

SUBSTANCES AFFIRMED GENERALLY RECOGNISED AS SAFE FOR SPECIFIED USES

Bakers yeast extract	Flavouring agent	5 %
L-Cysteine	Dough strengthener in yeast leavened baked goods and baking mixes	0.009 part total L-cysteine per 100 parts flour in dough
Ethyl alcohol	Antimicrobial agent	2 % on pizza crusts prior to final baking
Locust (carob) bean gum	Stabilizer and thickener	0.15 % in baked goods and baking mixes, 0.25 % in beverages and bev. bases, 0.8 % in cheeses, 0.75 % in gelatins, puddings and fillings, 0.75 % in jams and jellies, 0.5 % in all other foods

Methyl p-hydroxy benzoate	Antimicrobial agent	0.1%
Propyl p-hydroxy benzoate	Antimicrobial agent	0.1%
Sorbitol	Anti-caking agent, curing agent, drying agent, emulsifier, firming agent, flavouring agent, formulation aid, humectant, lubricant, nutritive sweetener, sequestrant, stabiliser and thickener, surface finishing agent, texturizer (declr. laxative effect if daily intake may be 50 g)	99% in hard candy, and cough drops, 75% in chewing gum, 98% in soft candy, 30% in non-stand. jams and jellies, 30% in baked goods and baking mixes, 17% in frozen dairy desserts, 12% in all other foods

ADDITIVES PERMITTED BY REGULATION

(Title 21, sub-part D)

Product	*Specified Uses or Restrictions*	*Limits*
Acetic anhydride	Food starch modifier	2.5%
Acetone peroxides	Maturing, bleaching agents (flour) Maturing agent (dough)	Suff. to give required effect
Acetone residues	Solvent in spice oleoresins	30 p.p.m.
Acetylated mono-glycerides	—	Suff. for required effect
Acrolein	Food starch modifier	0.6%
Acrylamide-sodium acrylate resin	Boiler water additive	—
Adipic anhydride	Food starch modifier	0.12% with 2.5% acetic anhydride
Aluminium nicotinate	Source of niacin in dietary foods	—
Aluminium phosphide	Fumigant in processed foods	1000 p.p.m.
Aluminium persulphate	Food starch modifier	0.075%
Ammonium alginate	Boiler water additive	—
Amyloglucosidase enzyme product	Degrading gelatinized starch into constituent sugars in productn. of distilled spirits and vinegar	0.1% of starch the
Arabinogalactan	Emulsifier and stabilizer in essentials oils, non-nutritive sweeteners, flavour bases, in microcapsules for flavouring oils, non-standard dressings, pudding mixes	—
Aspartame (aspartyl phenyl alanine)	Sweetening agent in food: dry, free flowing sugar substitutes for table use (not to include use in cooking) in package units not to exceed the sweetening equivalent of 2 teaspoonsfuls of sugar sugar substitute tablets for sweetening hot beverages, cold breakfast cereals chewing gum base dry bases for: beverages, instant coffee and tea, gelatins, puddings and fillings, dairy product analogue toppings, as a flavour enhancer in chewing gum.	—
Azodicarbonamide	Ageing and bleaching agent for cereal flour	45 p.p.m.
Bacterial catalase	Removing H_2O_2 in manuf. of cheese	—
Bakers yeast glycan	Emulsifier, stabilizer and thickener, texturizer	5% in salad dressings only
Bakers yeast protein	Nutrient supplement	—
Boiler water additives	See specific compounds.	
Bromide, inorganic	Fumigant: in or on dried figs on dried eggs, processed herbs and spices on parmesan or roquefort cheese on other processed foods conc. tomato prods.	250 p.p.m. 400 p.p.m. 325 p.p.m. 125 p.p.m. 250 p.p.m.

	with disod. EDTA in sandwich spread	100 p.p.m.
	with disod. EDTA in non-standardized dressings, sauces	75 p.p.m.
Calcium lactobionate	Dried pudding mixes	Sufficient
Calcium pantothenate	In dietary foods	—
Calcium silicate	Anticaking agent	2%
	in baking powder	5%
Calcium stearoyl-2-lactylate	Dough conditioner in yeast-leavened bakery products	0.5/100 parts of flour
	conditioning agent in dehydrated potatoes	5000 p.p.m.
	whipping agent in dried egg white	5000 p.p.m.
	whipping agent in liquid, frozen egg white	500 p.p.m.
	whipped veg. oil topping	3000 p.p.m.
Candida lipolytica	Fermentation production of citric acid	—
Carrageenan (and salts)	Emulsifier, stabilizer, thickener, except in standardized foods not providing for such use	—
Castor oil	Release agent in hard candy	500 p.p.m.
	Coating on vitamin and mineral tablets	—
Chlorine	Food starch modifier	0.055 lb. chlorine/lb. dry starch
Chloropentafluorethane	Propellant in aerosols	—
Cobalt sulphate	Boiler water additive	—
Combustion product gas	O_2 removal in process. and packag. beverages and other food exc. fresh meat	—
Cottonseed flour, partially defatted, cooked	None	450 p.p.m. free gossypol
Coumarone-indene resin	Protective coating for citrus fruits	200 p.p.m.
Cyclohexylamine	Boiler water additive (not in contact with milk)	10 p.p.m. in steam

Product	*Specified Uses or Restrictions*	*Limits*
Dichlorodifluoromethane	Food freezant, in direct contact with food	—
Diethylaminoethanol	Boiler water additive (not in contact with milk)	15 p.p.m.
Dioctyl sodium sulphosuccinate	Wetting agent in fumaric acid-containing beverages	10 p.p.m.
	Wetting agent in fumaric acid-containing gelatine desserts	15 p.p.m.
	Solubilizing agent on stabilizers and thickeners	5000 p.p.m.
	Emulsifying agent for cocoa fat in non-carbonated beverages	25 p.p.m.
	Dispersing agent in cocoa for manufacturing	4000 p.p.m.
	In cocoa for dry beverage base	75 p.p.m. (in beverage)
Dimethylpolysiloxane	Defoaming agent	10 p.p.m. (other levels for specified foods)
Disodium EDTA	With iron salts as stabilizer for vit B_{12} in liquid multivitamin preparations	150 p.p.m.
	For colour retention in frozen white potatoes	100 p.p.m.
	preservative in sandwich spread	100 p.p.m.
	preservative in sauces, non-stand. dressing	75 p.p.m.
	preservative in canned kidney beans	165 p.p.m.
	canned strawberry pie filling	500 p.p.m.
	with calc. disod. EDTA in sandwich spread	100 p.p.m.
	with calc. disod. EDTA in sauces, non-stand. dressings	75 p.p.m.
Disodium guanylate	Flavouring adjuvant	—
Disodium inosinate	Flavouring adjuvant	—
Electrolytic diaphragm process for salt	Production of food grade sod. chloride	Imparts no impurities to the salt.
Epichlorhydrin	Food starch modifier	0·1%, followed by propylene oxide 25%, resid. propylene chlorhydrin 5 p.p.m.
Epichlorhydrin	Food starch modifier	0·3%, 0·1%, with propylene oxide 0·1%, followed by propylene oxide max. 25% (max. 5 p.p.m. propylene chlorhydrin in the starch)
Ethoxyquin	Antioxidant in paprika and chili	100 p.p.m.
Ethyl cellulose	Binder, filler, or component of coatings for vitamin and mineral tablets, fixative in flavouring compounds	
Ethyl formate	Bulk and package fumigant in or on dried rasins and dried Zante currants	250 p.p.m.
Ethylene dichloride	Solvent in spice oleoresins	30 p.p.m.
Ethylene oxide	Fumigant in ground spices and other processed natural seasoning (salt free), black walnut meats, copra	50 p.p.m.
Ethylene oxide polymer	Foam stabilizer in fermented malt beverages	300 p.p.m.
Ethylene oxide and propylene oxide copolymer	Wetting agent for fumaric acid, as for dioctyl sodium sulphosuccinate	—
	Scald baths for poultry defeathering	0.05%
	Dough conditioner in yeast-leavened bakery products	0.05% of flour
	Flavouring concentrates	Not more than wt. of flav. oils
Fatty acids (Chick oedema and other toxic factors free)	Lubricant, binder, defoamer, and component of other additives	—
Fatty acids, lactylic esters	Emulsifiers, plasticizers in certain bakery products, dehydrated fruit and veg. juices, frozen desserts, liquid shortening, milk and cream substitutes	—
Fatty acids, salts (Alum., Calc., Magn., Potass., Sod.)	Binder, emulsifier, anti-caking agent	—
Fatty alcohols, synthetic	None	—
Fish (whole) Protein concentrate	Protein supplement in food for children	20 g./day
	Protein supplement in manuf. food	8 p.p.m. max. Fl. in finished food
Flavours, natural	List of substances specified	—
Flavours, synthetic and adjuvants	List of substances specified	—
Food starch, modified	Thickener and stabilizer (for treatments, see under different compounds)	—

Product	*Specified Uses or Restrictions*	*Limits*
Folic acid (folacin)	Source of vitamin	0.4 mg. max. daily intake (0.1 infants, 0.3 children under 4, 0.4 adults, 0.8 pregnant, lactating women)
Fumaric acid and salts	None	No restriction
Furcelleran (and salts)	Emulsifier, stabilizer, thickener, etc., in standardized foods not providing for such use	—
Galactosidase and *Mortierella vinaceae* var. *raffinoseutilizer*	Production of sugar from sugar beet	No enzyme or mycelial residues in the sugar
Glycerine synthetic	None	Suff. for required effect
Glyceryl ester of wood rosin	Adjust. density of citrus oils in beverages	100 p.p.m.
Glyceryl lacto esters of fatty acids	Emulsifiers and plasticizers in foods	Suff. for required effect
Glycine	Masking bitter aftertaste of saccharin in beverages and beverage bases	0.2% max. in finished beverage
	Stabiliser in mono- and diglycerides prep. by glycerolysis of edible fats or oils	0.02% max. of the mono- and diglyceride
Hexane	Solvent in spice oleoresins	25 p.p.m.
Hop extract, modified	Flavouring agent in brewing beer	—
Hydrazine	Boiler water additive	Zero in steam
Hydrochloric acid	Food starch modifier	—
Hydrogen cyanide	Fumigant: in cocoa	200 p.p.m.
	in cereal flours	125 p.p.m.
	cereals cooked before eating	90 p.p.m.
	uncooked ham, bacon, sausage	50 p.p.m.
Hydroxylated lecithin	Emulsifier except in standardized foods not providing for such use	—
Hydroxypropyl cellulose	Emulsifier, stabilizer etc. in food	—
Hydroxypropyl methyl cellulose	Emulsifier film former, protective colloid, stabilizer, suspending agent, thickener, except in confectionery and standardized foods not providing for such use	—
Kelp	Source of iodine	As for potass. iodide
Ion exchange resins and membranes	None	—
Iron ammonium citrate	Anticaking agent in salt	25 p.p.m.
Iron-choline citrate complex	Foods for special dietary use	—
Lactylated fatty acid esters of glycerol and propylene glycol	Emulsifier, plasticizer, surface active agent	Suff. for required effect
Lignosulphonic acid	Boiler water additive	—
Maleic hydrazide	In potato crisps	160 p.p.m.
Methyl alcohol residues	Solvent in spice oleoresins	50 p.p.m.
Methyl ethyl cellulose	Aerating, emulsifying, and foaming agent	Suff. for required effect
Methyl formate	Bulk and package fumigant: in or on dried raisins and dried Zante currants	250 p.p.m.
Methyl glucoside-coconut oil ester	Crystallization aid for sucrose and dextrose	Suff. for required effect
Methylene chloride residues	Solvent in spice oleoresins	30 p.p.m.
	solvent in decaffeinated coffee	10 p.p.m.
Mineral oil (white)	Release agent, binder in tablets of flavours, spices, nutrients, etc.	6000 p.p.m.
	Float on fermentation liquids, incl. pickles	—
	Release agent in bakery products, yeast	1500 p.p.m.
	Release agent in dried fruit and vegetables	200 p.p.m.
	Release agent in egg white solids	1000 p.p.m.
	Release, sealing and polishing agent in confectionery	2,000 p.p.m.
	Coating for fresh fruit and vegetables	—
	Component of hot-melt coating for frozen meat	950 p.p.m.
	Petrolatum Lubricant with food contact	10 p.p.m.
	Defoamer in wash water for sliced potatoes, max. 0.008% of water	—
	In moulding starch for confectionery	3000 p.p.m.
	Antidust agent in sorbic acid	2500 p.p.m.
Molecular sieve resins	Purification of partially delactosed whey	—
Monobutyl ethers of poly ethylene-polypropylene glycol	Boiler water additive	Min. molec. wt. 1500
Monoglyceride citrate	Synergist, solubilizer for antioxidants in oils and fats	200 p.p.m. combined wt. of fat and additive

	In coatings for fruit and vegetables	—
Nicotinamide-ascorbic acid complex	Source of ascorbic acid and nicotinamide in multivitamin preparations	—
Octadecylamine	Boiler water additive (not in contact with milk)	3 p.p.m. in steam
Octafluorocyclobutane	Propellant or aerating agent in foamed or sprayed foods except for standardized foods not providing for such use, alone or with CO_2 or nitrous oxide or propane	—
1-Octenyl succinic anhydride	Food starch modifier	3%, 2% with 2% alum. sulphate
n-Octyl alcohol	In microcapsules for flavouring oils	—
Oleic acid from tall oil fatty acids	Lubricant, binder, defoaming agent	—
Oxygen, active	Food starch modifier	0.45%
Oxystearin	Crystallization inhibitor in vegetable oils release agent in shortenings	1250 p.p.m. combined wt. of oil and additive
D-Pantothenamide	Foods for special dietary use	Suff. for required effect
Paraformaldehyde	In maple syrup from treated trees	2 p.p.m. formaldehyde
Petrolatum	In bakery products, with mineral oil	1500 p.p.m.
	In confectionery as release, polishing agent	2000 p p.m.
	As release agent in dehydr. fruit and veg.	200 p.p.m.
	As release agent in egg white solids	1000 p.p.m.
	Protective coating on raw fruit and veg.	Good mfg practice
Petroleum wax, synthetic	Chewing gum base	—
	Protective coating on cheese and raw fruit	—
	Defoamer in food	—
Phosphorus oxychloride	Food starch modifier	0.1%
Polyethylene glycol	Coating, binding, plasticizing agent and/or lubricant in tablets for food	Suff. for required effect
	Flavour improver and bodying agent in non-nutrit. sweeteners	,,
	Adjuvant for dispersing vitamin or mineral prep'ns.	,,
	Coating on sod. nitrite	
	N.B. *Not* in milk or prep'ns for milk	,,
Polyglycerol esters of fatty acids	Emulsifiers in food	Suff. for required effect
	In whipped topping (esters of butter oil fatty acids)	Suff. for required effect
	Cloud inhibitor in salad oils	—
Polyoxyethylene glycol	Defoaming agent. Boiler water additive	Min. molec. wt. 1000
Polyoxyethylene glycol, monobutyl esters of	Boiler water additive	Min. molec. wt. 1500
Polyoxyethylene (20) mono- and diglycerides of fatty acids (in non-standardised foods and in standardised foods where the standards permits)	Dough conditioner in yeast-leavened bakery products	0.5% of flour used
	Emulsifier in cakes and cake mixes	0.5% of dry ingreds.
	Emulsifier in whipped veg. oil toppings and topping mixes	0.45% of finished topping
	Emulsifier in icings and icing mixes	0.5% of finished icing
	Emulsifier in frozen desserts	0.2% of finished desserts
	Emulsifier in solid-state edible veg. fat-water emulsions for use as milk or cream in coffee	0.4% of finished veg. fat-water emulsion
Polyoxyethylene (20) sorbitan mono-oleate. See Polysorbate 80.		
Polyoxyethylene (20) sorbitan monostearate. See Polysorbate 60.		
Polyoxyethylene (20) sorbitan tristearate	See Polysorbate 65	
Polyoxypropylene glycol.	Boiler water additive	Min. molec. wt. 1000
Polyoxypropylene glycol, monobutyl esters of	Boiler water additive	Min. molec. wt. 1500

Product	*Specified Uses or Restrictions*	*Limits*
Polysorbate 60	Emulsifier in chocolate flavoured syrups	0.05% max. in finished product
	Emulsifier in whipped vegetable oil topping, alone or with 2700 p.p.m. sorbitan monostearate (7700 p.p.m. together) or Polysorbate 65, Polysorbate 80	4000 p.p.m.
	Emulsifier in cakes and cake mixes, alone	4600 p.p.m.
	Emulsifier in cakes and cake mixes, with 6100 p.p.m. sorb. monostearate and/or 3200 p.p.m. Polysorbate 65	4600 p.p.m. (total 6600 p.p.m.)
	Emulsifier in cake icing and filling, alone or with Polysorbate 65	4600 p.p.m.
	with sorbitan monostearate	7000 p.p.m. (total 10000 p.p.m.)
	Emulsifier in non-stand. confect. coatings or standardized cocoa products, alone	5000 p.p.m.
	Emulsifier in non-stand. confect. coatings with 10000 p.p.m. sorb. monostearate	5000 p.p.m. (total 10000 p.p.m.)
	Emulsifier in non-stand. dressings	3000 p.p.m.
	For greater opacity in sugar-type confect. coatings	2000 p.p.m.
	Emulsifiers in shortenings for unstand. foods, alone or with Polysorbate 80	10000 p.p.m.
	Emulsifier in milk or cream substitutes, alone or with Polysorbate 65 or sorbitan monstearate	4000 p.p.m.
	Foaming agent in non-alcoholic beverages, alone	45000 p.p.m.
	Dough conditioner in yeast leavened bakery products	5000 p.p.m.
	Dispersing agent in artif. sweetened gelatine desserts	5000 p.p.m.
	Emulsifier in chocolate flavoured syrups	500 p.p.m.
Polysorbate 65	Emulsifier in cakes, alone	3200 p.p.m.
	Emulsifier in cakes, with 4600 p.p.m. Polysorbate 60 and/or with 6100 p.p.m. sorbitan monostearate	3200 p.p.m. (total 6600 p.p.m.)
	Emulsifier in whipped vegetable oil topping alone or with sorbitan monostearate or Polysorbate 60 or Polysorbate 80 (toppings only) and in milk or cream substitutes	4000 p.p.m.
	Emulsifier in frozen desserts, alone or with Polysorbate 60	1000 p.p.m.
	Emulsifier in cake icings and fillings, alone or with 7000 p.p.m. sorbitan monostearate or 4600 p.p.m. Polysorbate 60	3200 p.p.m. (1% total)
Polysorbate 80	Defoaming agent in creaming mixture for cottage cheese and low fat cottage cheese	0·008% max. of finished product
	Solubilizer and dispersing agent in dill oil for canned spiced green beans	30 p.p.m.
	Emulsifier in frozen desserts, alone or with Poly (20) sorbitan tristearate	1000 p.p.m.
	Emulsifier in shortenings for unstand. foods, alone or with Polysorbate 60	10000 p.p.m.
	Emulsifier in whipped vegetable oil topping, alone or with sorbitan monostearate, Polysorbate 60, Polysorbate 65	4000 p.p.m. total
	Dispersing agent in gelatine dessert mixes	820 p.p.m.
	Wetting agent in scald water for poultry defeathering	175 p.p.m.
	Solubilizer and dispersing agent in vitamin-mineral preparations	various levels
	In yeast defoamer	40000 p.p.m.
	In yeast	4 p.p.m.
	Surfactant in NaCl production	10 p.p.m.
	In special dietary foods as emulsifier for edible oils	Ingestion not to exceed 360 mg. per day
Polyvinylpolypyrrolidone	Clarifying agent in beer	10 p.p.m.
	in vinegar	40 p.p.m.
	in wine	60 p.p.m.
	Tableting adjuvant for flavour concentrates, non-nutritive sweeteners, vitamin and mineral concentrates	—
	As stabilizer in above	—
Potassium bromate	Malting barley	75 p.p.m.

Product	*Specified Uses or Restrictions*	*Limits*
Potassium carbonate	Boiler water additive	—
	Solubilizer and dispersing agent in pickles	500 p.p.m.
Potassium iodide	Source of iodine	0.225 mg. I max. daily intake (0.045 infants, 0.105 children under 4, 0.225 adults 0.300 pregnant, lactating women)
Potassium nitrate*	Cod roe	200 p.p.m.
Potassium permanganate	Food starch modifier	0.2% (residues of Mn not to exceed 50 p.p.m.)
*iso*Propyl alcohol	Solvent in spice oleoresins	50 p.p.m.
	Solvent in lemon oil	6 p.p.m.
	Solvent in hop extract	2.0%
Propylene glycol alginate	Emulsifier, stabilizer, thickener in frozen desserts	5000 p.p.m.
	Emulsifier, stabilizer, thickener in foods except for standardized foods not providing for such use	—
Propylene glycol mono- and diesters of fats and fatty acids	None	Suff. for required effect
Propylene oxide	Food starch modifier	25% (max. 5 p.p.m. propylene chlorhydrin)
	Fumigant for cocoa, gums, nuts (exc. peanuts) spices, starches	300 p.p.m.
	Package fumigant on dried prunes and glace fruit	700 p.p.m. (propylene glycol)
Quinine	Flavour in carbonated beverages	83 p.p.m.
Ricebran wax	Coating for confectionery, fresh fruits, vegetables	50 p.p.m.
	Plasticizer in chewing gum	2500 p.p.m.
Sassafras, safrole free extracts	Flavouring in foods	—
Silicon dioxide	Anticaking agent in foods	20000 p.p.m.
	in microcapsules for flavouring oils	—
Sodium chlorite	Food starch modifier	0.5%
Sodium CMC	Boiler water additive	—
Sodium hydroxide	Food starch modifier	1.0%
Sodium lauryl sulphate	Emulsifier in egg white products: in egg white solids	1000 p.p.m.
	in frozen and liquid egg whites	125 p.p.m.
	Surfactant in fumaric acid-acidulated beverage base or fruit juice	25 p.p.m.
	Whipping agent in marshmallows	5000 p.p.m. of the gelatine
Sodium metabisulphite	Boiler water additive	—
Sodium methyl sulphate	Pectin	1000 p.p.m.
Sodium nitrate*	Preservative and colour fixative in smoked, cured salmon, and in meat-curing preparations for home curing, alone, or with sod. nitrite	Sod. nitrate 500 p.p.m. Sod. nitrite 200 p.p.m.
Sodium nitrite*	Colour fixative in smoked cured tuna	10 p.p.m.
	Preservative and colour fixative in smoked cured salmon and in meat-curing preparations for home-curing, alone or with sod. nitrate;	Sod. nitrite 200 p.p.m. Sod. nitrate 500 p.p.m.
	in smoked chubb (sod. nitrite)	100—200 p.p.m. of loin muscle
Sodium salts (specified)	Boiler water additives	—
Sodium stearoyl-2-lactylate	Emulsifier, dough conditioner or whipping agent in icings, puddings, baked products, prepared mixes	Suff. for required effec.
Sodium stearyl fumarate	Dough conditioner	5000 p.p.m. (on flour)
	Dehydrated potatoes conditioner	10000 p.p.m.
	Stabilizer in non-yeast leavened bakery products	10000 p.p.m.
	Processed cereals for cooking conditioner	10000 p.p.m.
	Starch or flour-thickened foods conditioner	2000 p.p.m.
Sodium trimetaphosphate and tripolyphosphate	Food starch modifier	0.4% phosphate calct as phosphorus

*proposed for removal

Sorbitan monostearate	Emulsifier for whipped vegetable oil topping. alone or with Polysorbate 60, 65 or 80	4000 p.p.m.
	Emulsifier in cakes and cake mixes, alone or	6100 p.p.m.
	with 4600 p.p.m. Polysorbate 60 and/or 3200 p.p.m. Polysorbate 65	6100 p.p.m. to 6600 p.p.m.
	Emulsifier in non-stand. confect. coatings or standardized cocoa products, alone or with 5000 p.p.m. Polysorbate 60	10000 p.p.m. total
	Emulsifier in cake icing, filling,	7000 p.p.m. total
	with Polysorbate 65	3200 p.p.m.
	with Polysorbate 60	4600 p.p.m.
	Emulsifier in milk and cream substitutes, alone or with Polysorbate 60 or 65	4000 p.p.m.
	Rehydration aid in active dry yeast, alone	10000 p.p.m.
Sperm oil, hydrogenated	Release agent or lubricant in bakery pans	—
Stearyl-monoglyceridyl citrate	Emulsion stabilizer for shortenings	—
Succinic acid 2, 2-dimethyl-hydrazide	Plant regulator in plums	135 p.p.m. in dried prunes
Succinic anhydride	Food starch modifier	4%
Succinylated gelatin	in microcapsules for certain flavouring oils	15% wt. of microcapsule and flavouring oil. Succinic acid content of gelatin, 45–5.5%.
Succinylated monoglycerides	Emulsifier in shortening	30000 p.p.m.
	Dough conditioner	5000 p.p.m. (on flour)
Succistearin	Emulsifier in shortenings and edible oils for cakes, fillings, icings, toppings, pastries	—
Sugar beet extract	As flavour base	—
Sulphur dioxide	Food starch modifier	500 p.p.m.
Sulphuric acid	Food starch modifier	—
Tannin	Boiler water additive	—
Tertiarybutylhydroquinone	Antioxidant in foods	0.02% max. alone or with BHA and/or BHT
Tetrasodium EDTA	Boiler water additive	—
Terpene resin	As moisture barrier on soft gelatine capsules	700 p.p.m.
	Ascorbic acid and its salts (powders)	70000 p.p.m.
Trichloroethylene	Solvent in spice oleoresins	30 p.p.m.
	in decaffeinated ground coffee	25 p.p.m.
	in decaf. sol. (instant) coffee extract	10 p.p.m.
2, 4, 5-Trihydroxybutyrophenone	Antioxidant, alone or with others	0.02% of oil or fat content of food
Trisodium nitrilotriacetate	Boiler water additive (not in contact with milk)	5 p.p.m.
Vinyl acetate	Food starch modifier	(to provide no more than 2.5% acetyl groups)
Xanthan gum	Stabilizer, emulsifier, etc, in food	—
Xylitol	Foods for special dietary uses	—
Yeast-malt sprout extract	Flavour enhancer	6% max. 5'-nucleotides
Yeasts, dried	None	(folic acid max. 0.004%)
Yellow prussiate of soda	Anti-caking agent in fine salt	13 p.p.m.
	Adjuvant for dendritic salt crystals	13 p.p.m.

INTERIM FOOD ADDITIVE REGULATIONS

Brominated veg. oils	Flavouring oils for fruit flavoured beverages (interim tolerance)	15 p.p.m.
Mannitol	Anti-caking agent, formulation aid, firming agent, flavouring agent, lubricant, release agent, nutritive sweetener, processing aid, stabilizer and thickener, surface finishing agent, texturiser (declr. laxative effect if daily intake may be 20 g)	98% in pressed mints; 5% in all other hard candy and cough drops; 31% in chewing gum; 40% in soft candy; 8% in confections and frostings; 15% in non-stand. jams and jellies; less than 2.5% in all other foods

U.S.A. (*FEDERAL*) (*cont.*)

Saccharin and its ammon. calc. and sod. salts (permitted until further report on safety produced)	Special dietary foods: Beverages and fruit juice containing drinks	12 mg/fl oz alone
	Sugar substitutes for cooking or table use	20 mg/serving equiv. 1 teaspoon sugar
	Processed foods	30 mg/serving
	To reduce bulk and enhance flavour in chewable vitamin and/or mineral tablets	—
	To retain flavour and physical properties of chewing gum	—
	To enhance flavour of flavour chips in non-standardised bakery products	—
Spice mixes	May not mix nitrates or nitrites with seasonings, flavours etc. which are or contain a source of secondary or tertiary amines such as hydrolysed vegetable protein, soya products, spice extracts.	—

PROHIBITED FOOD ADDITIVE REGULATIONS

This list is not exclusive. The following are on this prohibited list:

Calmus oil
Cobaltous salts, acetate, chloride, sulphate
Coumarin
Cyclamate and calc., sod. magnes., potass. salts
Diethylpyrocarbonate
Dulcin
Flectrol H (1,2-dihydro-2,2,4-trimethylquinoline polymerised)
Mercaptoimidazoline and 2-mercaptoimidazoline
4, 4'-Methylenbis (2-chloroaniline)
Monochloroacetic acid
Nordihydroguaiaretic acid
P-4000 (5-nitro-2-n-propoxyaniline)
Safrole, oil of sassafras, isosafrole, dihydrosafrole
Thiourea

U.S.A. (FEDERAL) (cont.)

No food to be exposed to the radiation source in excess of 15 min. There are also regulations in force for low dose γ-radiation for wheat, wheat flour and white potatoes; u.-v. radiation for food and potable water; low dose electron beam radiation for wheat and wheat flour; and radiofrequency radiation (incl. microwave) for heating foods.

LABELLING

All consumer packages introduced into commerce have to comply with the Fair Packaging and Labelling Act, although there are certain exemptions laid down and it is possible to apply for other exemptions. The *basic* requirements are given below but should not be regarded as comprehensive. The principal display panel of the label must contain a statement of the identity of the commodity. If the product is an imitation of another food the word "imitation" must precede the name of the product. The form of the commodity (sliced, etc.) must accompany the name unless it is shown through the container or by vignette. The are of the principal display panel must be (*a*) for a rectangular package where one entire side can be considered to be the principal display panel side, the product of the height times the width of that side; (*b*) for a cylindrical or nearly cylindrical container 40% of the product of the height of the container times the circumference; (*c*) for an otherwise shaped container 40% of the total surface unless such container has an obvious principal display panel. The principal display panel must include a declaration of net quantity starting with all ounces for weights of 1–4 lb. and one pint to one gallon, followed by a statement in parentheses of appropriate whole units with remainders in fractions or ounces, e.g. "Net wt. 6 oz.", 6 fl. oz.", "Net wt. 24 oz. (1lb. 8 oz.)" or "Net wt. 24 oz. (1½lb.)" or "Net wt. 24 oz. (1.5 lb.)". Numerical count is also permissible. This declaration must be within the bottom 30% area of the label. There must be a clear area both above and below the quantity declaration equal to the height of the type size used for the quantity declaration. (Different type sizes are laid down to correspond to the size of the label.) Other obligatory declarations may be given in the information panel which is that part of the label immediately contiguous and to the right of the principal display panel (with certain exceptions). These are: the name and place of business of the manufacturer, packer or distributor; ingredients for standardized foods must be declared as required by the Standard of Identity; for non-standardized products, all ingredients must be declared in their decreasing order of predominance; number of servings (optional); nutrition labelling (see below); statements on dietary properties and foods for special dietary uses.

All labels for meat products wholly or partly from the flesh of sheep, cattle, pigs or goats must be submitted for approval to the Meat Inspection Division, Bureau of Animal Industry, Agricultural Research Administration, Washington, D.C. It is advisable to submit labels for other products to the Food and Drug Administration, Washington, D.C., for comment; they should be accompanied by a complete quantitative statement of ingreds.

NUTRITION LABELLING

Optional regulations regarding declaration of nutritional value of a foodstuff on all labels used after 31st Dec., 1974. Very detailed requirements regarding cholesterol, vitamins, minerals, calories, protein, carbohydrates, fat, fatty acids, polyunsaturated fatty acids, etc., to be given in relation to average or usual serving. If any nutrient added to a product or if any nutrition claim or information given on label or in advertisement then full nutrition labelling mandatory. May not claim that food is significant source of a nutrient unless contains min. 10% U.S. R.D.A. per serving. Special labelling restrictions regarding claims for dietary properties on foods for special dietary use also laid down.

PACKAGES

Packages or containers which are so made, shaped, or filled as to be misleading may result in consignments being held to be misbranded. The most common cause of deception of this kind is slack filling. This may be due to the use of excessive brine, oil, or other packing medium, or there may be excessive empty space in the container. Other forms of misleading packing are: —

Bottles or jars of excessively thick glass, or with indented panels, long necks, indented bottoms, or irregular shapes. Individual cartons used to enclose such glassware may increase the deception.

Containers with false bottoms, indented bottoms, or raised covers.

Outside cartons too large for the inside container.

Boxes with extension edges wrapped in transparent cellulose paper.

Unnecessary use of partitions and dividers, paper wads, etc.

Loose packing, such as individually wrapped sweets with long twisted ends, etc., or fewer pieces in a lower layer than in the top layer.

Deceptive face dimensions, where the width and length of the package are too large in relation to the depth, as with an exceptionally thin bar of chocolate.

HYGIENE

Foods must not be prepared under unhygienic conditions, or be contaminated with "filth", and imports are examined for evidence of failure to comply with these requirements.

AMERICA, SOUTH

ARGENTINA

BEVERAGES, NON-ALCOHOLIC

Fruit or veg. juices, milk, whey, natural extracts or essences; alcohol, max. 0.5%; clear, no sediment, fruit juice drinks may be opalescent. Drinks with less than 10% fruit juice or pulp must be called "with flavour of . . ." (name fruit). If artific. flavours used drink must be called artificial in letters min. 2 mm high. If word "orange" in name of drink, min. 10% juice, may add natural essences. Optional: CO_2, min. 1.5 atmos at 21°C; sucrose, dextrose, invert sugar, citric, tartaric, phosphoric, gluconic, lactic acids;

ARGENTINA (cont.)

permitted colours (see Tables, pp. 806–812); brominated veg. oils, max. 0.05 g/100 ml (Br max. 35%); in tonic water, quinine, max. 20–110 mg/l; in cola-type drinks, caffeine, max. 20 mg/100 ml. Preservatives: in carbonated drinks: benzoic or sorbic acids or both, max. 600 p.p.m.; in non-carbonated drinks, benzoic or sorbic acids or both, max. 800 p.p.m.; SO_2 only as carry-over from fruit juice.

COCOA, CHOCOLATE, AND CONFECTIONERY

Cocoa Mass. Fat, 45–48%; moisture, max. 8%; cocoa starch, max. 8.5%; total ash, max. 4%; water-insol. ash, max. 3%; cocoa alkaloids, max. 1–4%; crude fibre, max. 3%.

Cocoa Powder. Fat, min. 8%. Alkalinity of ash, max. 3.75% (as K_2CO_3) of fat-free dry matter; moisture, max. 9%.

Soluble Cocoa. Total ash, max. 15.5%; alkalinity of ash, less than 6.5%; both on fat-free dry matter.

Sweet Cocoa. Sugar (sucrose, dextrose, invert sugar), max. 68%.

Solubilized Sweetened Cocoa. Soluble cocoa with sucrose, dextrose, invert sugar, max. 68%. Optional: permitted flavours.

Chocolate. Cocoa mass, min. 32%; sucrose, dextrose, invert sugar and flavourings, max. 68%; moisture, max. 3%; total ash, max. 2.5%; cocoa butter, min. 16%. Optional: added lecithin, max. 0.5%; flavours, vanillin, ethyl vanillin; cocoa butter. No fats other than cocoa butter.

Milk Chocolate. Milk solids, min. 15%; milk fat, min. 3%.

Chocolate Fondant. Cocoa butter, min. 30%.

Chocolate Couverture. Cocoa butter, min. 22.5%; sucrose, dextrose, invert sugar, max. 50%. Optional: lecithin as for chocolate; GMS 2% of fat.

Milk Chocolate Couverture. Cocoa butter, min. 22.5%; total milk solids, min. 12%; milk fat, min. 2.5%; sucrose, dextrose, invert sugar, max. 50%.

White Chocolate. Cocoa butter, min. 25%; milk solids, min. 25%. Optional: sucrose, dextrose, invert sugar flavours. Other fats prohbd.

Sugar Confectionery. Sucrose, glucose, permitted organic acids, natural and artific. flavours, colours (see Tables, pp. 806–812), other foodstuffs. Definitions of a number of types of sugar confy. laid down, inc. chewing gum.

COFFEE PRODUCTS

Instant Coffee. Moisture, max. 3.5%; caffeine, min. 1.50%; no artific. flavours.

Decaffeinated Coffee. Caffeine, max. 0.20% (if called "coffee without caffeine", max. 0.10%).

FISH PRODUCTS

Fish and Shellfish Pastes. Wheat flour, cornflour, potato flour, max. 20%; salt, max. 18%.

FLOUR AND FLOUR PRODUCTS

Alimentary Pastes. Water, max. 14%; acidity, max. 0.45% (as lactic acid). Colouring permitted. On boiling with water must not disintegrate or colour the water. *Egg products:* min. 0.04% cholesterol (of dry matter); colours—saffron or beta carotene.

FRUIT AND VEGETABLE PRODUCTS

Tomato Conserves (general). Howard mould count (on material reduced to dry matter content of 8.37—9.37%), majority of fields must not be positive; insol. ash, max. 0.5%; starch, max. 6% of dry matter; ratio of total dry matter to organic matter, min. 1.2, max. 1.4.

Tomato Juice. Added salt, max. 1%.

Tomato Purée. Salt-free dry matter, min. 8.37%, max. 11.99%. Added salt, max. 5%.

Tomato Sauce. Salt-free dry matter, min. 12%, max. 15.99%. Added salt, max. 5%.

Tomato Extract, Concentrate. Added salt, max. 5%. Salt-free dry matter, (declar. of %): "single", 16—28%; "double", 28—36%; "triple", over 36%. Dried extract: water, less than 20%; added salt, max. 10%.

Tomato Ketchup. Dry matter, min. 35%. No added colour.

Jams, Jellies. Sol. solids, min. 65%. pH 2.8—4.2. Optional: sucrose, dextrose, invert sugar, honey; addition of juices of fruits rich in pectin, in necessary amounts only; citric, malic or tartaric acid in amount necessary for flavour or to reduce *p*H to min. reqd. for jellying (3.4); permitted colours if specially authorized in particular cases; flavours (declar.).

GELATINE PRODUCTS

Table Jellies. Edible gelatine, sugar, citric, malic or tartaric acid, harmless flav., permitted colours.

INFANT FOODS

Labelling (of foods for infants up to two years): qual. and quant. declarn of principal ingreds. inc. calc., vitamins C and D; directions for use if to be diluted and % ingreds. in diluted food; statement of acidity (as lactic acid); instruction to consult doctor.

DIETETIC FOODS

Detailed standards for foods with modified energy value, fortified foods, low carbohydrate, low gluten, low sodium, sodium-free foods. Artificial sweeteners: sod. and calc. saccharin, max. daily intake 5 mg/kg body weight; sod. and calc. cyclamate, max. daily intake 50 mg/kg body weight.

MEAT PRODUCTS

General. Permitted additions (no declar.): milk, egg, spices, salt, saltpetre (max. 300 p.p.m.), sod. nitrite (residual, max. 200 p.p.m.), phosphates, max. 0.5% (must not result in significant increase in moisture content of meat prod.), sugar, honey, flav. substances, farinaceous substances (where regs. allow, but max. 10%).

SPICES, CONDIMENTS, AND FLAVOURINGS

Spices. Quantitative standards for ash, moisture, sand, etc., for numerous spices, representing good commercial quality.

Curry Powder. No starches, inert substances. Declar. of ingreds. reqd.

Mustard Paste. Optional: wine, vinegar, salt, sugar, citric, lactic or tartaric acid, oils, condiments which do not imitate or reinforce colour of the mustard. Carbohydr., (calcd. as starch), max. 24%; crude fibre, max. 12%; nitrogen, min. 5.6%; natural mustard oil, min. 0.10% (all on dry matter).

Table Salt. Moisture, max. 0.5%; water-insol., max. 0.3%. Sulphates (as calc. sulphate), max. 1.4% and calc., magnes., potass. chlorides, total max. 1.0% of dry

residue. Sieve tests: all through 420 micron I RAM sieve; 90% retained by 125 micron I RAM sieve.

Flavouring Extracts and Essences. Quantitative standards for many natural extracts and essences. Essential oils: propyl, octyl, dodecyl gallates, BHA, BHT, max. 0.1%; calc. silicates, max. 2% in powdered flavours.

SUGARS AND SUGAR PRODUCTS

Refined Sugar. SO_2, min. 20 p.p.m. (2nd grade, min. 70 p.p.m.).

Invert Sugar. Sucrose, max. 30% (syrup), 5% (paste).

Glucose Syrup. Ash, max. 1%. °Baumé 41—45° (declar.). Optional: traces of ultramarine.

Icing Sugar. Starch, max. 3% or anticaking agents (declar.), max. 1.5%: magnes. stearate, carbonate, trisilicate, and phosphate; calc., sod., alumin. silicate; silica gel.

VINEGAR AND VINEGAR PRODUCTS

Vinegar. Word "vinegar" unqualified refers to wine vin. only. Others must be named after source material (*e.g.*, malt vin.). Acetic acid, min. 4%, (malt and cider vin., 3%); reducing sugar, 1%; total ash, 0.1%. No preserv., or colours.

Pickles. Drained wt., min. 60%. Liquid: acidity (as acetic acid), min. 2%; sorbic acid, Na, K salts, max. 600 p.p.m. pH, max. 3.5. Salt, 2.5—6% (except for prods. sterilized in actual containers). Copper, max. 30 p.p.m.

Mayonnaise. Oil *plus* egg yolk, min. 78%; declar. of starch if above 0.5%. No dried yolk, egg albumen or other emulsifiers. If the oil *plus* egg yolk is less than 78%, the substance must be called "dressing with mayonnaise base"; if no yolk, "dressing" only. Nat. or synth. carotene, max. 2 mg/kg may be added. MSG, inosinates, guanylates permitted.

General. Containers and their caps for vinegar and products containing it must satisfy strict conditions of resistance to acid and salt.

ANTIOXIDANTS

In edible oils: propyl, octyl, dodecyl gallates, max. 0.01%; BHA, max. 0.02%; BHT, max. 0.02%; mixture of all these, max. 0.02% provided gallates max. 0.01%; tocopherols; ascorbyl palmitate and stearate, max. 0.02%; citric and phosphoric acids, monoisopropyl citrate, monoglyceride citric acid esters, max. 0.01%.

COLOURING MATTERS

See Tables, pp. 806-812.

BOLIVIA

Imported foods must be analysed and registered by the Health Authority, unless guaranteed by a certificate of analysis issued by a fiscal laboratory in the country of origin, and validated by a Bolivian consular agent.

BRAZIL

FOOD ADDITIVES

Recent legislation covers a wide range of food additives and sets max. limits in various foods. **Acidulants** include adipic, citric, fumaric, glycollic and gluconic, lactic, malic, phosphoric, tartaric acids.

Permitted antioxidants include propyl and dodecyl gallates, BHA, BHT, NDGA and *iso*propyl citrate. **Preservatives** include SO_2, benzoates, p-hydroxy benzoates, propionates, diethyl pyrocarbonate and sorbic acid, and sorbates, propionic acid.

Stabilisers. Nat. gums, propylene glycol alginate, Na CMC. Mono- and diglycerides, carrageenan, sod. and calc. stearoyl-2-lactylate, sorbitan esters and polyoxyethylene (20) sorbitan esters, brominated vegetable oils, agar, alginates.

Artificial Sweeteners. Ca, Na cyclamates, Saccharin and Na salt. (Dietetic products only).

BAKING POWDERS

Permitted ingreds.: ammon. carbonate, sod. bicarb., calcium acid phosphate, citric or tartaric acid, cream of tartar, starch. CO_2 evolved from 18 g. in ½ kg. flour must average 1,450 ml.

BEVERAGES

Fruit Juice. Prepd. by cold or hot pressing. Alcohol, max. 1%. No colouring matter. Optional: added sugar, max. 10% (except to grape), diethyl pyrocarbonate, max. 0.02% in filtered juices, 0.04% in unfiltered.

Fruit Syrups. Spec. grav., min. 1.30 at 15°C. (34° Baumé). Up to 30% of sugar may be replaced by glucose if % declared. Alcohol, max. 1% (vol.). Optional: citric acid (max. 0.2%), tartaric acid (max. 0.3%), malic acid (max. 0.3%), total acid max. 0.7% (as citric). No artif. flav. or colour.

Artificial Syrups. As for fruit syrups, but with artif. flav. and permitted colour.

COCOA, CHOCOLATE, AND SUGAR CONFECTIONERY

Cocoa Mass. Cocoa butter, min. 50%; volatile at 105°C., max. 7%; natural starch, max. 9%; cellulose, max. 3.5%; total ash, max. 5%; water-sol. ash, max. 3%.

Soluble Cocoa. Cocoa butter, min. 16%; added potass. or sod. carbonate, max. 3% (as K_2CO_3). Must not be described as "pure".

Chocolate. Sugar, max. 68%; cocoa butter, min. 20%; volatile at 105°C., max. 3%; total ash, max. 2.5%.

Chocolate Powder. Cocoa butter, min. 8%; volatile at 105°C., max. 3%.

Dietetic Chocolate. Chocolate with fat content 5% or lower must be described by this name.

Milk Chocolate. No special standard.

Confectionery. Permitted ingreds.: sugar, glucose (max. 30 parts per 70 parts sugar), harmless veg. or permitted synth. colours; harmless synth. essences; starch (max. 2.5%), citric or tartaric acid, max. 1%. Products containing milk, coffee, chocolate, coconut, honey, egg must not contain foreign starch or artif. colour or flav. Dragées, pastilles and such may be coated with talc, max. 0.3%, and outer layers may contain minimum amts. of wax, stearine, edible veg. oil or purified paraffin. Detailed definitions of ingreds. for sugared almonds, pastilles, pralines, nougat, nougatine, chewing gum. Marzipan: one-third almonds with two-thirds sugar; HCN, max. 0.005%.

Glucose Syrup. SO_2, max. 0.045%.

FISH PRODUCTS

Fish Pastes. Farinaceous matter, max. 10%; salt, max. 18%.

Smoked Fish. Moisture, max. 35%.

Caviare and Similar. Salt, max. 10%;

BRAZIL (cont.)

fat, min. 4.5%; nitrogen by formol titration, max. 0.05%. No free hydrogen sulphide reaction.

FLOUR PRODUCTS

Biscuits. Moisture, max. 14%; salt-free ash, max. 3%; acidity, as for flour. No colouring matters or essences except in fillings or coverings.

Alimentary Pastes. Moisture, max. 15%; ash, max. 1%; acidity, max. 5 ml. normal alk. per 100 g. No added colour except curcuma (must then be specially labelled as coloured but without egg). Egg products must contain cholesterol from egg, min. 0.45 g./kg. Gluten products: protein, min. 15%.

Pudding Powders, Dessert Powders. Starches, flours, natural extracts and essences, cocoa, chocolate, sugars, gelatine, and other natural products. Artif. essences and permitted colours only if product labelled "artificial". Adipic, citric, malic or fumaric acids, max. 0.2% on product as consumed.

FRUIT AND VEGETABLE PRODUCTS

Canned Vegetables. No addition of colour, except copper salts of harmless anions, max. 30 p.p.m. (declar.).

Tomato Paste. Salt, max. 5%. Salt-free dry matter, min. 10%, max. 16%. Howard mould count, max. 65%; bacteria, max. 200 million per ml.; yeasts and spores, max. 125 in 1/60 ml.

Tomato Extract. Salt-free dry matter: single ("simple"), min. 16%, max. 28% "double", min. 28%, max. 33%; "triple", min. 33%. Salt max. and micro-organisms as for tomato paste.

Tomato Ketchup. Dry matter, min. 35%. No added colour.

Dehydrated Vegetables. Moisture max. 10%; SO_2, max. 0.02%.

Soup Powders. Mixtures of dehydrated vegetables, salt, cereal flour, skimmed milk powder, sod. glutamate, condiments, spices. Moisture, max. 9%. Optional: dried yeast (with declar. of formula of product and content of vit. B_1).

Jams, Marmalades. Matter volatile at 105°C., max. 20%. Optional: glucose (declar. of %); added citric or tartaric acid, max. 0.2%; pectin; SO_2, max. 0.02%. No added colour.

Fruit Jellies. Dry matter, min. 65%. Optional: added citric or tartaric acid, max. 0.15%; pectin and SO_2 as for jams. Added colour only if product called "artificial".

GELATINE AND GELATINE PRODUCTS

Edible Gelatine. Ash, max. 2%; nitrogen, min. 15%; pH of 12.5% solution, 6.8—7.0; arsenic, max. 1 p.p.m. A 1% soln. in warm water, allowed to cool, should form a colourless, practically tasteless jelly.

Jelly Crystals, etc. Gelatine, sugars, citric or tartaric acid, flav., permitted colour. Labelling: declar. "artificial", and name of flav.

INFANT MILK FOODS

Milk powder with optional additions: dextrin, sucrose, maltose, lactose. Moisture, max. 6%; milk fat, min. 4%. No undextrinized starch.

INVALID AND DIETETIC FOODS

Dietetic foods: must be labelled with date and statement of % moisture, fats, carbohydrates, proteins. Special limits for added vitamins or minerals in dietetic foods.

MEAT PRODUCTS

General. Permissible additions to preserved meat products: salt, sugar, glucose, edible oils, condiments, wine vinegar, spices, egg, milk, vegetables, starch or flour (max. 5%, except as given below), sod. or potass. nitrate., sod. or potass. nitrite (max. 0.02%); polyphosphates, max. 0.5%; sorbic acid, 0.1%. Veterinary certificate requd. for imports, visad by Brazilian consul.

Meat Pastes. Moisture, max. 55%; starch or flour, max. 10%.

Canned Meat Products. Carbohydrates (from flour and/or vegetables), max. 10%. Minimum amts. gelatine allowed for jelly, also agar if special permission obtained. Meat and veg. products: per cent. of meat and of veg. to be declared.

Meat Extract. Dry matter, min. 75%; ash, max. 27% of dry matter; salt, max. 12% of dry matter; fat, max. 0.6%; total nitrogen, min. 8%; meat bases (as nitrogen), min. 40% of total nitrogen; creatin and creatinine (as nitrogen), min. 10% of total nitrogen.

SPICES, CONDIMENTS, AND FLAVOURINGS

Mustard Powders. Volatile at 105°C., max. 10%; ash, max. 5%; ash insol. in 10% HCl, max. 1.5%; starch, max. 1.5%

Table Mustard, Prepared Mustard (Powdered or Paste). Mustard powder, vinegar, edible oil, wine or water. Optional: salt, sugar, flavours.

White Pepper. Ash, max. 7%; ash insol. in 10% HCl, max. 1.5%; alc. extract, min. 15%.

Salt (refined). NaCl, min. 98%; water-insol., max. 0.3%; limited turbidity. Must be sterile.

Salt (Table). Refined salt with max. 5% tricalcium phosphate or calcium carbonate. Moisture, max. 0.5%. Labelling: statement of kind and % of calcium salt added.

Essential Oils, Natural Essences. Essential oils only. Alc. solutions, min. 30% ess. oil (declar. of compn. and concn.); ethyl alc. only.

Artificial Flavourings. Synthetic, or mixtures of synth. and natural essences. Permitted ingreds. of synth. essences: ethyl and amyl acetates, butyrates, valerianates, acetaldehyde, benzaldehyde, cinnamic aldehyde, vanillin, coumarin, glycerine, anethol, citral.

Vanilla Flavouring (Artificial). Alc. soln. of vanillin and coumarin, coloured with vanilla or tonka extract or caramel. Vanillin, min. 15%; coumarin, min. 1%; caramel, max. 5%. Declar. of nature and % of ingreds.

VINEGAR AND VINEGAR PRODUCTS

Vinegar. Acetic acid, min. 4% (spirit vinegar 6%); extract, min. 1.2%, max. 2.2%; NaCl, max. 0.2%; ash, min. 0.1 g./100 ml.; alcohol, max. 1% (vol.); reducing sugars (non-wine vinegar), max. 5%, SO_2 max. 0.02%. No flav., or colours (except caramel in spirit vinegar). Vinegar other than from wine must be named after source material.

Pickles. Acidity, min. 66.6 ml. normal alkali per 100 g. Salt pickles: brine strength, min. 24%. Lactic acid, 0.2%.

Colouring Matters. See Tables pp. 806-812. Coal-tar colours may not be added to animal products.

BRAZIL (cont.)

Applications for registration of foodstuffs with added colouring must state name of manufacturer and origin of colouring, with approval registration no. of latter.

CHILE

General. All imports of manufd. foods must be authorized by Director-Gen. of Health when he is satisfied that the product in question is not adulterated, contaminated or falsified. Official certificates of analysis requd. Authorizations of additives, etc., mentioned in text are also dealt with by Health Dept.

BAKERS' PREPARED MATERIALS

Marzipan. Obtained by heating a mixture of almonds, sugar, and lemon peel, exclusively.

BEVERAGES, NON-ALCOHOLIC

Fruit Juices. Expressed juice only. Alcohol, max. 1%. Optional: sorbic acid, max. 700 p.p.m.; diethyl pyrocarbonate, 200 mg./litre.

Concentrated Fruit Juice. Density (15°C.), min. 1.35.

Syrups. Sugar, water and fruit juice or veg. extract or infusion. Density (15°C.), min. 1.32. Alcohol, max. 0.5%. Optional: citric, tartaric, lactic, sorbic, ascorbic acids, flav., natural colouring (declar.), glucose to max. 30% of total sugars (declar.), artif. sweeteners if specially authorized. No preservs., saponins, prohibd. flav. Labelling: use of word "Natural", or designs suggesting natural origin, only if prepd. solely from fruits or fresh veg. materials and sugar; if prepd. wholly or partly from artif. products, must be described as "imitation" or by a fancy name. Statement of ingreds. requd.

COCOA, CHOCOLATE, AND SUGAR CONFECTIONERY

Cocoa Mass. Moisture, max; 7%. ash, max. 5%; sol. ash, max. 4%; fat, min. 45%; cellulose, max. 3.5%.

Cocoa Powder. Fat, min. 10%.

Sweetened Cocoa. Sucrose, max. 68%.

Solubilized Cocoa. Ash, max. 13.5%; alk. of ash, less than 6.5% (as potass. carb.); both on fat-free dry matter. Reaction must be acid.

Chocolate. Cocoa mass, min. 32%; sucrose, max. 68%; moisture, max. 5%; ash, max. 2.5%; cocoa butter, min. 14%; permitted additions; cinnamon, vanilla, vanillin, spices.

Milk Chocolate. Total milk solids, min. 15%.

Fancy Chocolate (with almonds, hazelnuts, walnuts, peanuts, honey). To be named in accordance with ingredients.

Fondant or Swiss-type Chocolate. Cocoa butter, min. 30%.

Covering Chocolate. Sucrose, max. 50%; cocoa butter, min. 22.5%; added lecithin, max. 0.5% (no declar.).

Sugar Confectionery. Permitted artificial colours allowed.

COFFEE PRODUCTS

Coffee Extract. Density (15°C.), min. 1.100; dry matter, min. 25%; caffeine, min. 0.90%; sugars, max. 50% (declar. of proportion).

Coffee Powder. Caffeine, min. 0.9%; sugars, max. 50% (declar. of proportion).

FATS AND OILS

Edible Vegetable Oils. Must be liquid at 15°C. Physical and chem. data for individual oils defined. Mixtures may be called "edible oils" or "table oils". Antioxidants may be added if authorized.

Fats. Acidity (as oleic), max. 1.0%; specifications are given for cocoa butter, coconut oil and animal fats.

Peanut Butter. Roasted peanuts with 1–3% salt; moisture, max. 13%; starch, max. 8%; ash, max 6%; fat, min. 40%.

Margarine. Moisture, max. 16%; fat, min. 82%; starch tracer, 0.1 to 0.3%; acidity of fat (as oleic), max. 1%. Optional: milk emulsifiers, natural colour, salt, lecithin, mono- or diglycerides of fatty acids, mixtures of such with sod. sulphoacetate derivs. and/or with lecithin (total stabilizer, max. 0.5%; but lecithin, max. 0.5%, may be used with mono- and diglycerides, max. 0.5%); antioxidants and synergists as under "Antioxidants" (except BHT, max. 0.01%), also lecithin citrate, max. 0.03%; lactic cultures or distillates, authorized flavours; isopropyl citrate, max. 0.02%; stearyl citrate, max. 0.15%; vit. A, min. 30000 i.u./kg. Preservs.: benzoic acid, sod. benzoate or their mixtures, max. 0.1%; sorbic acid, max. 0.02%. Special packing and labelling prescribed. Declar. of antioxidant, salt (if over 0.5%), benzoic acid and benzoate, vit. A (if added).

FLOUR AND FLOUR PRODUCTS

White Flour. "Firsts": extraction, max. 78%; moisture, max. 15%; ash, max. 0.6%; cellulose, max. 0.2%; protein, min. 9%; acidity, as sulphuric, max. 0.147%. "Seconds"; cellulose, max. 0.4%; protein, min. 10%; as sulphuric, max 0.17%; enrichment with specified vitamins and minerals obligatory. Permitted additives: pot. bromate, 50 p.p.m.; ascorbic acid, 20–25 p.p.m.

Dessert Powders. Starches, gelatines, sugar, etc. Optional: permitted colour (declar.), synth. flav. (declar.). No artif. sweeteners.

Alimentary Pastes. Acidity, as sulphuric, max. 0.25%. Egg pastes: min. 150g. egg yolk per kg. flour. Other characters as for flour of origin; no added colours except saffron.

FRUIT AND VEGETABLE PRODUCTS

Canned Vegetables. No added preserv., colour or artif. sweetener.

Tomato Sauce. Dry matter (NaCl free), 10% min.

Tomato Concentrates. Salt, max. 1%. Dry matter: "ordinary", 12-16%; "double", 16-22%; "triple", 22-35%; sorbic acid, max. 500 p.p.m.

Tomato Puree. Salt-free dry matter, max. 10%. Added colour prohibd.

Dried Fruits. Moisture, max. 16%; SO_2, max. 1000 p.p.m.

Jams. Moisture, 40% max.; pectin allowed in marmalades and jellies, also sorbic acid, 250 p.p.m. max.

CHILE (cont.)

DIETETIC PRODUCTS

Formulae must be registered with and approved by the Health Authorities. Foods must be packed in hermet. sealed containers. Labelling: statement of chem. compn. or nutritional value in calories; percentage ingred. compn.; duration and expiry date when case requires; and general labelling rules. Enrichment of foods with vitamins, etc., requires authorization and must be declared.

MEAT PRODUCTS

Meat Pastes and other Meat Preserves. Optional: milk, egg, spices, salt, saltpetre (max. 1%), flav. substances. No artif. colour. No addition of amylaceous materials. Labelling: statement of ingreds. including kinds and proportion, of meats (if meat other than that claimed is present). *Foie gras paste:* duck or goose liver only, min. 75%; moisture, max. 65% of fat-free substance. *Pâté de foie:* liver of pig, sheep or cattle; moisture, as for "foie gras"; optional: pork, beef, binding agent (must be expressly authorized), lard, egg, condiments.

Meat Extract. Water, max. 28%; fat, max. 1.5%; salt, max. 15%; ammoniacal nitrogen, max. 0.50%; total nitrogen, min. 8%; subst. sol. in 80% alcohol, min. 60%; subst. insol. in cold water, traces only; gelatine, traces only. No dextrins, coagulable protein, casein derivs., yeast extracts or other foreign matter.

MILK PRODUCTS

Condensed Milk (Unsweetened). Milk fat, min. 7.8%; dry matter, min. 28%. No pathogens, *E. coli*, moulds or yeasts.

Condensed Milk (Sweetened). Milk fat, min. 8%; total milk solids, min. 28%. Absence of organisms as for Unsweetened C.M.

Dried Milk. Milk fat, min. 24%; moisture, max. 4%; water-sol., min. 99%; acidity, as lactic, max. 1.6%; microbial count, max. 50000/g.

Dried Semi-skimmed Milk. Milk fat, min. 12%; otherwise as for dried milk.

Dried Skimmed Milk. Milk fat, max. 12%; moisture, max. 5%; otherwise as for dried milk.

Processed Cheese. Moisture, max. 43%; fat, min. 40% of dry matter. Optional: emulsifying salts, milk, salt, permitted colouring, enzymes, tarters.

SPICES, CONDIMENTS, AND FLAVOURINGS

Curry Powder. Spices only. Declar. of ingreds.

Mustard. Essential oils, min. 0.6%; ash, max. 6%; starch, max. 1.5%.

Table Salt. Sod. chloride, min. 97% (95% if max. 2% of calc. phosphate or mag. carbonate added); nitrates, max. 0.50% (as potass. nitrate); sulphates, max. 1% (as sulphuric acid). Optional: potass. iodide, 5 p.p.m.

Flavourings and Essences. Synth. products, and mixtures of such with natural products, must be called artificial. Prohibd.: alc. other than ethyl, organic acids other than citric, lactic or tartaric, synth. sweetening agents, benzaldehyde, and harmful substances generally. Monosod. glutamate and papain permitted with disod. inosinate *plus* guanylate (1:1), max. 0.2% of finished food. Permitted colours only (declar.).

SUGAR AND SUGAR PRODUCTS

Refined Sugar. Sucrose, min. 99.5%; insol. matter, max. 0.1%; ash, max. 0.2%.

Invert Sugar. Sucrose, max. 20%; water, max. 20%; ash, max. 0.5%; acidity (as tartaric), max. 0.5%.

Glucose. Reducing sugar (as dextrose), min. 40%; ash, max. 1%; acidity (as sulphuric), max. 0.2%.

VINEGAR AND VINEGAR PRODUCTS

Vinegar. Acetic acid, min. 4%. No additions of acetic acid, foreign matters or colouring Solns. of acetic acid must be called "artif. vinegar." Labelling: vinegar other than wine vinegar must be designated by word "vinegar" together with name of material from which derived.

Pickles. Acidity of liquid (as acetic), min. 3%; copper, max. 10 p.p.m. Declar. of kind of vinegar (if not from wine).

Sauces. No preserv. unless authorized. Labelling: list of ingreds. (declar. if containing preserv. or permitted colour).

Mayonnaise. Egg yoke, edible oil, flavouring, condiments. No starch, colouring or thickener. Water, max. 30%; sorbic acid, 0.1–0.15%. Microbial count, max. 100000/g.; no *E. coli* or pathogens.

COLOURING MATTERS

See Tables, pp. 806-812. No use of colouring matters unless authorized.

PRESERVATIVES

No chemical preservatives except where specifically permitted, *e.g.* sorbic acid in tomato preserves (*q.v*).

ANTIOXIDANTS

The following are permitted in oils and fats (includ. margarine), subject to authorization and declar.: BHA, BHT, max. 0.02% and NDGA, max. 0.01%; propyl, octyl and dodecyl gallates, max. 0.01%; and mixtures of these, max. 0.03% (each within its limit). Permitted synergists: citric, tartaric, ascorbic acids, max. 0.015%; phosphoric acid, max. 0.005%. Other antioxidants and synergists if authorized.

STABILIZERS, THICKENERS, AND FOAMING AGENTS

Use of these requires authorization. Saponins prohibd.

CONTAINERS

Tin-plate containers must be lacquered internally, except in cases expressly authorized. Requirements for lacquer for each type of product laid down by Director-Gen. of Health.

LABELLING

Main labels of containers must show: name of product; designation according to standard, if any (otherwise declar. of ingreds. as percentage or vol. compn. or activity); net wt. or measure (metric); name and location of factory or producer, and agent or representative (for imports); statement of any processing which causes changes in structure or normal appearance to improve quality; statement whether natural or artif.; warning if for immediate consumption, or date of expiry if of limited duration; for imports, translation of main label into Spanish; admission no. granted by Health Dept.; date of manuf.—day, month, year (may be in code as laid down).

COLOMBIA

GENERAL

In the absence of much legislation on compn. and purity, practice is to adhere to standards and principles of the Food and Drug Administration of U.S.A. For imports, declar. reqd. that products conform to laws and regulations of producing country.

COLOURING MATTERS

For permitted synth. colours (see Tables, pp. 806-811). Probably the colours of the U.S.A. list would also be acceptable. Max. amts. permitted: 0.1 g. per kg. or litre.

ECUADOR

Pending legislation, Ecuador adheres to the Latin American Food Code.

GUYANA

COCOA

Water-extract, min. 15%; ash, min. 5%.

FATS AND OILS

Lard. Water, max. 1%.

Compound Lard (or other lard substitute). Fat, min. 99%.

FLOUR (WHEAT)

Moisture, min. 9%, max. 18%; ash, min. 0.33%, max. 2%; gluten (dried at 100°C), min. 5%.

MILK PRODUCTS

Condensed Milk. Milk fat, min. 10%; nitrogen content, min. 1.4%.

Condensed Milk (Skimmed). Milk fat, min. 0.5%; nitrogen, min. 1.3%. Special labelling as unfit for use of children and invalids.

Cheese. Fat, min. 15%, max. 60% of product; water, min. 20% max. 64%; ash, min. 1%, max. 9%.

VINEGAR

Acetic acid, min. 4%. No free mineral acid or other ingred. not normally present; no colouring or other substance making it or tending to make it appear of different kind or variety from what it is.

PARAGUAY

No specific regulations for particular foods. Nat. colours only. SO_2 as preservative.

PERU

GENERAL

Imports: certif. of purity reqd. issued by a responsible health authority in exporting country, and certified by a Peruvian consul; this, with six samples of goods, reqd. for registration of product with Nat. Inst. of Health to obtain permission for entry.

COCOA AND CHOCOLATE

Cocoa Mass. Fat, min. 45%; moisture, max. 10%; crude fibre, max. 4.5%; total ash, max. 4.5%; sand, max. 0.05%.

Cocoa Powder. "Fine": fat, min. 20%; moisture, max. 10%; crude fibre, max. 5.5%; ash, max. 5.5%; ash alkalinity, max. 3.8 ml N/10 per g. "Ordinary": fat, min. 15%; crude fibre, max. 5.8%; ash, max. 5.8%; ash alkalinity, max. 4 ml N/10 per g.

Soluble Cocoa. Added alkali, max. 3% (as K_2CO_3).

Sweetened Cocoa. Fat, min. 10% max. 20%; crude fibre, max. 2.75%; ash, max. 2.75%; sugar, max. 60%.

Cocoa Products. (Mixtures with sugar, dried milk and other food products to modify flav.) Cocoa, min. 30%; sugar, max. 50%; dried milk, min. 12%.

Sweetened Drinking Chocolate. "Fine": fat, min. 16%; sugar (or glucose), max. 65%; crude fibre, max. 2%; ash, max. 10%. "Ordinary": cocoa mass, min. 20%; sugar, max. 75%; optional, edible fat, max. 5%.

Sweetened Chocolate with Milk. Fat, min. 18%; sugar, max. 50%; full-cream dried milk, min. 20%; R-M value of fat, min. 6.5; lactose, min. 8%; moisture, max. 10%; casein, min. 5%.

Enriched Chocolate or Cocoa. Recommended daily consumption to contain min. amts. shown of 4 of following (additions to be clearly named): vits. A (2,000 I.U.), D (200 I.U.), B_1 (0.62 mg), B_2 (0.9 mg), nicotinic acid (6.5 mg), calcium (200 mg), iron (6 mg).

Labelling of Cocoa and Chocolate Products. Name of product, commercial name, ingreds., manufacturer, net wt., and authorization of Nat. Inst. of Health to be shown.

ESSENCES AND FLAVOURINGS

Exporters of these materials to Peru must register with the Inspector-General of Pharmacy.

COLOURING MATTERS

Manufacturers who add colouring matters to food or beverage products imported into the country must register with Nat. Inst. of Nutrition, declaring nature and amt. of colouring matter used. Authorization must then be quoted on label. Harmless veg. colours, cochineal carmine, and coal-tar colours (see Tables, pp. 806-812) allowed.

URUGUAY

BEVERAGES, NON-ALCOHOLIC

Fruit Juices. Alcohol, max. 0.7%. Optional: SO_2 (declar.), max. 50 mg./litre, if juice not stated to be suitable for invalids or infants.

Beverage Bases, Artificial. Optional: fruit juices and syrups, plain syrups, veg. extracts, citric or tartaric acid, essences and permitted colouring. No preservs., saponins, synth. sweeteners.

COCOA AND CHOCOLATE

Cocoa Mass. Cocoa butter, min. 45%; natural starch, max. 9%; cellulose. max. 3.5%; total ash, max. 5%; water-insol. ash, max. 3%.

Cocoa Powder. Optional: harmless flav. substances; sucrose, max. 70% (declar. of presence and amt.).

Soluble Cocoa. Total ash, max. 13.5% of fat-free dry matter; alk. of water-sol. ash, as K_2CO_3, max. 6.5% of fat-free dry matter.

Chocolate. Cocoa mass, min. 32%; sucrose, max. 68%; moisture, max. 3%; ash, max. 2.5%. If from alkalized cocoa, declar. reqd.

Couverture. Cocoa butter, min. 30%, max. 40%; optional: commercially pure coconut oil.

Milk Chocolate. Milk solids, min. 12%.

Diabetic Chocolate. Declar. of nature and proportion of synthetic sweeteners.

URUGUAY (cont.)

COFFEE EXTRACT

Caffeine, min. 2.50%.

FLOUR AND FLOUR PRODUCTS

Flour. No addition of chem. improvers or bleachers.

Alimentary Pastes. No artif. colouring matter.

FRUIT AND VEGETABLE PRODUCTS

Tomato Purée. Salt-free dry matter, min. 10%; salt, max. 15%.

Carbonated Soft Drinks. Fruit juice, max. 10%; internal pressure of the CO_2 gas at 20°C, min. levels laid down. Only sugar, dextrose, fructose or saccharin (300 p.p.m. max.) for sweetening.

BISCUITS

May not indicate biscuits contain any of the following unless present in min. amounts stated: butter, 2.5%; cheese, milk, nuts, eggs, honey, 5%; coffee, 1%, chocolate. 3%; others, 5%.

CHEESE

Quality standards for cheese and processed cheese (U.K. cheese acceptable), name of country in processed cheese only if 75% from that country, "cheese food" must contain 51% or more cheese.

CONFECTIONERY

Chocolate. Cocoa, min. 35% (or cocoa, min. 21% and milk fat, min. 3% and total cocoa and milk solids, min. 35%); cocoa butter, min. 18%; moisture, max. 3%. Optional: other fats, dairy products, flavourings, sweeteners: sucrose, dextrose, fructose, lactose, sorbitol, etc., other substances on list of food additives, fruit and nuts, etc., max. 40%; filled chocolate, choc. min. 35%, chocolate coated with nuts, etc.; choc. min. 30%. Min. quantities of flavouring substances if refer to them in name of product: fruit or nut, 5%; honey, 2%; coffee, 1.5%; others, 5%. Labelling: declare ingredients and additives; net wt. in metric only; importer's name and address. Exemptions where labelling difficult. If chocolate contains no foreign fats and only sucrose, max. 55% as sweetener, and only lecithin, max. 0.5% and vanilla as additives, need not declare ingredients and may use word "pure".

Milk Chocolate. Chocolate with milk solids, min. 14% including min. 3% milk fat (min. 3.5% for "pure" milk chocolate).

Sugar Confectionery. Sugar, min. 60% and moisture, max. 5% in high boilings (sugar, min. 50% and moisture, max. 4% in fruit drops). Sugar, min. 30% and moisture, max. 6–20% in low boilings. Caramels, moisture, max. 10%, fat, min. 3%, protein, min. 2%. Nougat, moisture, max. 18%. Optional: colours (Tables, pp. 806-812); 30 p.p.m. max. SO_2; flavourings, acetic, citric, lactic, tartaric, fumaric, gluconic, succinic acids; glycerol, propylene glycol; 0.5% max. talc; casein and sod. caseinate; calc. and sod. CMC, methyl cellulose, sod. carboxymethyl starch, sod. starch phosphate, max. 2%; glyceryl fatty acid esters; propylene glycol fatty acid esters; sorbitan fatty acid esters; soyabean phospholipids; phosphates; sod. alginate; propylene glycol alginate, max. 1%; pectin, natural gums; other natural substances. Labelling: declare ingredients in descending order by weight, decl.

JAPAN (cont.)

sugars (glucose, fructose, sucrose) separately, declr. additives under group name e.g. artificial colours. Declr. net wt. in g. or kg. Cylindrical containers less than 150 sq. cm. or other packages less than 70 sq. cm. exempt. State name of importer. Put line round the labelling.

Chewing gum base. Optional: vinyl acetate resin.

FATS AND OILS

Antioxidants: propyl gallate, max. 0.01%; butylated hydroxyanisole, butylated hydroxytoluene, max. 0.02%; NDGA, max. 0.01%; guaiac resin, 0.1%.

FLOUR, FLOUR PRODUCTS

Permitted improvers: benzoyl peroxide, max. 300 p.p.m.; ammon. persulphate, max. 300 p.p.m.; potass. bromate, max. 50 p.p.m. Chlorine dioxide.

Sponge Cake. No coal tar colour.

FROZEN FOODS

Microbiological standards. Viable bacterial counts: ready-to-eat, max. 100,000/g; heated before frozen and cooked before eating, max. 100,000/g; others to be cooked before heating, max. 3,000,000/g, *E.coli* neg.; frozen fresh fish and shellfish for eating raw, max. 100,000/g. All classes neg. coliform. (Standards do not apply to meat products).

Frozen foods must be below —15°C and packed in synthetic resins alumin. foil or water-repellant paper.

Labelling. In Japanese state following: name of food in min. 8 points type face; instructions for preparation by consumer in letters as large as name of product; whether heated before freezing (not necess. on prods. not heated before eating); list ingreds. and additives; net wt. and number of servings or units; storage temp. —18°C (—15°C if this is not poss.); name and address of manuf., processor or importer; date of manuf. or processing (if not known state date of importing).

FRUIT PRODUCTS

Jams. Residual SO_2 (or equiv. sulphite), max. 30 p.p.m. Optional preserv.: sorbic acid and K salts, max. 500 p.p.m.; saccharin, max. 200 p.p.m. No coal tar colours in marmalade.

FLAVOURINGS AND ESSENCES

Detailed list of permitted flavourings, seasonings. Coumarin prohibited.

GELATINE

Residual SO_2 (or equiv. sulphite) max. 500 p.p.m.

SAUCES

Fruit Sauces. Optional preserv.: *p*-hydroxybenzoic esters, max. 200 p.p.m.; saccharin, max. 300 p.p.m.

Ketchup. Optional preserv.: Sorbic acid or K salt, max. 500 p.p.m.

ADDITIVES

List refers to artificial substances only. Natural non-toxic substances may be used without restriction (includes pectin, natural gums, natural colours, not the Al lake of carminic acid).

Emulsifiers and Stabilizers

Casein; propylene glycol alginate, max. 1%; sod. alginate; sod, caseinate; sod. polyacrylate, max. 0.2%; CMC and sod. and calc. salts, methyl cellulose, sod. carboxymethyl starch and sod. starch phosphate, max. 2% when used singly or tog.; glyceryl fatty acid ester; propylene glycol fatty acid ester; sorbitan fatty acid ester; soyabean phospholipids; sucrose esters; calc. stearoyl lactate (bread only); phosphates.

Antifoaming Agent

Silicone resin, max. 50 p.p.m.

Artificial Sweeteners

Sorbitol; xylose, trisodium glycyrrhizinate (in soy sauce). Saccharin only in chewing gum, max. 50 p.p.m. Sod. saccharin, max. 100 p.p.m. in confectionery, cakes; 200 p.p.m. in ice cream, canned and bottled foods, jam; 300 p.p.m. in vinegar (if to be diluted more than 3 times 900 p.p.m.), fish paste, soft drinks (if to be diluted more than 5 times 1,500 p.p.m.), sauces, milk drinks, sour milk drinks; 500 p.p.m. in soy sauce; 1,200 p.p.m. in powdered soft drinks, fish products other than canned; 2,000 p.p.m. in pickles; dietetic foods (special law).

Nutrient Supplements

Forty-nine compounds listed.

Colouring Matter

See Tables, pp. 806-812.

LABELLING

Weight declarations must be in metric system.

Labels must be in Japanese, declare date of manufacture or importation on certain foods, declare ingreds on canned foods, type size approx. 12 points.

PACKAGING MATERIALS

No optical brightening agents.

KHMER REPUBLIC

No regulations—country in a state of war

MALAYSIA

(Malaya, Sabah, Sarawak.) Each has own regulations which are very similar. In general are like those in the U.K.

COFFEE AND CHICORY EXTRACT, ESSENCE

Coffee, min. 50%. (Declar. of %).

ESSENCES (Concentrated)

Isopropyl alcohol permitted if product approved by Chief Chemist, Federation of Malaya.

INFANT FOODS

No woody fibre, or any mineral substance insol. in acid.

INVALID FOODS

Statement reqd. of ingreds. on which claim of special suitability based. If for diabetics, % carbohydr. to be stated.

MILK PRODUCTS

Condensed Milk (Unsweetened and sweetened). Milk fat, min. 9%; total milk solids, min. 31%. Labelling: as in U.K.

Dried Milk. Milk fat, min. 26%. No foreign substance. Labelling: as in U.K.

VINEGAR

Wine vin. and spirit vin. only; acetic acid, min. 5 g./100 ml. No addition of colour or acetic acid.

PRESERVATIVES AND COLOURING MATTERS

Schedules of permitted preservs. and prohibited colours as in U.K. Preservatives, etc., in Food Regulations, 1925-58 except: unfermented grape juice, either SO_2, max. 350 p.p.m., or benzoic acid, max. 600 p.p.m.; jams, marmalade and fruit jelly, SO_2, max. 40 p.p.m. Also allowed: in butter imported and sold in hermetic. sealed containers,

MALAYSIA (cont.)
boric acid, max. 0.2%; in dehydrated veg., SO_2 max. 300 p.p.m.

ARTIFICIAL SWEETENERS

Foods containing saccharin or other artificial sweeteners prohibited.

NEPAL

PAKISTAN

BEVERAGES, NON-ALCOHOLIC

Fruit Juice. Prepd. by expression, with or without substantial portions of pulp and other cellular matter. Optional: harmless colour; citric acid, with total citric max. 3.5% (lemon juice, min. 4%; lime juice, min. 5%). Preserv.: SO_2, max. 350 p.p.m.; benzoic acid, max. 600 p.p.m.; or mixtures of both.

Fruit Cordial, Fruit Squash. Fruit juice, min. 25%; total sol. solids, min. 15% ("low sugar"), 30% ("medium sugar") 50% ("high sugar"). Optional: salt, harmless colour, peel oil. Citric acid and preserv. as for fruit juice.

Fruit Syrup. Fruit juice below 25% (declar. of %). Otherwise as for fruit cordial.

Barley Water (Lemon, Orange, Grapefruit). Fruit juice, min. 30%; total sol. solids, min. 30%; barley starch, min. 0.35%, max. 0.55%. Optional: as for fruit squash; also gum trag.; citric acid to give total max. 2.5%. Preserv. as for fruit juice. No fermentation on incub. at 37°C.

DIETARY FOODS

Artif. sweeteners. Saccharin, Ca., Sod. cyclamates.

FATS AND OILS

Antioxidants. Gallates, N.D.G.A., gum guaiac, thiopropionic acid, 0.01%; B.H.A., dilauryl thiodipropionate, 0.02%; tocopherols, 0.03%; (essential oils, 0.1% of all antioxidants); ascorbic acid.

FRUIT AND VEGETABLE PRODUCTS

Canned or Bottled Fruits. Drained wt., min. 40% of net wt. Head space, max. 10% of inside height of container (if less, product must be labelled "below the standard, slack fill"). No harmful preserv. or harmful artif. colour.

Canned or Bottled Vegetables. Drained wt. min. 50% of net wt. Liquid must just cover veg. Otherwise as for canned fruit.

Tomato juice. Spec. grav., min. 1.0212; total solids, min. 5%. Optional: salt (max. 1.5%), sugar, harmless colour. Preserv.: sod. benzoate or benzoic acid, max, 250 p.p.m. Howard mould count. max. 50%; yeasts and spores: max, 125 per 1/60 cubic mm.; bacteria. max. 100 million/ml. No fermentation on incub. in 1% malt soln. at 37.5°C.

Tomato Ketchup. Spec. grav. (20°C.) min. 1.087; total solids, min. 20%. Optional: spices, salt, sugar, vinegar, onion, garlic, harmless colour, sod. benzoate or benzoic acid (max. 250 p.p.m.). Moulds, yeasts, bacteria, and incubation test, as for tomato juice.

Dried Fruit. SO_2. max. 750 p.p.m. (raisins, sultanas), 2000 p.p.m. (apples, bananas, dates, figs, pears, apricots, etc.). Moisture, 12—15% (more sugary fruits), 5—10% (less sugary).

Dried Vegetables. Moisture, min. 6.0%, max. 9.0%; ash insol. in HCl, max. 0.5%; SO_2, max. 350 p.p.m.

Jams. Sol. solids, min. 65%; fruit content, min. 45%; SO_2, max. 40 p.p.m.; benzoic acid, max. 200 p.p.m. Optional: pectin (when necessary); harmless colour.

Preserves. Fruit, min. 45%; total sol. solids, min. 65%. Fruit must retain form. Optional: harmless colour. Preserv. as for jams.

Marmalade. Sliced peel or fruit, min. 7%, max. 20%. Optional: citric or tartaric acid; pectin (when necessary); harmless colour and flav. Otherwise as for jams.

Fruit Jelly. No min. fruit or solids content.

Jelly Marmalade. Sliced peel or fruit, min. 5%, max. 10%.

Candied Fruit, Candied Peel. Total sugars, incl. glucose, if used, min. 70% reducing sugars, min. 40% of total sugars. Optional: glucose, salt, harmless colour, SO_2 (max. 150 p.p.m.).

VINEGAR AND VINEGAR PRODUCTS

Vinegar. Acetic acid, min. 4 g./100 ml. Optional: caramel or other harmless food colour. Declar. of source material reqd.

Vinegar Pickles. Acetic acid, min. 2 g./100 ml. of fluid. Fluid, max. one third of total contents (when drained 5 min. on 15 mesh sieve). Reasonably free from sediment. Optional (besides vinegar and veg.): spices, sugar, harmless colour. Labelling: "mixed pickle" if more than one veg. used.

Fruit Chutney. Sol. solids, min. 66%; moisture, max. 35%. Optional: any suitable fruit, spices, salt, sugar, vinegar, onion, garlic, harmless colour; SO_2, max. 250 p.p.m. No fermentation on incub. in 1.0% malt soln. at 37.5°C. Moulds, yeasts, bacteria, as for tomato juice.

COLOURING MATTER

SINGAPORE

GENERAL

Foods complying with U.K. regulations acceptable.

COCOA PRODUCTS

Chocolate, Confectioners' choc., choc. coating. Cocoa paste, powder or cocoa. Optional: cocoa fat, sugar, spices, milk solids, emulsifiers (see next column), flavour. No foreign fats.

Milk chocolate. Milk fat, min. 2% (4.5% in rich, full cream or dairy milk choc.), fat-free milk solids, min. 10.5%. No foreign fats.

INFANT FOODS

Quantit. statement (in English) is requd. of ingreds. on which claim of suitability for infants is based. Fibre, max. 2%. No mineral subs. insol. in 1/10 N HCl. No added monosod. glutamate, nitrates, nitrites, chemical preservatives.

INVALID FOODS

Quantit. statement (in English) requd. of ingreds. on which claim of suitability is based. If for diabetes, declar. of per cent carbohydrate.

SINGAPORE (cont.)

MILK PRODUCTS

Condensed Milk (Sweetened and Unsweetened). Milk fat, min. 9%; total milk solids, min. 31%. Labelling as for U.K.

Dried Milk. Milk fat, min. 26%. Labelling as for U.K.

MEAT PRODUCTS

Corned, pickled, salted meat. Phosphates, max. 0.3%.

Meat Paste. Meat, min. 55 %.

ADDITIVES

Anticaking Agents: calc., magnes. carb.; calc. hydroxyphosphate; bone phosphate; magnes. stearate; calc., sod. alumin., sod. calc. alumin. and calc. alumin. silicates, total anticaking agents, max. 2%.

Antioxidants. As for U.K.

Colours. See Tables pp. 806–812.

Preservatives. As for U.K., with some exceptions.

Emulsifiers and stabilizers. Agar, alginates, carrageenan, sod. and calc. caseinate, cellulose ethers, dioctyl sod. sulphosuccinate, furcelleran, veg. gums, lecithin, mono- and dilgycerides, pectins, polyglycerol and propylene glycol esters of fatty acids, propylene glycol alginate, Tweens and Spans, quillaia (only in soft drinks, max. 200 p.p.m.), modified starches, stearoyl-2-lactylic acid and sod. and calc. salts, stearyl tartrate.

Nutrient Supplements. 45 compounds listed.

General Purpose Food Additives. 58 subs. listed inc. acids, bases, gases etc.

ARTIFICIAL SWEETENERS

Saccharin only under licence (decl.)

METALLIC CONTAMINATION

Maximum levels of As, Pb, and Cu laid down for large number of foods.

MINERAL HYDROCARBONS

Similar to U.K. regs.

LABELLING

Regulations for pre-packed foods apply which are generally similar to those of the U.K. Labelling Regulations.

SRI LANKA

BEVERAGES, NON-ALCOHOLIC

Fruit Juice, Fruit Extract. Optional: permitted colouring matter; SO_2, max. 350 p.p.m., or benzoic acids max. 600 p.p.m. Labelling: word, "fruit juice" or "fruit extract", with name(s) of fruit(s) from which derived.

Fruit Syrup, Cordial, Squash. Fruit juice, water, and sugar. Fruit juice, min. 25%; sugar (sucrose), min. 25%. Optional: citric or tartaric acid; glycerine; permitted colour; preserv. as for fruit juice. Labelling: "fruit syrup", etc., with name(s) of fruit(s).

Flavoured Syrup, Cordial, Squash. As for fruit syrup, etc., but with no min. for fruit juice or sugar. No artif. flav. Labelling: "flavoured syrup" etc., with name(s) of fruit(s).

Artificial Syrup, Essence, Cordial, Squash. Water and wholesome ingreds. Optional: harmless flav. and colouring. Labelling: "syrup", etc., with words "artificial", "imitation", "synthetic", or "prepared from synthetic ingredients".

COFFEE PRODUCTS

Coffee and Chicory Mixture (incl. French Coffee). Coffee and chicory only, min. 51% pure coffee. Labelling: name and declar. of percentage of ingreds., in prescribed form.

Coffee with Fig Flavour or Seasoning, or other harmless flavouring substance, incl. *Viennese Coffee*, pure coffee, min. 85%. Labelling: name and declar. of percentage of ingreds., in prescribed form.

Liquid Coffee Essence, Extract. Caffeine, min. 0.5% wt./vol. No foreign extractives.

Liquid Coffee and Chicory Essence, Extract. Caffeine, min. 0.25%. No extractives except from coffee and chicory.

EDIBLE FATS AND OILS

Free fatty acids, max. 1% (as oleic): water, max. 0.5%. No rancidity; no mineral oil.

MILK PRODUCTS

Condensed Milk. (Sweetened or unsweetened). Milk fat, min. 9.0%; total milk solids, min. 31.0%. Labelling: statement in prescribed form of equiv. pints milk, and directions for dilution to make a fluid with milk fat, min. 3.6%, and milk solids-not-fat, min. 8.8%.

Dried Milk. Milk fat, min. 26% (full-cream), 20% (three-quarters cream), 14% (half-cream), 8% quarter-cream). Labelling in prescribed form showing whether full cream, or the appropriate grade of partly skimmed milk; statement of equiv. pints milk, and directions for dilution to make a milk of appropriate fat content; if fat below 20% (but not below 8%), statement that product should not be used for babies except under medical advice.

Dried Milk Mixtures. If containing min. 70% dried milk, latter must comply with above standards. Labelling: "sweetened" if sugar added; "modified" if added substance is a milk constit.; "compounded" in other cases, with statement of substance(s) added.

Processed Cheese. Moisture, max. 45%; milk fat, min. 45% of dry matter. Optional: stabilizers. No foreign fat.

VINEGAR

Acetic acid, min. 4% wt./vol. Labelling: source to be included with word "vinegar". If distilled, this word must also be included. Spirit vinegar must be so named. If vinegar not wholly from alc. and acetous fermentation, must be called "imitation" or "artificial".

COLOURING MATTERS

Almost identical to U.K. "Colouring Matter in Food Regulations, 1957".

PRESERVATIVES

As in U.K. "Preservatives in Food Regulations, 1962".

ANTIOXIDANTS

As the 1958 U.K. Regulations.

EMULSIFIERS AND STABILIZERS

As the 1962 U.K. Regulations.

THAILAND

There are regulations on non-alcoholic beverages, canned foods, vinegar, colours (see Tables, pp. 806–812) and MSG. Cyclamates and Dulcin prohib.

CUBA

IMPORTS: GENERAL

No import of articles whose consumption is prohibd. or unauthorized in country of origin, or which are of lower quality than generally accepted therein. Imports must conform with any standards of purity of country of origin, if not in conflict with Cuban reg.

DIETETIC PRODUCTS (for invalids, children, etc.)

Sealed containers only. Labelling: date of packing and of expiry, calorific value per 100 gm., percentages of carbo-hydrate, protein and fat, list of components; no reference to medical indications of therapeutic treatment.

ENRICHED FOODS

Must be labelled to show clearly nature of enriching material and its proportion. If changing with time, label must show expiry date.

VINEGARS

Acetic acid, min. 4%, max. 10%. Colouring with caramel only. Spirit vinegar: density (15°C), 1.005-1.0098; acid, as acetic, 4% to 5.70%; alcohol, 0.33% to 1.0%; dry matter, 0.20% to 0.28%. Malt vinegar: density (15°C), 1.017; acid, as acetic, 6.60%; dry matter, 2.50%; ash, 0.25%.

COLOURING MATTERS

Ponceau SX, Amaranth, Erythrosine, Sunset Yellow FCF, Tartrazine, Guinea Green B, Lt. Gr. SF Yellowish, Fast Gr. FCF, Indigo Carmine, Bril. Blue FCF. Regs. do not cover natural colours.

PRESERVATIVES

The use of sodium benzoate is permitted, max. 1000 p.p.m., if clearly declared.

The following only are authorized for the preservation of meat products; salt, sugar, wood smoke, vinegar, potass. nitrate, sod. or potass. nitrite (max. 200 p.p.m.), sod. benzoate (max. 1000 p.p.m.).

FLAVOURINGS

The use of coumarin in foods and drinks is prohibited.

LABELLING

Statements requd. include manufacturer's name and place of manufacture, designation of product, and ingredients. All required statements must be in Spanish.

CONTAINERS

The regs. include numerous clauses specifying types of container or wrapping appropriate and to be used for various named food products. These are all in conformity with present-day practice.

JAMAICA

Regulations similar to the U.K. Preservatives, etc. Regulations, 1925-58, are in force. Foodstuffs manufd. to comply with these and other U.K. standards should be satisfactory.

TRINIDAD AND TOBAGO

Regulations (1965) follow Canadian Regulations in certain respects.

Baking Powder. Combinations of sodium bicarb. with tartaric acid or salts, or acid phosphates.

Other Food. Standards set for dairy products, edible oils and fats, vinegar and dilute acetic acid, canned fruit juices, coffee, carbonated beverages (artificial sweeteners prohibited).

COLOURING MATTERS

Natural colours, caramel, purified charcoals, carbon blacks, iron oxide, titanium dioxide, and synthetic colours permitted by Canada, U.S.A., U.K., and Australia, or approved by FAO/WHO, unless prohibited.

FLAVOURS

Solvents limited to ethyl alcohol, glycerol, or propylene glycol. *Iso*-propyl alcohol and coumarin prohbd.

PRESERVATIVES

SO_2, benzoic, sorbic and propionic acids, sodium diacetate.

ANTIOXIDANTS

Alkyl gallates, N.D.G.A., 0.01%; B.H.A., 0.02%.

E.E.C.

Belgium, France, Germany (West), Italy, Luxembourg, Netherlands, Denmark, Irish Rep. and United Kingdom. Directives on colours, preservatives and antioxidants are in force and have been incorporated into the national legislation of the Member States, with transitional agreements for the new Members. The directives on cocoa and chocolate and certain sugars were passed in 1973, those on honey and emulsifiers and stabilisers etc. in 1974 and on making up by vol. of certain prepacked liquids in 1975. The former are the first directives on commodity standards for food to be passed. They have yet to be incorporated into the national legislation of each Member State. Apart from these directives there is almost no *Community* legislation on standards of composition for foods (it is still in draft form) and any foods sent to any of the E.E.C. countries must comply with the national laws of that individual country. After an E.E.C. *directive* has been agreed upon by the Council of the E.E.C. it is incorporated into the national law of each Member State and it is then enforced by that State. E.E.C. *regulations* also exist but at present there are none in force on composition of foods (regulations usually concern tariff, subsidies, intervention, etc.).

The directives on additives are merely an exclusive list of permitted additives. They do not state conditions of use in any food (with minor exceptions for some preservatives). Directives list permitted additives but do not state the manner in which they are to be used.

Proposals on alimentary pastes; analytical methods (various); animal feeds, beer; bread; butter; casein and caseinates (including methods of chemical and microbiological analysis); ceramic articles (lead and cadmium leaching); coffee; condiment sauces; dietetic foods and low-sodium dietetic foods; egg products; erucic acid in fats and oils and margarine; flour; flour confectionery and biscuits;

E.E.C. (cont.)

frozen foods; fruit, canned; fruit juices and nectars; glass and glass ceramic articles; ice cream; jams and jelly jams and marmalade; labelling; margarine; materials and articles in contact with food; mayonnaise and other emulsified sauces; meat extracts and soups; meat products hygiene; oils and fats; poultry, moisture content; poultry, marketing standards; preserved milk (dried and evaporated); mineral waters; mustard; olive oil esterification; packing by weight or volume; pesticides; prescribed quantities for certain commodities; soft drinks; solvents; starches and modified starches; sugar confectionery; vegetables, canned; and yeast are under consideration.

Synergists. Lactic, citric, tartaric, ortho-phosphoric acid and sod., calc. and potass, salts; citric esters of mono- and diglycerides of edible fatty acids.

Solvents for antioxidants. Water, edible oils and fats, ethanol, sorbitol, propylene glycol, glycerol.

COCOA AND CHOCOLATE

Cocoa, Cocoa Powder. Cocoa butter, min. 20% of dry matter; moisture, max. 9%. Cocoa butter, min. 8% in fat-reduced cocoa powder.

Sweetened Cocoa. Mixture of cocoa powder and sucrose, min. 32% cocoa powder. (Also fat-reduced cocoa.) Declar. % cocoa solids.

Drinking Chocolate. Mixture of cocoa powder and sucrose, min. 25% cocoa powder. (Also fat-reduced cocoa.) Declar. % solids.

Chocolate. Total dry cocoa solids, min. 35%; dry non-fat cocoa solids, min. 14%; cocoa butter, min. 18%. Declar. % cocoa solids.

Plain Chocolate. Total dry cocoa solids, min. 30%; dry non-fat cocoa solids, min. 12%; cocoa butter, min. 18%. Declar. % cocoa solids.

Vermicelli Chocolate, Chocolate Flakes. Total dry cocoa solids, min. 32% including 12% cocoa butter.

Gianduja Nut Chocolate. Total dry cocoa solids, min. 32% including 8% min. dry non-fat cocoa solids and finely ground hazelnuts min. 20%, max. 40% of finished product; other nuts (whole or broken) max. 60% total nuts.

Couverture Chocolate. Cocoa butter, min. 31%; dry non-fat cocoa solids, min. 2·5% (min. 16% if called "dark").

Milk Chocolate. Total dry cocoa solids, min. 25% including dry non-fat cocoa solids, min. 2·5%; milk solids, min. 14% including butter fat, min. 3·5%; sucrose, max. 55%; fat, min. 25%. Declar. % cocoa solids.

Milk Chocolate with High Milk Content. Total dry cocoa solids, min. 20% including dry non-fat cocoa solids, min. 2·5%; milk solids, min. 20% including butter fat, min. 5%; sucrose, max. 55%; fat, min. 25%. May be called "Milk chocolate" in U.K. but must declr. milk solids %. Declr. % cocoa solids.

Milk Chocolate Vermicelli/Flakes. Total dry cocoa solids, min. 20%;

fat, min. 12% including butter fat, min. 3%; sucrose, max. 66%.

Gianduja Nut Milk Chocolate. Milk chocolate with milk solids, min. 10% and finely ground hazelnuts, min. 15%, max. 40% of finished product; other nuts (whole or broken), max. 60% total nuts.
Couverture Milk Chocolate. Milk chocolate with fat, min. 31%.
White Chocolate. No colouring matter. Cocoa butter, min. 20%; milk solids, min. 14% including butter fat, min. 3.5%; sucrose, max. 55%.

Filled Chocolate, Chocolate with . . . Centre/Filling. The chocolate portion min. 25% of total wt. of product. State type of chocolate.

A Chocolate. Prod. size of a mouthful. Chocolate portion min. 25%; other edible substances except flour, starch and foreign fats (see note on foreign fats at end). State type of chocolate.

Additives. Sugar may be replaced by dextrose, fructose, lactose or maltose, max. 5% of total wt. of prod. (no declr.), max. 20% (declr.). Flavourings (foodstuffs, natural flavourings, synthetic or artificial nature identicals) (not chocolate or butter flavours) and ethyl vanillin (declr.). Lecithin (peroxide, max. 10), max. 0.5% phosphatides (1% in cocoa powder, milk chocolate with high milk content, choc. flakes; 5% instant cocoa powder). Edible substances (not flour, starch, foreign fats), min. 5% and max. 40% if in clearly visible pieces, max. 30% if in indiscernible form, max. 40% if both in visible pieces and in indiscernible form. Detailed requirements for declaring edible substances, e.g., fruit, nuts. The types of chocolate may be partly coated with edible substances, max. 10% of total wt. Until 31.12.1977 the following permitted in U.K., Ireland and Denmark: polyglycerol polyricinoleate, sorbitan monostearate, sorbitan tristearate, polyoxyethylene (20), sorbitan monostearate, ammonium salts of phosphatidic acids; other flavourings.

Foreign Fats. Not permitted in directive but Member States may permit them optionally. In 1976 the E.E.C. will decide whether to permit them.

Prescribed Weights. Chocolate bars weighing min. 85 g to max. 500 g must be in the following sizes only: 85, 100, 125, 150, 200, 250, 300, 400, 500 g. Wts. between 75 and 85 g may be prohibited by some Member States.

Labelling. Reserved name must be used. Declr. net wt. (not if less than 50 g. each pack sold singly), min. net wt. on hollow moulded products. Declr. name and address of manufacturer, packer or vendor established in the E.E.C. Exemptions for non-retail packs min. 10 kg. May have to use multi-lingual labels for intra- Community trade.

HONEY

Main types of honey: origin (blossom or honeydew); mode of presentation (comb, chunk, drained, extracted, or pressed). Standards for apparent reducing sugars, moisture, apparent sucrose, water-insoluble solids, ash, acidity, diastase activity and hydroxymethylfurfuryl content laid down. Special exemptions for bakers' or industrial honey.

E.E.C. (*contd.*)

SUGARS

Standards for semi-white, white, extra white sugar, sugar soln., invert sugar soln., invert sugar syrup, glucose syrup, dried glucose syrup, dextrose monohydrate, dextrose anhydrous. Applies only to direct trade in sugars as such, not to use of word "sugar" to describe ingred. of composite food.

EUROPE, WEST

AUSTRIA

BEVERAGES, NON-ALCOHOLIC

Fruit Juice Beverages. Standards for juices: fruit juice for consumption without addn.; fruit juice conc., max. half vol. of original juice; fruit drink, min. 60% nat. fruit juice; fruit juice with addn. of sugar and water, titratable acidity given for different juices; fruit homogenates, with sugar and water, min. fruit content 40%, high acid fruits, 35%. Limits for all types of product; alcohol, 5 ml/l; volatile acid, as acetic, 0.4 g/l; lactic acid, 0.6 g/l; SO_2, 20 mg/l (grape juice, 50 mg/l); citrus peel oil in citrus juices, 0.3 ml/l.

COCOA AND CHOCOLATE

Cocoa Mass. Cocoa butter, 45-55 %. Ash, max. 10%; crude fibre, max. 9% (both on dry, fat-free matter). Optional: alkalization with carbonates or oxides of alkali metals, ammon., magn. and calc., max. 3% (as K_2CO_3).

Cocoa Powder. Moisture, max. 9%; cocoa butter, min. 20% (on dry cocoa); ash, max. 10%. Alkalized cocoa: ash, max. 16.6 %; alkalinity of ash, max. 120 ml. N alkali per 100 g.; both on dry, fat-free cocoa. Strongly-defatted cocoa: cocoa butter, min. 10%, unless fat content declared.

Chocolate. Cocoa ingreds., min. 40%; sucrose, max. 60%; creamed nut, coffee, cream, dried milk, max. 5%; lecithin, max. 0.5%.

Chocolate Powder. Sugar, max. 60%; cocoa butter, min. 14%.

Milk Chocolate. Cocoa ingreds., min. 25%; fat-free dry cocoa, min. 5%; milk fat, min. 3.5%; full-cream dry milk solids, min. 12.5%.

Cream Chocolate. Fat-free dry milk solids, min. 7%; milk fat, min. 40% of total cream solids.

FATS AND OILS

Edible Fats and Oils. Antioxidants permitted for long storage purposes only: N.D.G.A., max. 0.01%; propyl, dodecyl or butyl gallate, max. 0.01 % singly, 0.02% combined; B.H.A., max. 0.02%. Synergists permitted, e.g., citric, phosphoric or ascorbic acid.

FRUIT PRODUCTS

Jams. Ratio fruit : sugar should average 1:1. Dry matter, min. 65% (single-fruit), 58% (mixed fruit). Optional: glucose, max. 12% of product (declar. if over 5%); permitted colour; pectin or jelly-juice; preserv. (see under "Preservatives"; but SO_2 in any case max. 100 p.p.m.).

Fruit Jellies. Sugar, min. 55%, max. 70%. Dry matter, min. 58%. Optional: colour, preserv., as for Jams.

PRESERVATIVES

Max. amts. of certain preservatives permitted in some classes of foods are calculated by dividing the "point value" of the food by a divisor for the particular preservative. Thus: Max. amt. preserv. in mg./100g. food

$$= \frac{\text{Point value of food}}{\text{Divisor for preservative}}$$

Point values for food classes are: (*a*) unsterilized fish products, cold-prepared, 750; boiled or fried, etc., 550; (*b*) fish pastes and similar, 1,650; (*c*) fish snacks ("gabelbissen"), 3,300; (*d*) margarine, 1,340; (*e*) sliced breads such as "Simonsbrot", 670; (*f*) veg. and mushroom preserves, 1,000; (*g*) raw fruit juice, incl. jelly juice and liquid pectin, 1,000; (*h*) fruit pulps and fruit marc, 1,000; (*i*) jams, preserves and fruit butters, 500; (*k*) dried fruit, 1,000 (only SO_2); (l) walnuts and almonds, 160 (only SO_2); (*m*) liquid and paste fillings for sugar confectionery, 1,000; (*n*) mustard, spiced sauces and similar, 1,000; (*o*) mayonnaise, veg. salad (also with meat or fish fillings), 1,340; (*p*) liquid egg yolk, 6,700; (*q*) coffee and tea extracts, 1,670; (*r*) essences, flavours and flavouring bases, 1,000; (*s*) gelatin-containing coatings, 1,340. Divisors for preservatives are: formic acid 25%, 1.0; propionic acid, 1.7; formic acid 10%, 4.0; benzoic acid, 6.7; SO_2, 8.0; p-chlorbenzoic acid, 8.4; p-oxybenzoic acid, 8.4; ethyl, propyl, butyl esters of p-oxybenzoic acid, 10; sorbic acid, 10; hexamethylenetetramine, 13 (only in fish products); also the sod., potass. and calc. salts of above acids, in strict equivalence. The following are allowed as synergistic preservs.: phosphoric, acetic, lactic, tartaric and citric acids and their sod. potass. or calc. salts. Mixed preservatives may be used if total does not exceed "points value". Carry-over in compounded food in proportion, except that no preservatives permitted in infant or dietetic foods.

COLOURING MATTERS

The colours shown in Tables, pp. 806-812, are permitted in foods, as well as the "natural" colours. Added colours are prohibd. in: meat and meat products, fish and fish products, shellfish (except sea salmon, fish roe and anchovy paste), natural sausage casings (but artif. casings for durable-type sausage may be coloured).

SOLVENTS

Ethyl alcohol only.

BELGIUM

BEVERAGES, NON-ALCOHOLIC

Fruit Juices. From pressing of fruits with optional clarification. Optional: Sorbic acid, max. 0.1%, SO_2, max. 50 p.p.m. or ascorbic acid, max. 0.03% (not in citrus juices).

Soft Drinks. Sugars (sucrose, invert sugar, glucose, glucose syrup), min. 7% (5% if called "dry"), no min. if 75mg/l max. saccharin used. Ethanol, max. 5g/l, protein, max. 2%. Optional: ascorbic acid and sod. and calc. salts, max. 0.03%, citric, lactic, tartaric, malic acids and salts; benzoic and sorbic acids and salts, max. 0.01% total; dimethylpolysiloxane, max. 10 p.p.m.; CO_2; glyceryl esters of colophony, max. 150 p.p.m.; colours, see Tables, pp. 806-812. *Fruit Extract Drinks*: natural flavourings only and fruit or veg. extracts or

BELGIUM (cont.)

edible portions and juice. Optional: as for soft drinks and phosphor. acid, max. 600mg/l and caffeine, max. 150mg/l and caramel as only colour in cola-type drinks; quinine, max. 85 mg/l (if called "tonic" min. 40 mg/l and must be clear). *Fruit Juice Drinks*: fruit juice or equiv. conc. juice, min. 10%. If called "bitter" min. 40 mg/l quinine. Optional: natural flavouring only; quinine, max. 40 mg/l; otherwise as for soft drinks.

COCOA, CHOCOLATE AND SUGAR CONFECTIONERY

Chocolate. Total cocoa solids, min. 35% (43% if claim quality); fat-free cocoa solids, min. 14%; cocoa butter, min. 18% (26% if claim quality). Optional: lecithin, max. 0.5%; sucrose may be partly replaced by fructose, lactose, maltose, max. 5% or dextrose, max. 20% (declr. if more than 5%); spices, natural and nature identical flavourings (not those imitating choc. or butter fat), ethyl vanillin (declr.); *no* flour, starch, foreign fats; edible substances, min. 5% and max. 40% if in visible pieces, max. 30% if not visible, max. 40% if part visible and part not visible; surf. decorations, max. 10%.

Milk Chocolate. Total cocoa solids, min. 25% (30% if claim quality); milk solids, min. 14% (18% if claim quality); milk fat, min. 3.5% (4.5% if claim quality); sucrose, max. 55% (50% if claim quality); fat-free cocoa solids, min. 2.5%; total fat, min. 25%. Optional: as for chocolate.

Chocolate Couverture. Cocoa butter, min. 31%; fat-free cocoa solids, min. 2.5% (16% if claim dark).

Couverture Milk Chocolate. Fat, min. 31%, otherwise as for milk chocolate.

White Chocolate. Cocoa butter, min. 20%; milk solids, min. 14%; milk fat, min. 3.5%; sucrose, max. 55%.

Filled Chocolate. Chocolate portion, min. 25% of total weight.

Sugar Confectionery. Optional: lecithin, max. 0.5%; mono- and diglycerides (and acetic, citric, lactic, tartaric, diacetyltartaric esters), monoglycerides, acetylated monoglycerides, sucrose esters, sucroglycerides, max. 1%; sod. CMC, max. 0.5% (in addition to emulsifiers); agar, alginates (not propylene glycol alginate), pectin, carrageenan, gums (arabic, carob, guar, karaya, tragacanth); colours, see Tables, pp. 806–812; sorbic acid, max. 0.1% in fillings and decorations; acetic, citric, lactic, malic, tartaric acids and salts; flavours (propylene glycol, max. 0.1% from flavours); maltol, max. 0.025%, ethyl maltol, max. 0.005%; talc, max. 0.005%; release agents: spermaceti, beeswax, calc. magnes. stearate and carb., fats and oils; paraffin, max. 1% for coating marzipan figures and confectionery gums; shellac, max. 0.3% for glazing marzipan figures; SO_2 from glucose syrup used, max. 60 p.p.m.; sod. and calc. stearoyl lactylates, max. 0.5%.

DIETETIC FOODS

Labelling. Declr. name of product and term "dietetic" "for special diets" or "for babies", "for nursing infants" where appropriate, and metric net wt. or vol. in letters min. 2 mm. high on up to 200 g. or ml., 3 mm. on more than 200 to 2000 g. or ml. and 10 mm. on more than 2000 g. or ml.; dietetic characteristic of food making it different from usual food; according to purpose intended: total calories and calories of certain constits where appropriate per 100 ml. or g. or per serving; fat, protein, carbohydrate and principle non-energy units content; trace elements and other constits conferring dietetic property in g., mg. or i.u.'s; date of manufacture, coded or uncoded (on perishables and prods whose nutritional value liable to change declr. uncoded shelf life or date of manufacture and "eat by" date); storage instructions; name and address of manfr., imptr. or vendor. No ref. to therapeutic or prophylactic props.

FATS AND OILS

Antioxidants (not in butter or cocoa-butter): propyl, octyl, dodecyl gallates, BHA, BHT, max. 0.01% (0.4% for use in biscuits, cakes, rusks), tocopherols, max. 0.01% (max. 0.5% in oils) ascorbyl palmitate (max. 0.3%). In manuf. fats and margarine: lecithin, max. 0.2%; mono and diglycerides, monoglycerides, sucrose esters, sucroglycerides, max. 1% (no limit when for food industry); sorbic acid, max. 0.1% in fats and oils (not butter or cocoa butter). Dimethylpolysiloxane, max. 3 p.p.m. in frying oils.

Margarine. Optional: Vit. A, max. 30 i.u./g, vit. D, max. 3 i.u./g in margarine for direct consumption only; and as for fats and oils.

FISH PRODUCTS

Declar. of additions other than spices, herbs, flavourings, jelly with a gelatine or gelose basis, and smoke constituents. Labelling: kind of fish present.; kind of oil or fat used.

FLOUR AND FLOUR PRODUCTS

Flour. Loss at 100°C., max. 18%; ash, max. 1% of dry matter; gluten, min. 8.5% of dry matter. No artif. bleachers or bleaching treatment.

Alimentary Pastes. Declar. of constits. other than wheat, salt, egg. If presence of egg claimed, min. 5% egg yolk reqd. Labelling prescribed. Optional: lecithin (not if egg claimed); mono- and diglycerides, max. 0.3% (only if heated in a container). Soup noodles may be coloured.

Starches. Standards laid down for natural starches and modified starches.

Custard Powders, Pudding Powders. Edible starch powders with one or more of: sugar, salt, cocoa, coffee, nuts, flavourings, colourings, binding agents, harmless essences. Labelling: no declar. of ingreds. if container or package marked "Custard Powder", "Pudding Powder" (or equiv. French or Flemish descriptions), in uniform bold type min. 5 mm. high, prominent against background.

FRUIT AND VEGETABLE PRODUCTS

Dried Fruit. SO_2, max. 2000 p.p.m.

Dried Vegetables. Dry matter, min. 84%; ash insol. in HCl of strength 10 g./100 ml., max. 0.5% (celery leaves, leeks, 1%; chervil, spinach, parsley, 2%).

Jams. Total % dry matter to be min. 3% higher than % total sugars by analysis, calcd. as sucrose; % sugar used to be declar. (tolerance 1%). Optional: small amts. citric, tartaric, lactic acid; ascorbic acid and sod. and calc. salts, 300 p.p.m. max. if no SO_2 used; apple or currant juice, max. 20% of fruit used, or pectin to total content of max. 0.7% (as calcium pectate); permitted colour (declar.) "de fantaisie"; SO_2, max. 40 p.p.m.; sorbic acid, max. 0.1%. Labelling: net wt. on containers holding min. 45 g., max. 10 kg.; tolerance on

BELGIUM (cont)

10 containers 2%, on one container 5%. Mixed jams: fruit in largest amt. to be named first.

Fruit Jellies. Total % dry matter as for jams; % sugar to be declar. (no tolerance). Optional: as for jams. Labelling: as for jams.

GELATINE

Max. 25% ash, 200 p.p.m. SO_2, 1 p.p.m. arsenic, 5 p.p.m. lead, 50 p.p.m. zinc, 100 p.p.m. iron, 30 p.p.m. copper. Aerobic bacteria, less than 5,000/g.; *E.coli* less than 1/g.; *Salmonellae* absent in 20 g.; sulphite-reducing anaerobic spore formers, less than 10/g. Detailed labelling requirements.

MEAT PRODUCTS

Prepared and Preserved Meats. Optional: phosphates, max. 0.8% disod. diphos. or tetrasod. diphos. or hexasod. tetraphos., total phos. 0.8% (0.3% of which supplied by additives), water: protein ratio in meat prod., max. 4:1 (N × 6.25) (in meat preparations phosphates, max. 0.6% disod. diphos., tetrasod. diphos., pentasod. triphos. and hexasod. tetraphos. (max. 0.7%)); spices, herbs, eggs, gelatine, nitrates, max. 0.05% $NaNO_3$ or KNO_3, nitrites, max. 0.02% $NaNO_2$, added as pickling salt containing max. 0.6% nitrite; colours (declar.); flavours, condiments; whole or skim milk powder, max. 5%, farinaceous material which has min. 50% starch (starch in finished product, max. 5%, (total starch *plus* milk solids in finished product, max. 5%), no use of word "pure" if cereal, etc., added; ascorbic acid, max. 0.1% in fresh and processed meat; lactic, acetic, citric, tartaric acids, max. 0.1%; glutamates, max. 0.5%; inosinic and guanylic acids, max. 0.05%.

SPICES, CONDIMENTS, AND FLAVOURINGS

Mustard Flour. Black or white mustard only. Ash insol. in 10% HCl, max. 1%.

Mustard or Table Mustard. Mustard flour with vinegar or a liquid containing acetic acid. Dry matter, min. 20%. In dry matter: NaCl, max. 20%; chlorine-free ash, max. 8%; sand, max. 1%; mustard oil (in salt-free dry matter), max. 20% Optional: wine, salt, sugar, turmeric (other colours require declar. "coloré"), spices and aromatic plants and flavours derived from these, preservatives, benzoic and/or sorbic acids and/or SO_2 max. 250 p.p.m. Must not be enclosed in metal containers attackable by the acids present.

Dijon Mustard. Standard similar to Table Mustard.

Solvents. Ethyl alc.; glycerol; sorbitol; mannitol; mono-, di-, and triacetates. Propylene glycol, 0.1% max. in sugar and flour confectionery, biscuits, spiced bread and drinks only; *iso*propyl alcohol, 0.1% max. in flour confectionery, biscuits and spiced bread only.

SUGARS AND SUGAR PRODUCTS

EEC standards laid down for semi-white, white, refined sugar, sugar and invert sugar solutions, invert sugar syrup, dextrose monohydr. and anhydr., glucose syrup and dried gluc. syrup. Standards also for powdered, caster and icing sugar, powdered dextrose, candy sugar, syrup and cassonade, molasses, cassonade, fructose, lactose and crude glucose. SO_2, max. 15 p.p.m. in sugar, 40 p.p.m. in glucose syrup (400 p.p.m. in gluc. syrup for sugar confy.).

VINEGAR AND VINEGAR PRODUCTS

Vinegar. Acetic acid, min. 3 g./100 ml. Optional (declar.); colouring, spices, salt. *Wine vinegar:* volatile acid, min. 6% (as acetic); chloride free ash, min. 0.1%; ratio volatile acid to total solids, max. 8. SO_2, max. 50 mg/l. *Spirit vinegar:* declar. of acetic content in g./100 ml.; tolerance 5%.

Mayonnaise. Veg. oil, 80%; egg yolk, min. 7.5%. Optional: vinegar, seasonings, fruit juice, sugar, spices, flavourings, colouring (if synthetic, declar. "artif. coloured"; if natural, declar. "coloured"). Preserv., SO_2 from ingreds., sorbic and benzoic acids, max., 0.1%.

Mayonnaise-type products, lower grade. Veg. oil, min. 50%; egg yolk, min. 4.5%. Opt.: permitted emulsifiers Otherwise as for mayonnaise. Label must state "this product is not mayonnaise" followed by trade name, or the word "substitute".

FOOD ADDITIVES

Permitted list established in 1967 together with foods to which they may be added. List amended frequently.

Colours. See Tables, pp. 806-812.

Antioxidants. See under "Fats and Oils".

Preservatives. Benzoic, sorbic, sulphurous, and propionic acids and their salts, pimaricin, nisin, diethylpyrocarbonate, hexamethylenetetramine, formic acid.

Thickeners. Natural gums, pectic acid and pectates, alginates, cellulose ethers, carrageenins, agar.

Emulsifiers. Lecithin; mono- and diglycerides, esterified or not with acetic, lactic, citric, tartaric and diacetyl tartaric acids; monoglycerides; acetoglycerides; sucrose esters, sucroglycerides; sod. and calc. stearoyl lactylates.

Sweeteners. Saccharine and its K, Na or Ca salts (only in beer and soft drinks).

Acids and Salts. Acetic, citric, lactic, malic, tartaric, ortho phosphoric acid and their salts; Na and K di- and tri-phosphates, nitrites, nitrates.

Flavour enhancers. Glutamic, inosinic, guanylic acids and Na and K salts, veg. protein hydrolysates, maltol, ethyl maltol.

Coatings and glazes. Waxes (coffee only); spermaceti, paraffin; shellac (marzipan figures only).

Anticaking agents. In salt: silicic acid, Na and NaCa silico aluminates, Ca and Mg stearates, silicates, and carbonates, Ca phos., max. 1%, K and Na ferrocyanides, max. 0.001%. In icing sugar: Na and NaCa silico aluminates, tricalc. phos., max. 1%. In powdered coffee for vending machines: silicic acid, Na and NaCa silico aluminates, Ca, Mg and Al stearates, max. 0.5%. Talc, max. 0.005% in sugar and flour confectionery, max. 2.7% in chewing gum, max. 1% for coating rice. Tricalc. phos., max. 0.75% in starch for dusting moulds and slabs for sugar and flour confectionery, max. 0.1% in milk powder for vending machines.

PACKAGING MATERIALS

Articles and materials intended to come into contact with food must be registered for approval.

CYPRUS

Regulations similar to but not identical with U.K.

DENMARK

BEVERAGES, NON-ALCOHOLIC

Fruit Juices. Water in technically necessary amts. (max. 20%) may be used in prepn. of berry juices (not apple). May be prepd. from concd. juice, but declar. of proportion of dry matter therefrom if this proportion exceeds 20%. Alcohol, max. 2% (0.5% in apple juice for direct consumption). Optional: Calc. carb., chloride; citric acid and citrates; preservatives: benzoic acid and salts, max. 200 p.p.m., p-hydroxybenzoic acid esters and sod. salts, max. 200 p.p.m., formic acid and salts, max. 100 p.p.m., sorbic acid and salts, max. 500 p.p.m., SO_2, max. 50 p.p.m.; ascorbic acid and salts, max. 200 p.p.m.; colours: Allura Red, max. 30 p.p.m., Ponceau 4R, max. 10 p.p.m. (citrus juice also Carotenoids, Chlorophyll, max. 10 p.p.m. and Tartrazine, max. 150 p.p.m.; strawberry and blended juice also Bril. Blue FCF, and Tartrazine, max. 30 p.p.m.); dimethylpoylsiloxane, max. 10 p.p.m.; mono- and diglycerides; pectin. Apple juice: sol. solids, min. 10% (refract.); may be pressed from apples mixed with max. 5% pears. To rhubarb juice must be added calc. salt sufficient to ensure that in finished juice no water-sol. oxalate, and max. 5 g./litre water-sol. calc. salt (as $CaCl_2$). Labelling: must show degree of dilution for prepn. of a drink.

Sweetened Fruit Juices. As for Fruit Juices, with added sucrose, glucose or saccharin, max. 125 p.p.m. (declar. of this). Sol. solids, max. 60% (refract.).

Concentrated Fruit Juices. Fruit juice with part or whole of water content removed by evapn. or freezing. Labelling: must show degree of concn.

COCOA, CHOCOLATE, AND SUGAR CONFECTIONERY

Cocoa Nib. Shell and germ, max. 6% of dry, fat-free cocoa.

Cocoa Mass. Shell and germ as for cocoa nib. Optional: pure veg. lecithin; neutralization of free acids by hydroxides, carbonates or bicarbs. of ammon., sod., potass., calc., or magnes., leaving ash max. 14% of fat-free dry matter.

Cocoa Powder. Fat content must exceed 20%; if from 10% to 20% (inclus.) must be called "non-fat" or "weak"; if below 10%, designation "very weak". Shell and germ as for cocoa nib. Labelling: net wt. in g. or kg. on retail packs, in type min. 2 mm. high, near to but clearly separate from other matter: if on bottom, an indication of this to be given with the other matter; containers of 5 kg. and over require declar. of percent. cocoa butter.

Chocolate, Chocolate Coating, etc. Sugar, max. 65%. Optional: lecithin mono- and diglycerides, ammonium phosphatides (max. 0.7%), polyglycerol esters of castor oil fatty acids (only to choc. with less than 27% total fat, max. 0.7%), sorbitan esters, max. 0.5%, polyoxyethylene (20) sorbitan esters, max. 0.5%; benzoic acid and salts, max. 0.1%; max. 5% of refined, hardened or unhardened veg. fats (except those containing fatty acids below C_{13}); max. 5% of full cream or skim milk solids, cream solids, nuts, fruits, honey, biscuit and the like. If more than 5% nuts, etc., must be appropriately designated, *e.g.*, "almond chocolate", "chocolate with almonds", etc. Labelling: as for cocoa powder, but if net wt., can only be given on bottom, this need not be referred to elsewhere.

Milk Chocolate, Cream Chocolate. Cream, full milk, and skim milk solids must exceed 5%.

Covered Goods (except ice cream). If description "chocolate confectionery" or the like used, must be coated with chocolate to above standard.

Diabetic Chocolate. Standard as for chocolate, with sugar replaced by sorbitol, mannitol, saccharin, sucaryl, or other artif. sweetener approved by the Min. of Interior (declar. in Scandinavian type, min. 3 mm. high).

Sugar Confectionery. Optional: ammon. chloride, max. 15%; ammon. hydroxide, carbonates; citric, acetic, lactic, malic acids and salts; tartaric acid and salts, max. 0.1% (fruit caramels, max. 0.7%); phosphoric acid and salts, max. 0.1%; preservatives: benzoic acid and salts, max. 0.1%, p-hydroxybenzoates and sod. salts, max. 300 p.p.m., propionic acid and salts, max. 500 p.p.m., sorbic acid and salts, max. 0.15%, SO_2, max. 100 p.p.m.; ascorbic acid and salts, max. 200 p.p.m., BHA, BHT, gallates, max. 20 p.p.m., tocopherols, max. 0.1%; magnes. stearate; silicon dioxide, max. 0.2%. Colours: alumin., gold, silver for surface only, Bril. Blue FCF, Carotenoids, Chlorophyll, Cu Chlorophyll, Allura Red, Sunset Yellow FCF, mx. 300 p.p.m., Erythrosine, Fast Green FCF, Green S, Indigo Carmine, Tartrazine, max. 200 p.p.m., Patent Blue V, max. 150 p..pm., Black PN, Ponceau 4R, max. 100 p.p.m., ammoniated Caramel, max. 2%, Canthaxanthin, max. 0·2%, calc. carb., Veg. Carbon, iron oxides and hydroxides, Caramel, titanium dioxide. Gum arabic, guar, lecithin, mono- and diglycerides and their esters, pectin, modified starches. Agar, alginates, carrageenan, furcelleran, tartaric acid esters of mono- and diglycerides, propylene glycol esters, sorbitan esters, max. 0.5%. Cellulose ethers, max. 1%, microcrystalline cellulose. Polyoxyethylene (20) sorbitan esters, max. 0.1%; propylene glycol alginate, stearoyl lactylates, max. 0.3%; tragacanth, max. 2%; glycerol, sorbitol, mannitol (as emulsifiers), max. 10%. Sweeteners: mannitol, sorbitol, only to throat pastilles, saccharin and salts, max. 400 p.p.m. Dimethylpolysiloxane, max. 10 p.p.m. Chewing gum: additives only with permission.

EDIBLE FATS AND OILS

Moisture, max. 0.5%. Optional: (not butter): BHA, BHT, gallates, max. 100 p.p.m.; ascorbic acid and salts, max. 200 p.p.m.; ascorbyl palmitate, max. 80 p.p.m.; tocopherols, max. 0.1%; citric, lactic acids and salts; o-phosphoric acid and salts, max. 100 p.p.m.; colours as for margarine; lecithin, mono- and diglycerides and their esters; tartaric acid esters of mono- and diglycerides, propylene glycol esters, max. 0.5%; polyglycerol esters, max. 0.2%; sorbitan esters, max. 1%; calc. disod. EDTA, max. 25 p.p.m.; dimethylpolysiloxane, max. 10 p.p.m.; oxystearin, max. 0.125%. Labelling: indication of animal or plant from which derived (except for certain accepted names of unmixed animal fat materials). Imports to be marked as foreign.

Margarine. Optional: citric, lactic, tartaric acids and salts; sod. carb. and hydrox.; o-phosphoric acid

DENMARK (cont.)

and salts, max. 100 p.p.m.; colours: Annatto, max. 200 p.p.m., Carotenoids, max. 100 p.p.m., Curcumin, max. 50 p.p.m., total colours, max. 300 p.p.m. Glyceryl esters of the thermally oxidised soya oil, tartaric acid esters of mono- and diglycerides, propylene glycol esters, max. 0.5%; polyglycerol esters, sorbitan esters, max. 0·2%; lecithin, mono- and diglycerides and their esters; antioxidants from animal fats used. Bakery margarine: as for margarine and polyoxyethylene (20) sorbitan esters, max. 0.5%, propylene glycol alginate, max. 0.3%, propylene glycol esters, max. 2%, sorbitan esters, max. 0.05%, sucrose esters, max. 0.2%.

FISH PRODUCTS

Labelling: net wt. (incl. oil or tomato; but not soup, coatings, etc.); name of country where prepared; week or month and year of prepn. (in code if Min. of Fisheries notified). Non-sterilized products to be marked (in a Scandinavian language) "to be kept cool".

FLOUR

Wheat Flour. Reqd. additions, per kg.: 5 mg. thiamin, 5 mg. riboflavin, 30 mg. iron (ferrum reductum), 5 gm. calc. carbonate. Optional: ascorbic acid, max. 200 p.p.m.

No addition of persulphate (Rothenfüsser test prescribed).

FRUIT AND VEGETABLE PRODUCTS

Jams, etc. Soluble solids by refract., min. 50%. Optional: calc. carb.; calc., potass. chloride; citric, acetic, lactic, malic acids and salts; sod. hydrox.; tartaric acid and salts, max. 0.1% (0.2% to raspberry, 0.5% to citrus); o-phosphoric acid, max. 0.5%; benzoic acid and salts, max. 500 p.p.m., p-hydroxybenzoates and salts, max. 300 p.p.m.; formic acid and salts, max. 100 p.p.m., propionic acid and salts, max. 0.1%, sorbic acid and salts, max. 0.1%, SO_2, max. 100 p.p.m.; ascorbic acid and salts, max. 300 p.p.m. Colours: Black PN, Ponceau 4R, max. 100 p.p.m., Carmoisine, Patent Blue V, max. 150 p.p.m., Erythrosine, Fast Green FCF, Green S, Indigo Carmine, Tartrazine, max. 200 p.p.m., Bril. Blue FCF, carotenoids, chlorophyll, Cu chlorophyll, Allura Red, Sunset Yellow FCF (total of all these colours, max. 300 p.p.m.) and Canthaxanthin, max. 0.2%, ammoniated caramel, max. 0.4%, veg. carbon, caramel. Agar, alginates, carrageenan, furcelleran, cellulose ethers, max. 1%; carob gum, tragacanth, max. 2%; guar gum, pectin, modified starches, microcrystalline cellulose, calc. o-phosphates; xanthan gum, max. 0.5%; mannitol, sorbitol, max. 5%; saccharin and salts, max. 400 p.p.m.; dimethylpoylsiloxane, max. 10 p.p.m.; mono- and diglycerides. Labelling: country of manufacture, name and address of manufacturer, exporter or importer; name of product; net wt. (or, in containers of more than 2 kg., gross wt., if stated as such).

Dried Fruits. SO_2, max. 1000 p.p.m.

Dried Vegetables. Optional: SO_2, max. 1000 p.p.m. (flakes, potato flakes, granules, max. 200 p.p.m.); ascorbic acid and salts, max. 0.2%; BHA, BHT, only to potato flakes, granules, powder, max. 200 p.p.m.; citric acid and salts; mono- and diglycerides; tetrasod. pyrophos., max. 0.3%; stearoyl lactylates, max. 0.2%.

MEAT PRODUCTS

Optional: calc. chloride; HCl; acetic acid and salts; nitrates, max. 500 p.p.m. as KNO_3 only to salted meat products not heat treated nor hot smoked to temps above 60°C; nitrites, max. 200 p.p.m. only in form of nitrited salt; sorbic acid and salts, max. 0.1% only to goose liver pie and smoked sausages; BHA, BHT, gallates, max. 50 p.p.m. with citric and lactic acids and their salts. Colours: Riboflavins, max. 50 p.p.m., curcumin, max. 100 p.p.m., Ponceau 4R, max. 100 p.p.m. (250 in smoked sausages); Annatto, Erythrosine, max. 200 p.p.m., Sunset Yellow FCF, Carotenoids (all these colours, total max. 300 p.p.m.) and Veg. Carbon., Caramel (ammon. Caramel, max. 0.4%). Agar, alginates, carrageenan, furcelleran, cellulose ethers, lysine hydrochloride, sod. glycinate, phosphates, tartaric acid esters of mono- and diglycerides, max. 0.5%; carob gum, tragacanth, max. 2%; gum arabic, guar, mono- and diglycerides and their esters, microcrystalline cellulose, pectin, modified starches. Monosod. glutamate, max. 0.3%; sod. inosinate and guanylate, max. 50 p.p.m.; ascorbic acid and salts, max. 500 p.p.m.; isoascorbic acid and salts; glucono-delta-lactone, max. 0.8%; sorbitol, max. 5% only to goose liver pie. Sausage skins: glycerol, lactic acid, sod. sulphate.

VINEGAR

Acetic acid, min. 40 g., max. 150 g./litre. Optional: Caramel (ammon. caramel, max. 0.4%); preservatives only to vinegar with acidity max. 8%: sorbic acid and salts, max. 400 p.p.m., SO_2, max. 200 p.p.m.

ADDITIVES

FINLAND

ADDITIVES

A list of permissible additives is in force (preservatives, colouring matters, antioxidants, emulsifiers, stabilisers, etc.), which includes all the usually acceptable substances, some with max. limits, and some restricted to particular foods.

BEVERAGES, NON-ALCOHOLIC

Fruit Drink. Fresh, preserved, conc. juice, natural extracts of fruit, spices. Optional: sugar, honey, glucose, fructose, glucose syrup; CO_2; *no* alcohol; colours (declr.) (see Tables pp. 806–812); 0.05% max. alkyl gallates; 0.02% max. ascorbic acid and sod. ascorbate; 0.02% max. BHA, BHT; 0.01% max. SO_2; 0.005% max. lecithin; 0.002% max. polyoxyethylene (8) monostearate; 0.002% max. polyoxyethylene (20) sorbitan monostearate; 0.04% max. sucrose acetate hexaisobutyrate; 0.15% max. benzoic acid and sod. benzoate; 0.1% max. p-hydroxybenzoic acid esters and sod. salts;

0.1% max. sorbic acid and potass. and sod. salts; antifoam agents (dimethylpolysiloxane, fatty acid esters of monoethylene and diethylene glycol); 0.015% max. caffeine and 0.06% max. phosphoric acid in cola drinks; nat. flavourings; 1% max. citric, lactic, malic acids and calc., potass. and sod. salts; 0.01% max. quinine and salts (declr.); solvents (for flavourings): ethyl acetate, ethanol, glycerol and its acetates, *iso*propyl alcohol, edible oils (no mineral oil), propylene glycol); agar, alginates, CMC, carrageenan, cellulose ethers, gelatine, guar gum, gum arabic, carob gum, pectin, tragacanth; 0.5% max. tartaric acid and salts; vanillin, ethyl vanillin. Labelling: if only juice used and min. 10% juice present may call it fruit juice drink and state name of fruit. Declr. extracts if used.

Lemonade-type Beverages. Artific. flavourings as well as or in place of fruit juice. Optional: sugar, honey, glucose, fructose, glucose syrup; CO_2; magnes., potass. and sod. carbonates and bicarbs; calc. and sod. chloride; magnes., potass. and sod. sulphates; potass. and sod. tartrates; and additives as for "Fruit Drink". Labelling: name of product must include word "Lemonade", may use name of fruit etc. imitated. Declr. artific. flavour, colour, quinine.

FRUIT AND VEGETABLE PRODUCTS

Jams. Min. 30% fruit. (Marmalade, min. 25% citrus fruit.) Jams of named fruit allowed max. 2.5% of other fruit. Jam with 10% or more of other fruit must be labelled with names of both fruits with that of greater quantity placed first on label. Wt. ratios of fruit must be stated. Artif. colour to strawberry, raspberry and cherry jams only (decl.). Optional: alginates, carrageenin and pectin, max. 0.7%; citric, lactic, tartaric acids and sod., potass. and calc. salts, max. 0.5%; Ca chloride, max. 0.05%; benzoic acid and sod. salt, max. 0.15%; p-hydroxybenzoic acid esters and sod. and potass. salts, max. 0.1%; sulphurous acid and calc., sod. and potass. salts, max. 0.08%; sorbic acid and potass. and sod. salts, max. 0.1%; ascorbic acid, max. 0.2%; antifoam agents (as for fruit drink), max. 0.01%; HC1 for pH adjust. of dried fruit jams.

MEAT PRODUCTS

Permitted additions as follows: smoke flavour only with permission; ascorbic acid and sod. salt, max. 0.2%; erythorbic acid and sod. salt, max. 0.2%; sod. and potass. nitrate, max. 0.05%; sod. nitrite, max. 0.015%; calc., potass. and sod. phosphates, max. 0.15% as P_2O_5.

Canned Meat Products. Optional: all those additives listed for meat products (phosphates, max. 0.2%) plus agar, alginates, CMC, carrageenin, max. 1.0% (in sauces); citric, lactic, tartaric acids and salts, max. 0.4%; acetic acid; alcohol, max. 2.25%; gelatine; sod. glutamate, max. 0.2%; protein hydrolysates, max. 1.0% (for sauces).

ANTIOXIDANTS

Fats and Oils. Alkyl gallates, max. 0.01%; B.H.A., max. 0.02%; B.H.T., max. 0.02%; tocopherol, max. 0·03%; sod. erythorbate, max. 0.02%; ascorbic acid, max. 0.02%; ascorbyl palmitate, max. 0.02%.

COLOURING MATTERS

See Tables, pp. 806-812.

FRANCE

BEVERAGES, NON-ALCOHOLIC

Fruit Juice. Pressed juice with no fermentation. Four grades: (1) *fresh* (no treatment whatever after expression); (2) *pure* (no added subst. at all); (3) *sweetened* (added sugar, max. 50 g./litre of juice—but not to grape juice); (4) *sugared* (added sugar, max. 100 g./litre of juice—declar. of amount). Juice for grades (2), (3), (4), may be filtered, centrifuged, clarified with usual harmless agents (if compn. not modified), and aerated. Mixtures must have dominant juice named first, and all in identical lettering. Alcohol, max. 1%. No addition of water, alcohol, chem. preserv., or acids. Preserv. treatments: pasteurization, refrigeration, metallic ionization, [grades (3) and (4)] impregnation with CO_2, or SO_2 max. 100 mg./litre. Optional [grades (3) and (4)] : added flav.; salt, max. 1 g./litre (more if declar.). Labelling: net vol. of contents in centilitres (if 1 litre or less); in litres (if over 1 litre).

Concentrated Fruit Juice. Degree of concn. to be shown in figures as fraction to which initial vol. reduced.

Fruit Syrups. Fruit juice with sugar or sugar syrup, and additions as follows: *citron*, *lemon*, and *orange* syrups: citric or (temporary) tartaric acid and alc. extr. of fruit or fruit essence; *grenadine* syrup: citric or tartaric acid and veg. extr. flavouring; *orgeat* syrup: almond essence; *moka* or *coffee* syrup: coffee extr. If glucose used to replace part of sugar, description "fantaisie" reqd. Optional: ascorbic acid, max. 300 p.p.m., permitted natural and synth. colours (not to blackcurrant. sweet cherry, gooseberry, raspberry) if declar. "coloured" or "fantaisie". If chem. flav. added, even as part of flav., declar. "artificial" reqd.

COCOA, CHOCOLATE, AND SUGAR CONFECTIONERY

Cocoa Paste. Shell and germ, max. 5% on fat-free dry matter. Alkalization with ammonia, alkali carbonate, or ammon. carbonate, max. 4 g. (as K_2CO_3) per 100 g. of fat-free dry matter; product must remain slightly acid. Alk. products must be described "solubilisé", must not be described as "pure".

Cocoa Powder. Fat, min. 18% of dry matter.

Cocoa Butter. May be extracted by solvents: petroleum 60/80, trichlorethylene, cyclohexane, ethyl or isopropyl alcohol; no trace to remain in fat. May be refined, neutralized, decolorized and de-odorized. Acidity, max. 5% (as oleic acid).

Chocolate. Cocoa paste, min. 35%; cocoa butter, min. 18%. Solubilized paste to be declar., and no use of word "pure".

Sweetened Cocoa, Chocolate Powder. Cocoa powder (as above defined) min. 32%. Declar. if solubilized, and no use of word "pure".

Cooking Chocolate. Sugar, min. 57%, max. 65%; cocoa paste, min. 35%, max. 43%; cocoa butter, min. 18%. Tablet sizes, only 125, 250, 500 and 1000 g.

Eating Chocolate. ("Choc. à croquer".) Sugar, max. 57%; cocoa paste *plus* cocoa butter, min. 43%; total cocoa butter, min. 26%.

Fondant Chocolate. Sugar, max. 52%; cocoa paste *plus* cocoa butter, min. 48%; total cocoa butter, min. 32%.

FRANCE (cont.)

Milk Chocolate. Sugar, max. 50%; cocoa paste *plus* cocoa butter, min. 25%; total fat, min. 26%; milk solids (containing min. 24% fat), min. 16%.

Chocolate with Ground Nuts, Ground Almonds. Sugar, max. 50%; cocoa paste *plus* cocoa butter, min. 50%; hazels or almonds, min. 16%; total fat, min. 26%.

Products "au Chocolat", "au Cacao", or similar. Only as in above definitions or: cocoa paste or powder, min. 35% ("solid" products), 32% (powders), 6% (liquid or semi-liquid).

Products "Chocolaté", "Cacaoté", or similar. Cocoa paste or powder, min 20%.

Products "parfum chocolat", "parfum cacao". In describing products below above standards, these terms only must be mentioned.

Couverture of goods described as "au chocolat". Only eating choc., fondant choc., and milk choc. as above. May contain max. 5% of ground hazels, ground almonds, honey, or coffee extract. Declar. (nature and %) of any other addition.

Optional Additions to above Cocoa and Chocolate Products. Natural or artif. flavours (declar. of latter; if vanillin "vanilliné"; artif. coumarin prohibited); other edible subst. than sucrose (declar., with % if intimate incorporation) including sorbitol (max. 5%); glazing with shellac or gum benzoin; veg. lecithin, max. 0.2% actual phospholipids. Sucroglycerides permitted.

Imitation Chocolate Products. Declar. of ingreds., in decreasing order of amt.

Tablets (other than cooking choc.) 40 g. or less, 100, 125, 200, 250, 500, and 500 g. only. Prescribed labelling, with size of type.

Sugar Confectionery. If flav. partly artificial, and name of a natural flav. or flav. fruit appears, declar. "artificial flavour" reqd. Sorbitol, max. 5% permitted. Carrageenates, alginates, pectins and sucroglycerides permitted. No use of word "butter" where product made entirely or in part by use of other fats. Diacetyl an acceptable artif. flav. Artif. coumarin prohibited. Talc for dusting, max. 0.1%. Traces of wax, starch, veg. or pure mineral oil allowed for greasing surface of utensils in manufacture. Drages and pralines: starch, dextrin or other starch products allowed in covering, max. 4%; if more, name such as "dragées-fariné", "demi-fariné" reqd. In gum or albumen products, gelatine, gelose, starch, etc., may be substituted if word "gum" not used but description "fantaisie" included. Liquorice products: parts containing liquorice, min. 4% of liqu. juice. Metallic decorations for confectionery: pure gold, silver, or alumin. only. Nuts may be bleached on surface with min. amts. hypochlorite provided no penetration.

Liquorice Juice. Moisture max. 15%, glycyrrhizin, min. 6%. Optional: sugars, gum (but must not then be called "pure"). If sugars, gum, starch, dextrin added, with min. 1.5% glycyrrhizin, name must show nature of added material.

DIETARY FOODS

Compositional and labelling requirements laid down for low-carbohydrate and vitamin- and amino acid-supplemented foods.

Labelling requirements for dietetic foods and foods for special diets laid down.

FATS AND OILS

Edible Fats. Optional (to fats solid at 15°C.): glycerol mono- and/or distearate, max. 2%; ascorbic acid, max. 0.03% (no use of word "pure" with these additions), cochineal or veg. colours (except to margarine). Sucroglycerides permitted. Treated fat must contain no alk. salt or toxic subst. (See also under "Antioxidants".)

Vegetable Oils. Detailed standards including refining procedures, container sizes, labelling.

FISH PRODUCTS

Fish Preserves. All imports to show country of origin, stamped in relief, or impressed in the middle of cover or bottom, in plain Roman lettering, 4 mm. height, upon a part with no other impression. Officially approved "certificate of control" reqd. Detailed standards for packing of sardines, herring pilchards, marinated herrings, smoked herring fillets in oil, mackerel, tunny, and for packing sauces (tomato, marinated, flavoured, "natural", oil, and combinations of these). Very detailed descriptive labelling reqd. (incl. precise name of fish, description of sauce, etc., capacity and net wt., year or season or code mark of manufacture, etc.).

Caviare and Substitutes. Preservs.: hexamethylene tetramine, sod. benzoate; may be used together, each to max. 1000 p.p.m.

FLOUR AND FLOUR PRODUCTS

Wheat Flour. Ash, max. 0.65%, acidity, max. 0.04% (as H_2SO_4), both on dry matter; sieve test: min. 95% through 0.2 mm. openings. Moisture, max. 16% at standard price, with price abatement if higher. Optional for prevention of "rope" in exceptional cases: acid. sod. phosphate, max. 0.7%; lactic acid, max. 0.3%; vinegar, max. 3%; acetic acid, max. 0.2%; calc. acetate, max. 0.43%. Improvers prohib.

Baker's Confectionery, Biscuits. May be coloured only with listed natural colours or with Tartrazine, Sunset Yellow FCF or Ponceau 4R. Cake decorations may be coloured with listed natural and synthetic colours.

Biscuits. Optional: sorbitol, max. 5%; magn. carbonate, max. 0.5%; carrageenates, alginates, pectins, sucroglycerides; mono and diglycerides, max. 1% of flour.

Alimentary Pastes. From hard wheat and derived products (negative to Matveef test). Ash, min. 0.55%, max. 0.80% (superior quality), max. 1.30% (normal quality); acidity as sulphuric (prescribed method), max. 0.05% (superior), 0.07% (normal quality); nitrogenous, min. 10.5% (superior), 11.0% (normal); all on dry matter. Moisture, max. 12.5%. No colouring allowed under revised regulations. Optional: ascorbic acid as antioxidant.

Cake Flours. Chem. raising agents may be used in admixture with flour.

Cold-Mix Dessert Powders. Optional stabilisers: sod. or potass. ortho- or pyrophosphate, max. 0.5%; calc. lactate, max. 0.5%. Sucroglycerides permitted. Labelling: statements of composition and net wt.; clear notice that the milk used with the product must have

FRANCE (*cont.*)

been previously boiled for at least 5 mins. and then kept free from all contamination; and that the prepared dessert should be consumed as soon as possible.

Soups. Veg. or converted veg. materials such as leguminous or cereal flours, starches and pastes, with salt.

FRUIT AND VEGETABLE PRODUCTS

Canned Fruits, Canned Vegetables. Labelling of imports: name and address of manufr. or seller (in latter case, a mark identifying manufr. reqd.), date of manuf., name of article (and list of ingreds. in decreasing order, if not clear from name), name of country of origin (in min. 4 mm. lettering), net wt. of drained contents (or in some cases, no. and size of pieces). Date may be in code, provided latter disclosed to Service de Répression des Fraudes. Date mark and country of origin to be embossed or indelibly inscribed on container; country of origin on label also.

Cooked Beetroot. Potass. sorbate, max. 500 p.p.m. when sold.

Crystallized Fruits. SO_2 may be used in preparing the fruits.

Dried Fruits. SO_2, max. 2000 p.p.m. on dry matter when sold.

Jams, Jellies, Marmalade. If styled "confiture," with the words "pur fruits et sucre", fruit and refined sugar only to be used; max. water content of finished product, 40%. Fruit in SO_2 may be used if no trace remains in the jam. If pectin or apple juice added, must be described as "fruit et pommes"; if refined sugar used, words "pur sucre" may still be included in designation. Apple and other fruit mixtures must be described as "pomme et fruit". Optional (if not described as "pure fruit" product): citric or tartaric acid, (declar. "acidulé" or "fantaisie"); permitted natural colouring matter (see under "Colouring Matters"; declar. "coloré" or "fantaisie"); glucose (declar. "glucosé" or "fantaisie"); pectin (no declar.); agar, gum or starch (declar. in name of product). If contains colour, acid, art. flavour may not use name of fruit and must call it "artificiel".

MEAT PRODUCTS

Canned Meats. Labelling: as for Canned Fruits. "Semi-Conserves" to bear instruction to store cold, with date by which to be consumed, in lettering min. 4 mm.

Charcuterie Products. (except brined products). Optional: phosphates or polyphosphates of sodium or potass., max. 0.3% (as P_2O_5) (the purity of these additions is requd. to be: arsenic, max. 10 p.p.m.; fluorine, max. 30 p.p.m.; lead and other metals precipitable by H_2S, max. 10 p.p.m.; barium, max. 20 p.p.m.), ascorbic acid and sod. salt, max. 30 p.p.m., lactose, lactic acid cultures, natural colourings, special empyreumatic products.

Preserved Meats. Salt used may contain max. 10% nitrates, mag. carb. (max. 2%), Na. monoglutamate (max. 0.2%)*, Ca. triphosphate (max. 2%). Nitrite, max. 150 p.p.m. in product.

Meat Pastes. Amylaceous material, max., without declar., 5%; declar. if over 5%; amount to be stated if over 10%. Part or all of starch may be replaced by alginate, carragheenate or carob gum (0.5% algin. or carragh., or 1% carob, guar. flour equiv. to 5% starch); if over 5% equiv. starch, declar. "alginé," "gélipé", or similar (if starch present, also "amylacé" or "feculé").

* no limit from March 1976

Paté de Foie Gras. Max. 25% of subst. other than goose or duck liver (not including fat added for compounding or covering).

Bouillons (not incl. fish products). Animal or veg. extracts with salt, spices and flavours. Optional: veg. colouring or caramel. In soluble portion of amt. intended for making 1 litre of soup: salt, max. 10 g.; total nitrogen, min. 0.4 g.; min. 30% of total nitrogen as amino nitrogen; max. 12% of total nitrogen as ammon. nitrogen (15% if amino nitrogen over 40%); (if presence of meat extract claimed) min. 1 g. meat extract containing min. 0.05 g. creatinine; (if presence of poultry claimed), min. 1 g. poultry extract, or this partly or wholly replaced by same wt. poultry fat or by 3 times wt. of dehydrated poultry meat. Labelling: list and wts. or percentages (on dry basis) of ingreds. in descending order (but salt last); wt. or vol. reqd. for consumption or to prepare portion(s) of ¼ litre (or a named vol.); net wt. or vol. of product.

Soup, Concd., Tablets, Powders (not including fish products). Veg., or converted veg. substances, *e.g.*, leguminous or cereal flours, etc., with salt. Optional: spices, flavours, "bouillon", veg. colouring or caramel. In soluble portion of amt. intended for 1 litre of soup: nitrogenous matter at least that reqd. in "bouillon", *or* a calorific value min. 180 calories, on basis of coeffs. 4 for protein and carbohydr., 9 for fat; (if meat extract claimed), 1 g. meat extract incl. min. 0.05 g. creatinine. Labelling: as for Bouillons.

MILK PRODUCTS

Condensed and Dried Milk. Optional: ascorbic acid, max. 0.03%. If for infants, may cont. lactic, citric acids, starch, glucose, fructose, maltose, lactose, honey.

Whipped Cream. Optional: nitrous oxide.

Processed Cheese. Optional: lactic, citric, tartaric, malic acids and their sod. salts, sod. ortho-, pyro-, meta-phosphates, sod. and calc. polyphosphates (total max. 3%), salt, sod. bicarb., calc. chloride (min. amts.), natural colouring.

SPICES, CONDIMENTS, AND FLAVOURINGS

Flavourings and Essences. Vehicles: water, ethyl and *iso*propyl alcohols. Antioxidants in essential oils: see under "Antioxidants".

Mustard Paste. Total solids content (incl. salt and sugar) according to particular commercial description. Liquids for dilution: grape juice, wines, vinegar, or mixtures of these, with up to 3 parts water. Optional: citric and tartaric acids, edible oil, turmeric, chlorophyll. Additional requirements for special types such as "Dijon", "forte", coloured mustards, flavoured mustards. Preserv.: SO_2, max. 500 p.p.m., or equiv. alk. bisulphite. Declar. of nature of liquid used for dilution.

Salt. Optional additions: Na aluminosilicate, magnesium carbonate, and/or tricalcium phosphate, total max. 2%; sod. monoglutamate, max. 20% (declar. of name and % of addition); Ultramarine or In-

FRANCE (cont.)

danthrene Blue for blueing; to table or cooking salt, sod. iodide, min. 10 p.p.m., max. 15 p.p.m. (special labelling including date [year and quarter] of manufacture).

Tenderizing Salt. Papain, min. 2%, max. 3%. Optional: as for Salt (except iodide), also spices, flavourings, sugar. Containers to be hermet. sealed, and net wt. of contents max. 250 gm.

Flavour enhancers.
Guanylic and inosinic acids and Na, Ca salts alone, or as mixture, max. 0·05% sod. glutamate, max. 0.2% (no limit from March 1976); ethyl maltol. Declar. all these.

Vanilla, etc. Sweetened vanilla powder: sugar, max. 75%. Vanilla sugar: sugar, max. 90%. Vanillin sugar; vanillin (natural or synthetic) min. 0.7%, or ethylvanillin, min. 2.0%. Declar. of compn., and of artif. flavour if all or part synthetic.

SUGAR PRODUCTS

Vanillin-sugar. Vanillin, max. 7 p.p.m.; ethylvanillin, max. 2 p.p.m.

Glucose Syrup. Water, max. 25%; dextrin max. 45%; ash, max. 1%; acidity, max. 0.2% as H_2SO_4.

VINEGAR AND VINEGAR PRODUCTS

Vinegar. Acetic acid, min. 6% (except vinegar from cider, wine or beer). Optional: caramel, cochineal, orchil colouring (declar.)

Mayonnaise. Veg. oil, min. 50%; veg. oil *plus* egg yolk, min. $66\frac{2}{3}$%.

ANTIOXIDANTS

To fats solely intended for food industries in unit quantities of min. 5 kg. may be added: propyl, octyl and dodecyl gallates, B.H.A. and B.H.T., and mixtures of these, max. 0.01% (declar. of name of substance and amt. added). Glycerol monopalmitate and monostearate, citric and ascorbic acid esters also permitted. To essential oils: as above, max. 0.1%. In lacquers, varnishes or wrappers destined to come into contact with foods: as above, max. 0.125%. Antioxidants must be chem. pure.

Ascorbic acid may be added as antioxidant to: conserves and frozen preparations of fruits, vegetables, meat and fish; edible fats; sauces and condiments; beers, syrups, soft drinks, mineral waters, and other non-alcoholic drinks; frozen eggs; products used in cereal industries; concentrated and powdered milks. Addition only in strictly necessary amts., and in any case max. 0.3 g. per kg. of product ready for sale. Labelling: no designation or wording suggesting therapeutic effect or vitamin enrichment.

COLOURING MATTERS

See Tables, pp. 806-812. The colours permitted in particular classes of foods are as follows: (1) Butter, cheese, flavoured yoghurts and milks, oils, fats (except margarine), soups, condiments, sauces (except mayonnaise), charcuterie products, salted food products, jams, jellies and marmalades: only natural colours. (2) Pastry confectionery, biscuits, ready mixes for desserts: natural colours and Tartrazine, Acid Yellow, Ponceau 4R. (3) Mustard (other than green mustard): chlorophyll, turmeric only. (4) Green tea: Indigotine, turmeric only. (5) Vinegars: caramel, cochineal, orchil. (6) Dried and salted fish: carotenoids, Tartrazine, Acid Yellow, Ponceau 4R. (7) Sugar: Indanthrene Blue only. (8) Rennet: caramel. (9) Canned or bottled fruits or veg.; and plums, gooseberries, and naturally green fruits for candying: chlorophyll and Cu complex. (10) Candied fruits, green mustard, fruit pastes, sugar and chocolate confectionery, cake decorations, ices and ice creams, syrups (except blackcurrant, raspberry, redcurrant, sweet cherry), powders or concentrates for non-alcoholic beverages, caviare and substitutes, shrimps, shells of hard-boiled eggs, cheese rind: all listed natural and synthetic colours. (11) Strawberries, raspberries, red plums, and cherries preserved in liquid: all listed synthetic red colours. (12) Sausage skins, bladders and other such casings for charcuterie: as for group (10).

AFLATOXIN

Max. tolerances in animal feeds: 0.02 p.p.m. in feeds for diary herds, swine and poultry; 0.05 p.p.m. in basic feeds for direct consumption and in feeds for sheep, goats and cattle; 0.7 p.p.m. in basic feeds for manufacture of compounded feeds.

LABELLING

Declr. name of product as laid down in regulation or usual commercial name informative to consumer, must be different from trade mark or any fanciful name; name and address of manufacturer, packer or vendor (may use symbols instead with permission); country of origin where omission could lead to confusion; metric net wt. or vol. (these foods are exempt: rusks, biscuits, spiced bread, jam, jelly jam, honey, mustard, potato chips all when packed in less than 50g; bouquets of herbs in transparent sachets less than 30g; cheese sold by the piece by farmers; ice cream less than 100 c.c.; sugar conf. less than 100 g); shelf life: (uncoded sell-by date: day and month if 3 months or less and day, month and year or no. of months after packing if more); storage conditions if effect shelf life (not on fresh fruit and veg.); date of manufacture on canned, frozen and semi-preserved foods (may use approved code); list of ingredients in decr. order (if name of product refers to one ingred. declr. amount of that ingred.) certain exemptions inc. alc. bevs, vinegar, conc. and dried milk, cheese, process. cheese (declr. additives), cocoa and chocolate, assortments of sugar confy. and biscuits (declr. additives); list additives by class name: colour, preservative, antioxidant, emulsifier, stabiliser, anticaking agent, texturiser, savoury substance, flavour, technical adjuvant, followed by EEC no. (or name if no EEC no.). Declr. unit price on certain basic commodities.

PACKAGING

Prescribed Quantities. Obligatory quantities are laid down for potatoes (fresh or preserved), garlic, chestnuts, shallots, dried fruit, dried vegetables, nuts, onions, prunes, dates, flour, starch, semolina, tapioca, butter, salt, rice, frozen fruit, frozen veg., frozen fish and fish prods., salt, herring, cod fillets.

MATERIALS IN CONTACT WITH FOODS.

Must not impart to them any trace of constits. not normally found in the foods, nor yield any normal constit. leading to an excess of the latter over that usually found. Authorized substances as components of lacquers or of plastic wrapping materials: (a) insol. and

FRANCE (cont.)

inert natural or synth. resins and high polymers; (b) solvents of b.p. below 150°C. if entirely removed from finished material; (c) paraffin, castor oil, glycerine, triethylene glycol, propylene glycol, stearates and ricinoleates of ethyl, butyl, amyl and of non-toxic metals; tributyl acetylcitrate, dioctyl, heptylnonyl and diheptyl phthalates; (d) hexamethylene tetramine and non-toxic metallic salts; (e) non-toxic metallic resinates (esp. cobalt and manganese); (f) authorized pigments and colouring matters; (g) talc, mica, titanium dioxide, wood flour, kieselguhr, and other inert substances; (h) refined paraffin and mineral waxes, ozokerite, ceresine (if containing no trace of carcinogens); beeswax; carnauba wax, montau wax (max. 3%); rosin; triacetin, tributyrin, tripropionin; chromium stearyl chloride; (i) diphenylthiourea (max. 0.5%) and certain other stabilizers. Authorized pigments and colourings for wrappers include lists of 75 organic colours for general use in or on plastic and other wrappings, 9 organic colours for use in colouring cellulose film, and 36 metals and mineral pigments (and carbon black). These must not yield any appreciable trace of their constits. to the wrapped food and must not contain any toxic substance. They are subject to limits for Pb, 0.01%, and As, 0.005%, and the following limits for metals extractable with N/10 HCl: Hg. 0.005%; Cd, 0.10%; Zn, 0.20%; Se, 0.01%; Ba, 0.01%; and aromatic amines, 0.05%. Carbon black must be free from benz-3,4-pyrene and must not yield more than 0.1% benzene extract. Coloured non-impermeable cellulose film may only be used for foods of the type: dried veg., coffee, chicory, nuts in shell, confectionery; and to cover baskets of fresh fruit and veg. Coloured impermeable film sealed with a nitrocellulose lacquer of min. 30g./sq. metre may be used for foods as above and also: biscuits, fritters, green walnuts, cheese, spiced bread, caramels, dates, potato chips, charcuterie and brined products. When inks imprinted on the back of transparent wraps are covered with a protective coating, only the latter need satisfy requirements for wrappings in contact with foods. Lacquers and plastic materials are reqd. to satisfy certain corrosion and food storage tests. For antioxidants in lacquers, etc., see "Antioxidants" p. 718.

BEVERAGES, NON-ALCOHOLIC

Fruit Juices. If for direct consumption, must be prepd. by pressing only; no additions. "Lightly sweetened": undiluted fruit juice plus 5% to 20% refined sugar (not syrup). Before addition of sugar, usual clarifying treatments allowed. Alcohol, max. 0.5%, preserv., see p. 727.

Citrus Juices and Concentrates. Opt. (if sp. gr. is max. 1.33): SO_2 (or equiv. salts), max. 300 p.p.m. raw juice (declar. "sulphured").

Citrus Fruit Syrups. Prepd. from juices obtained by pressing only. Sugar, min. 60%, max. 68%. Optional (citrus syrups): natural peel flavour.

Tonic Water. Quinine, min. 25 mg., max. 80 mg., per litre (declar. in prescribed form).

Synthetic Beverages, Lemonade Powders and Tablets. Optional: permitted colour (declar.), saccharin.

COCOA, CHOCOLATE, AND SUGAR CONFECTIONERY

Cocoa and chocolate regs. now comply with the EEC Directive (see p. 700).

Cocoa Powder. Cocoa butter, min. 20% (8% if defatted); moisture, max. 9%. Optional: lecithin, max. 1% (declr.); natural and nature identical flavourings, vanillin, ethyl vanillin (declr.).

Drinking Chocolate. Mixture of cocoa powder, min. 25% and sucrose.

Chocolate. Total cocoa solids, min. 35%; fat-free cocoa solids, min. 14%; cocoa butter, min. 18%. Optional: lecithin, max. 0.5%; natural and nature identical flavourings (not those imitating cocoa, choc., or milk fat), vanillin, ethyl vanillin (declr.); partial replacement of sucrose with fructose, lactose, maltose, max. 5% or dextrose, max. 20% (declr. if more than 5%); *no* foreign fats, starch or cereal products; edible substances, e.g., nuts, min. 5% and max. 40% if in visible pieces, max. 30% if not in visible pieces, max. 40% if in both visible and indiscernible pieces.

Milk Chocolate. Total cocoa solids, min. 25%; fat-free cocoa solids, min. 2.5%; milk solids, min. 14%; milk fat, min. 3.5%; total fat, min. 25%; sucrose, max. 55%. Optional: as for chocolate.

Couverture Chocolate. Chocolate with cocoa butter, min. 31%; fat-free cocoa solids, min. 2.5% (16% if called dark).

Couverture Milk Chocolate. Milk chocolate with fat, min. 31%.

White Chocolate. Cocoa butter, min. 20%; milk solids, min. 14%; milk fat, min. 3.5%; sucrose, max. 55%. Optional: as for chocolate.

Cream Chocolate. Total cocoa solids, min. 25% (if cocoa butter added, cocoa solids, min. 10%); milk solids, min. 14%; milk fat, min. 5.5%; sucrose, max. 60%. Optional: as for chocolate.

Cream Chocolate Couverture. Cream chocolate with min. 35% fat.

Skim Milk Chocolate. Total cocoa solids, min 25% (if cocoa butter added, cocoa solids, min. 10%); non-fat milk solids, min. 12.5%; sucrose, max. 60%. Optional: as for chocolate.

GERMANY (WESTERN) (cont.)

Tablet sizes for above Chocolates. Any wt. below 75g; 75, 100 g 125, 150, 200, 250, 300, 400, 500 g.

Confectionery. Optional: SO_2, max. 50 p.p.m. (declar.) or 20 p.p.m. (no declar.) permitted colour (declar.). but not in centres of filled chocolates or in products made with milk, butter, honey, egg, malt, caramel, cocoa, chocolate, coffee or liquorice: spermaceti, carnauba wax, beeswax, sperm oil (also for tablets: stearic acid, calc. and magn. stearates, max. 0.5%); for varnishing As-free shellac, gum sandarac, gum benzoin, mastic; talc, 0.3% max. release agent for high and low boilings. For surface colourings gold and silver leaf. "Honey" and "malt" sweets, min. 5% honey or malt extract resp. "Cocoa"-types, min. 5% cocoa constits. "Milk" sweets, from full-cream milk, min. 2.5% milk fat; optional: additional milk fat, skim milk; cream sweets, similar, but min. 4% milk fat (tolerance on milk fat in both cases ½%). "Butter" sweets, cow butter only, min. 4% butter fat. "Liquorice", min. 5% sweet liquorice extract. "Nuts", min. 5%. "Cola", min. 0.15%, max. 0.25% caffeine. Marzipan base: moisture, max. 17%, sugar, max. 35% (of which max. 10% may be invert), almond oil content, min. 28%; bitter almonds (but not de-bittered), max. 12% of almonds used; optional, permitted colour (declar.). Marzipan goods: marz. base plus max. equal wt. sugar; in total sugars, part may be invert, up to 5% may be sorbitol, and up to 3.5% glucose. Persipan base (from apricot kernels, de-bittered if necessary, peach kernels, de-bittered almonds, or "bergmandeln" or mixtures of these): moisture, max. 20% sugar, max. 35% (may include 10% invert); 0.5% max. potato starch; optional, permitted colour (declar.). Persipan goods: base plus max. 1½ times wt. sugar; in total sugars, part may be invert, and max. 5% glucose, max. 5% sorbitol. Macaroon base (almond): marzipan base plus max. equal wt. sugar, with min. 10% egg albumen in finished product. Permissible constits. in chewing gum (declar. "chewing gum base with foreign substances") are listed.

EGG PREPARATIONS

Dried Egg. Labelling: wt. of contents when packed; equiv. no. eggs of 45 g. wt.

Dried Egg Yolk. Labelling: wt. of contents when packed; equiv. no. yolks of 16 g. wt.

Liquid Egg, Liquid Egg Yolk. Preserv.: benzoic acid, sorbic acid, max. 1.0%.

ESSENCES AND FLAVOURING BASES

(1) "Natural": prepd. solely from materials with natural content of odorous or flav. substances (incl. natural essential oils, which may be terpeneless); solvents, carriers or emulsifiers must be "foodstuffs" (all substances intended to be eaten, chewed or drunk by man in their original, prepared, or processed condition, unless primarily intended for use in curing, relieving or preventing disease) with no added "foreign" substances. The addition of vanillin to a natural essence does

not preclude the description "natural", provided the characteristic odour or flavour of vanillin is not imparted to the essence or base.

(2) "Containing natural flavourings". Substances qualifying under (1), with one or more of the following added: glycerine, glyceryl acetates; calc. carbonate, magn. carbonate; fruit pectins, pectic acid, propylene glycol; carrageen, agar, tragacanth, gum arabic, carob-bean gum, guar flour, calc. and magn. stearate.

(3) All others: the description "artificial" is requd. May contain substances under (2). The following must not be used: agaricin, bitter-sweet stems, cumarin, pennyroyal, quillaia bark, tansy, rue, sassafras, polypody root, birch tar oil, bitter almond oil cont. free or bound hydrocyanic acid, juniper oil, thujone, oil of calamus containing more than 10% asarone. Ethyl alcohol as only solvent for artificial beverage essences, propylene glycol and glyceryl acetates as solvents for other flavours.

(4) Essences containing the following have restricted use only: ethylvanillin, hydroxycitronellal, propenylguarethol, resorcinol dimethylether, ammon. chloride (only in essences for liquorice goods, to give max. 2% in finished product). They may be used only in: synth. hot and cold beverages, carbonated drinks; blancmanges, custards and similar, puddings, jelly sweets, red fruit juice groats, sweet soups and sauces; artif. ice-cream; pastries, pastry doughs and fillings for such; sugar confectionery, effervescent powders; fillings for chocolate products; chewing gum. Essences containing ethylvanillin, but not the other substances cited, may be used in chocolate. Descriptions and declarations: essences and flav. bases may be described as "natural" if they are produced exclusively from natural aromatic or flav. materials, with solvents, carriers and emulsifying agents consisting only of foodstuffs to which no foreign substances are added (i.e., group (1) above). The description "with natural odorous or flavouring substances" may only be used if the essences, etc., consist exclusively of natural essences and solvents, etc., and the auxiliary materials listed under (2) above. If any other substances are present (with the exception noted above for vanillin), the description "artificial" must be used. Essences, etc., containing the substances listed under (4), and semi-manuf. foods containing them, must be described as "with flavour" (but not in the case of ethylvanillin if its characteristic odour or flavour is not imparted to the essence, etc.). Foods or beverages containing such essences, etc., must carry the declaration "with artificial flavour". Labelling: other special requirements apply to the labelling of essences, bases and flavour intermediates.

FATS AND OILS

Margarine. Fat, min. 80%. Water, max. 18% (unsalted), 16% (salted). Not more than 100 pts. by wt. milk (or equiv. cream) to 100 pts. non-milk fat. Addition reqd. of 10% sesame oil in total fat, of starch, min. 0.2%, max. 0.3%. Optional: colouring with carotene or annatto (declar.); lecithin, *GERMANY* (*WESTERN*) (*cont.*)

mono and diglycerides; sorbic acid, max. 0.12% if moisture min. 15%.

FISH PRODUCTS

Colouring Matter. Permitted colour may be added (declar.) only to sea salmon (salmon substitute), anchovy paste, fish roe products (not smoked); and to canned Norway lobster and canned shrimps.

Labelling. Wt. of prepared fish or parts of fish when packed to be stated. Month and year of packing reqd. or shelf-life and storage conditions.

FLOUR PRODUCTS

Flour. No treatment with bleachers, improvers, etc., except sod. diacetate, calc. acetate or propionate, or ascorbic acid.

Alimentary Pastes. From flour of max. 70% extraction (except "grey meal" pastes, 80-85% extraction; and wholemeal pastes). Moisture, max. 13%; salt, max. 1%; acidity, max. 8 ml. normal alkali per 100 g. product. Egg pastes: min. 3 eggs (of min. 45 g. av. wt.) or min. 3 yolks (of min. 16 g. av. wt.) per kg. flour (or corresp. amts. preserved or dried egg); no addition of lecithin. Milk pastes: min. 20 g. milk solids per kg. flour. "Lecithin" pastes: min. 4.5 g. lecithin per kg. flour. Gluten pastes: total nitrogen, min. 25% of product. Wrappings: no use of yellow transparent or translucent materials. Labelling: claims for high egg content or home-made quality only if min. 5 eggs per kg. flour.

FLOUR CONFECTIONERY MATERIALS

No added colours except caramel. Cream fillings containing fat may be coloured (except those containing egg, malt, caramel, cocoa and choc. or coffee).

FRUIT AND VEGETABLE PRODUCTS

Candied Fruits. Optional: permitted colour (declar.) (not orange, lemon peel, nuts, almonds); SO_2, max. 100 p.p.m. (declar. "sulphured").

Canned Fruit. Optional in strawberries, cherries, raspberries, plums: permitted colour (declar.).

Dried Fruit. Optional: SO_2 (declar. "sulphured") max. 2000 p.p.m. apricots, pears, peaches; max. 1000 p.p.m. raisins, sultanas; 1500 p.p.m. max. pineapples, apples, quinces.

Fruit Pulp (for jams, jellies, sugar confectionery). Optional: SO_2 (or equiv. salts), max. 50 p.p.m. (declar. "sulphured") in finished product; permitted colour for cherry, raspberry, strawberry; sorbic acid, max. 0.2% for confectionery and beverage industry.

Preserves, One-fruit Jams. Water, max. 35%; fruit content, min. 45 parts/55 parts sugar, residual SO_2, max. 50 p.p.m. (declar.), 20 p.p.m. (no declar.). Optional: glucose, max. 5% (12% if declar.); tartaric, citric or lactic acid, max. 0.5%; pectin, max. 0.3% (as calcium pectate); permitted colour (declar.) to products from red berry fruits or cherries. In sieved pulp jams pieces of fruit need not be visible and dried apricots may be used (declr.).

Mixed Jams. Water, max. 42%; fruit content, min. 25 parts/55 parts sugar. Optional: glucose, max. 12% (no declar.); acids as for preserves; pectin, max. 0.5% (as calcium pectate); permitted colour (declar.). Residues of SO_2 as for preserves. Apple mixtures: apple, max. half of fruit content.

Citrus Jam. Fruit content, min. 30 parts/70 parts sugar. Otherwise as for preserves. No peel of oranges treated with diphenyl, *o*-phenyl-phenol, waxing agents, etc., may be used.

Fruit Jellies. One fruit only (except apple jelly, in which max. 10% juice of other fruit is permitted, if declar.). Water, max. 42%; sugar, min. 50%, max. 70%. Optional: acids as for preserves; pectin as for mixed jams; glucose (apple jelly only), max. 12%; permitted colour (declar.) to jellies from red berry fruits or cherries. Residues of SO_2 as for jams.

Fruit Pectin (Liquid) (for manuf. of jams, jellies, sugar confectionery). Optional: SO_2 (or equiv. salts), max. 800 p.p.m. (declar. "sulphured").

Horseradish (Comminuted). Optional: SO_2, max. 1000 p.p.m. (declar. "sulphured"), sorbic, benzoic acids, max. 2,000 p.p.m., p-hydroxybenzoates, max. 1,500 p.p.m.

Dried Vegetables. Optional: SO_2 (declar. "sulphured"), max. 500 p.p.m. celery, asparagus, onion, cauliflower, turnips, parsnips; 100 p.p.m. max. potatoes.

GELATINE PRODUCTS

Gelatine, Air-dried. Optional: SO_2, max. 400 p.p.m. (declar. "sulphured").

Jelly Tablets and Powders. Optional: permitted colour (declar.), if not prepd. with cocoa, chocolate, egg or caramel.

MEAT PRODUCTS

Chemical Additives. The following are permitted for the purposes shown: fresh smoke from natural plant sources (3,4-benzpyrene, max. 1 p.p.b. in smoked food); saltpetre for curing (but not for all fresh comminuted meat prods), sod. nitrate, max. 0.05%, potass. nitrate, max. 0.06% of meat and fat used; ascorbyl diacetate, ascorbyl palmitate, sod. and potass. citrates, ascorbic acid and sod. and calc. salts, nat. extracts rich in tocopherol, synthetic α-, γ-and δ-tocopherol, lactic, citric, tartaric acids as antioxidants for animal fats; sod., potass. and calc. salts of acetic, lactic, tartaric and citric acids for jellied meat and the treatment of gut; sod. salts of the same acids *or* sod. and potass. salts of diphosphoric acid (declr.) as chopping aids for finely comminuted, heated, sliceable meat prods, max. 0.3% of meat and fat used (*p*H of the salts in 0.5% soln., max. 7.3); sod. and potass. citrates as anticoagulants for blood, max. 16 g./1; glycerine, as softener in gelatine coverings; glyoxal or aqu. concd. condensates from sawdust carbonisation in air, CMC or purified cellulose, alumin. ammon. sulphate (max. 0.013% alumin. in casing), or alumin. sulphate (max. 2% alumin. in casing) and glycerine for hardening artificial casings from split skins, max. 0.2% free glyoxal or max. 0.2% free formaldehyde, CMC, max. 0.5% or cellulose, max. 4%, glycerine, max. 20%. Tragacanth and gum arabic as solid supports for liquid spice

GERMANY (WESTERN) (cont.)

extracts, max. 1.5% combined. Talc for surface of salami casings. No addn. of non-meat protein including hydrolysed vegetable protein.

MILK PRODUCTS

Dried Milk. Moisture, max. 4% (spray), 6% (roller). Fat, min. 25% (of dry matter).

Dried Skim Milk. Moisture, max. 6%.

Egg Substitutes (Milk protein basis). Optional: calc. hydroxide (to give max. *p*H 12 in product diluted × 10 with distilled water).

Processed Cheese. Optional: lactates, citrates, max. 4% (declar.), phosphates, max. 3% as emulsifiers; annatto.

TABLE SALT

Optional: colloidal silicic acid and its calc. salts, max. 1.0%.

VINEGAR PRODUCTS

Vinegar. Acetic acid, min. 5, max. 15.5%. Made by acetic fermentation or by diln. of acetic acid with water or mixture of two. Dil. acetic acid, min. 15.5% acetic acid (if more than 25% may not be sold retail). Declr. warning if more than 11% acetic acid, declr. if acetic acid used and % acetic acid in both types. Optional: caramel; SO_2 only in fermentation vinegar, max. 50 p.p.m. (declar.).

Mayonnaise. Total fat, min. 80%; egg yolk, min. 7.5% of fat content. Veg. oil, egg yolk, salt, sugars, spices, vinegar, edible acids, egg white. No thickeners.

Salad Mayonnaise. Total fat, min. 50%; egg yolk, min. 7.5% of fat content. Veg. oil, egg yolk, egg white, milk protein, veg. protein, salt, sugars, spices, vinegar, edible acids, thickeners: wheat flour, starches, gelatine, pectin, alginates, carrageenan, agar, gums (arabic, carob, guar, trag.).

Sweet Sauces. Optional: permitted colour (declar.) for products not prepared with cocoa, coffee, chocolate, eggs or caramel.

Pickled Onions. Optional: SO_2 (or equiv. salts), max. 300 p.p.m. (declar. "sulphured").

Mixed Pickles. Gherkin, cauliflower, onion, min. 75% of total veg. Min. 20% gherkins of 3—7 cm. length. Other veg.: only beans, carrots, asparagus, corncob, paprika; each, max. 10% of total veg. Optional: SO_2, max. 20 p.p.m. (declar. "sulphured", no. declar. if less than 20 p.p.m.).

COLOURING MATTERS

See Tables, pp. 806-812. All coal-tar colours and most nat. colours must be declared on labels ("mit Farbstoffe").

PRESERVATIVES

Permitted anti-microbial preservatives, with their official descriptive names and numbers, are: sorbic acid and its sod., potass. and calc. salts (Sorbic. acid—1); benzoic acid and its sod., calc. and potass. salts (Benzoic acid—2); *p*-hydroxybenzoic acid ethyl and propyl esters and their sod. salts (PHB-ester — 3). Formic acid is also permitted in certain foods. Diluents etc. are permitted as follows, in max. amts. shown: sod. sulphate (15%) or glycerin (35%); also sod. or potass. carbonate (2%), or sod. or potass. ortho- or pyrophosphate (2%), or (if no sod. sulphate present) calc. chloride (2%). Foods to which preservs. may be added, and the max. amts. permitted for a single preserv., are scheduled as follows:

* The maxima are given in terms of the free acids. † Amounts in g/dm^2.

Mixtures of those preservs. indicated for a particular food may be added, the permitted max. for each being diminished proportionately. The appropriate preservs. may be added to foods used in the preparation of scheduled foods. The scheduled foods themselves may be used in the preparation of other foods. Declar. (in association with name of contents of package) of the presence of preserv. and its official description is reqd. for scheduled foods and foods containing them (but not for foods containing max. 0.2% of a liquid egg product, or 2% of any other scheduled food). (Declar. may be limited to portions of scheduled food discernible as separate ingreds. in the whole.)

If one preserv. only is used, its max. is as shown; if more than one, max. for each is diminished proportionately.

The following are excluded from the definition of preservatives and are permissible additions to a food (so far as compatible with any specific standard applying to the food): freshly-evolved smoke from wood, etc.; steam; carbon dioxide; brandy; vitamins, provitamins, arom. and flav. substances (either natural, or identical in compn. with them); waterglass or slaked lime for pickling eggs; substances mentioned under Additives (General).

ADDITIVES (GENERAL)

The following substances are permissible for addition generally to foods (except when a standard for a particular food would exclude such addition). No declar. of their presence is requd. with foods containing these additions: Lecithin. Combinations of vitamins *C* and *E* with acetic acid and with straight chain C_{14}, C_{16}, and C_{18} fatty acids. Sodium, potassium and calcium salts of acetic, lactic, tartaric and citric acids. Sodium, potassium, calcium and magnesium salts of carbonic acid; sodium, potassium and calcium salts of ortho- and pyro-phosphoric acids; potassium and calcium salts of hydrochloric acid; neutral sodium and calcium salts of sulphuric acid. Glycerin. Leaf gold and silver. Fruit pectin, pectic and alginic acids and their sodium and calcium salts; carrageenan, agar, tragacanth, gum arabic; carob gum, guar gum; mono- and diglycerides.

ANTIOXIDANTS

May be used in the following foods and in foods containing these foods only (declar.): (1) soups, broths, gravy sauces, spiced sauces (2) dried or deep frozen pre-fried potato prods (3) cereal-based snack foods (4) marzipan and similar prods, nougat, groundnut and puffed groundnut prods, BHA, octyl and dodecyl gallates, max. 100 p.p.m., singly or tog. (in (1) and (4) calc. on fat content, in (2) and (3) calc. on prod.); (5) chewing gum, BHA, BHT, octyl and dodecyl gallates, max. 1,000 p.p.m., singly or tog., calc. on gum base (6) essences: essential oils, BHA, octyl and dodecyl gallates, max. 1,000 p.p.m. singly or tog.; other essences, BHA, max. 200 p.p.m., octyl and dodecyl gallates, max. 100 p.p.m., singly or tog.

CONTAMINANTS

Mercury. Max. 1 p.p.m. in fish and fish products, calc. on fresh weight of fish.

LABELLING

All prepacked food must be labelled: usual commercial name of prod.; name and address of manufacturer; net contents in letters min. 3 mm. on 50 to 200 g. or ml., 4 mm. on 200 to 1,000 g. or ml., 6 mm. on over 1,000 g. or ml.; on meat and meat prods, fish and fish prods declr. wt. meat/fish filled and if final wt. different declr. this too, declr. bone; on milk prods declr. % fat and non-fat milk solids on condensed milk and % fat on sterilized cream, milk powders, cream powder; on canned fruit and veg. declr. drained wt.; on soups declr. vol. of ready-to-eat soup in litres or l. fractions, and platefuls or cupfuls of soup; declr. % cocoa in chocolate and choc. powder. No declr. wt. on cocoa, choc., sugar confy. or biscuits less than 50g. Declr. uncoded date of manufacture or shelf life on meat, fish, milk prods, frozen foods (detailed regulations regarding this). If state shelf life must state storage conditions. Declr. unit price. The unit price (*i.e.*, price per kg. or litre) may be omitted on certain sizes of product or container—detailed list for certain products given.

GREECE

GENERAL

New Food Code issued in 1971 on standards of composition, labelling, packaging, sampling. The preparation and marketing of foods not covered by the code or not complying with it must be sanctioned by the Supreme Chemical Council and the Supreme Health Council also in some cases. Permission also required for dietetic foods. Detailed labelling requirements include size of letters in relation to size of label. Declar. art. colours, art. flavours, preservatives, emulsifiers and stabilisers, added vitamins. Declar. all ingreds. on non-standardised foods.

ADDITIVES

The following may be used only where specified in the Food Code.

Acids and Bases. Acetic acid and sod. acetate; citric acid and calc., potass., sod., ammon. salts and sod. citrate monoxide and dioxide; fumaric acid and sod., potass., calc. salts; gluconic acid and sod., calc. salts; L-malic acid (maleic-free); L-lactic acid and calc., sod. salts; tartaric acid, sod. hydrogen tartrate, potass. hydrogen tartrate; ammon., potass., sod., calc. phosphates; HCl and H_2SO_4 for prep. of starch syrup; ammon., calc., magnes., sod. carbonates; ammon., sod., potass. bicarbonates; calc., magnes. oxides; ammonium; potass., sod. hydroxides.

Antioxidants. Ascorbic acid, *iso*-ascorbic acid, tocopherols, mixts cont. tocopherols, lecithin, citric acid, tartaric acid, phosphoric acid; B.H.A., max. 2,000 p.p.m. in fats; B.H.T., max. 2,000 p.p.m. in fats; propyl, octyl and dodecyl gallates, max. 200 p.p.m.

Colours. Max. 200 p.p.m. art. colours in finished food. List similar to EEC list but use of art. colours severely restricted.

Emulsifiers and Stabilisers. Sod. and calc. tartrate; sod. and calc. nitrate; sod., potass., and calc. phosphates; propylene glycol fatty acid esters; mono and diglycerides of fatty acids; lecithin; alginic acid and its sod., potass., ammon., and calc. salts; agar; carrageenan and its sod., potass., ammon., and calc. salts; dextrin; gelatine; pectin; gums (trag., arabic, guar, carob); mastic; CMC, max. 0·2%.

Preservatives. Benzoic acid, sod. benzoate, max. 1,000 p.p.m.; methyl, ethyl, propyl hydroxybenzoates, max. 1,000 p.p.m.; sorbic acid, potass., sod., calc. salts, max. 1,000 p.p.m. (2,000 p.p.m. in some cases); SO_2, sulphurous acid, sod. potass. sulphites and metabisulphites, max. 500 p.p.m.; sod. and potass. nitrate, max. 1,500 p.p.m.; sod. and potass. nitrite, max. 200 p.p.m.; diethyl pyrocarbonate; sod. chloride; vinegar; ethanol. May not use any of the following together in the same food: benzoic acid and its salts, hydroxybenzoates, and SO_2 and salts.

Sweeteners. Natural: sugar, invert sugar, fructose, fructose syrup, glucose, glucose syrup, maltose, grape sugar or extract of raisins, grape honey or treacle, carob honey or syrup, lactose, honey. Polyalcohols, *e.g.*, glycerine, sorbitol and mannitol in foods for special dietary purposes, with permission only. Synthetic: saccharine, dulcin, glucin. May be used only in dietetic foods.

CONFECTIONERY

Chocolate. Cocoa mass, min. 32%; cocoa butter, min. 20%; sugar, max. 64%; lecithin, max. 1%; ash, 1–2%. No foreign fats. Harmless flavourings permitted. Products similar to chocolate but not complying with this standard to be called "Imitation Chocolate" in letters 5 mm high.

Milk Chocolate. Cocoa butter, min. 20%; cocoa mass, min. 15%; sugar, max. 58%; milk powder (min. 25% butter fat), min. 15%; ash, 1–2%.

Nut Chocolate. Min. 10% nuts. Declar. type of nut.

Sugar Confectionery. No artificial colours.

MEAT PRODUCTS

Optional: Sod. and potass. nitrate, max. 0.15%; sod. and potass. nitrite, max. 0.02%; ascorbic acid, max. 0.1%; phosphates, max. 0.4%; monosod. glutamate, max. 0.2%; starch, max. 5%. No artific. colour or flavour. Labelling: declare type of meat, offal, added fat or oil, starch, amount of salt, additives.

ITALY

FOOD ADDITIVES

Regulations issued in March, 1965 and subsequently amended, lay down lists of permitted pH regulators, preservatives, antioxidants, emulsifiers, stabilizers, flavouring materials, etc., together with the foods in which they are permitted and the max. limits of use. Declaration of additives by name is generally required in most foods, except that flavours may be designated as 'natural' or 'artificial' and colours by their EEC number.

BEVERAGES,

Fruit Juices. Preserv.: SO_2, max. 50 mg/l.

Fruit Syrups. Optional: glucose, max. 25% of total sweetening matter (declar. if less than 50% fruit); permitted colour to strawberry, cherry and plum (declar.); natural citric or tartaric acid. No artif. essences or sweeteners; no foaming agents. SO_2 residual 100 p.p.m.

Artificial Syrups. Must be labelled as such.

Carbonated Beverages. Dry matter, min. 6%. Optional: no colours; ictric, lactic, acetic, tartaric acids; lemon essence; no artific. sweeteners, no glucose syrup; max. 10% of the sugar may be replaced by dextrose. Labelling: no illustrations of fruit.

Fruit Juice Drinks. Fruit juice, min. 12%; dry matter, min. 10% (if fruit juice below 12% and dry matter, min. 8% must be called imitation beverages). Optional: colours; benzoic acid and p-hydroxybenzoates, max. 200 mg/l if min. 12% fruit juice, until 31.12.1976 only; citric, acetic, lactic, tartaric acids; natural essences and extracts; no artific. sweeteners, no glucose syrup; max. 10% of the sugar may be replaced by dextrose.

COCOA AND CHOCOLATE

Cocoa Powder. Ash, max. 7%. Cocoa butter, min. 20%.

Soluble Cocoa Powder. Ash, max. 7% in addition to alk. carbonate, max. 3%. Cocoa butter, min. 20%.

ITALY (cont.)

Cocoa with Sugar. Sugar, max. 65%.

Chocolate. Cocoa butter, min. 16%; sugars, max. 65% (including max. 5% which may be other than sucrose). Lecithin, max. 0.5%. Additions of any kind to be indicated. If foreign fat present, must be described as substitute. Skim milk choc. to be labelled as such.

COFFEE

Decaffeinated Coffee. Caffeine, max. 0.15% of dry matter. No solvent residue; moisture, max. 5%. Declr. caffeine not more than 0.15%.

FATS AND OILS

Antioxidants. All fats and oils (except olive oil): ascorbyl palmitate, 0.3%; BHA, BHT, max. 0.03%; gallates, 0.01%, tocopherols ,0.03%; lecithin, max. 0.5% in emulsified fats inc. margarine. (Sorbic acid also permitted up to 500 p.p.m.). Chewing gum, 0.1% max. BHA, BHT, gallates. Potato flakes, 0.003% max. gallates (0.01% max. in preps. of potato flakes) ascorbyl palmitate, max. 0.03%.

Emulsifiers. Monoglycerides (except lauric) 2% in emulsified fats; 0.25% in margarine; mixed mono- and diglycerides, 3% and 0.4% respectively; sucrose esters, 3% in fats and margarine; mono- and diglycerides esterified with acetic, tartaric or diacetyl tartaric acid, max. 3% in emulsified fats.

Hydrogenated Fats. Moisture, max. 2%; acidity (as oleic acid), max. 1%. No added colour, mineral oil, or precipitable amt. catalyst. Sesame oil (5%) for identif. Optional: sorbic acid, max. 0.05% (declar.).

FISH, CANNED

Declar. reqd.: name of product, quality of oil or other medium; net wt.; name of manufacturer and place of manuf. (may be replaced by registered trade mark). In relief or indelible ink on metal container; burnt-in on wood; in relief on glass. Also on outer wrappers. Name "sardine" only for *Clupea pilchardus*; "anchovy", only *Engraulis enchrasicolus*; "tunny", only *Orcynus tynnus.* Mercury, max 0.7 p.p.m.

Semi-preserved Fish Products. Sorbic acid or sorbates, *p*-hydroxybenzoates, 1000 p.p.m.; benzoic acid or benzoates, 1,500 p.p.m.

FLOUR PRODUCTS

Alimentary Pastes. Moisture, max. 12.5%. Acidity, on dry matter, max. 4° (types 0 and 1 flours), 5° (type 2 flour) (degrees of acidity correspond to ml. of normal alkali per 100 g. of product.). No artif. colour. Egg products to contain min. 5 whole eggs per kg. flour.

Biscuits, Confectionery. No use of mineral oil for greasing. May be coloured (declar.).

FROZEN FOODS

Regulations on storage temp., transport, hygiene, labelling and importation of frozen foods.

FRUIT AND VEGETABLE PRODUCTS

Canned Fruits. Permitted colour (declar.) to strawberries, cherries, plums. Labelling: wt. of drained fruit (g.); wt. of syrup (g).

Canned Vegetables. No preservs., no harmful colours. Declar. reqd. on label: name of product; quantitative comp. of essential ingreds.;

net. wt. in g.; name and address of manuf.; statement that product is prepd. in accordance with standards in force; net wt. in g. of drained veg. for peas, French beans, artichokes.

Jams, Conserves, Jellies. Permitted colour (declar.). SO_2 residual 80 p.p.m. Pectin allowed, max. 1%.

ICE CREAM

Colours: only Tartrazine, Quinoline Yellow, Sunset Yellow FCF, Carmoisine, Ponceau 4R, Erythrosine, Patent Blue V, Indigo Carmine, Black 7984 and natural colours. May not colour if nougat, chocolate, lemon, cream, eggs or any other food in which colour prohib. used. Max. level of colour, 75 p.p.m. one col., 130 p.p.m. two or more, no mx. for caramel. Nat. flavourings and ethyl vanillin, max. 5 p.p.m. Stabilisers: alginates (inc. propylene glycol alginate), max. 0.2%; agar, carrageenan, carob gum, tragacanth, pectin, max. 0.5%; gelatine, max. 1%; sod. CMC, max. 0.25%. Emulsifers: lecithin, max. 0.3%; monoglycerides, max. 0.3%; mono- and diglycerides, max. 0.4%; sucrose esters, max. 0.5%. Acetic, citric, lactic and tartaric acids.

MEAT PRODUCTS

Canned Meat and Sausages Sod. nitrite, max. 150 p.p.m.; saltpetre, 250 p.p.m.

Meat Extract. Dry matter (100°C.), min. 80%. On dry matter: nitrogen, min. 11.0% (tolerance, 10.5%); ammonia, max. 1.0%; total creatinin, min. 7.80% (tolerance, 7.4%); total P_2O_5, min. 8.20%; total ash, max. 29%; total NaCl, max. 5%; fatty matter, max. 2%. No added preserv., colour, starch, sugar, glycerin, etc. Labelling: name of product; name and address of manuf.; net wt. in g.; statement that product complies with standards in force.

Meat Broth, Concentrated. % of each constituent (except NaCl) at least four-tenths of that reqd. on dry matter of meat extract. Labelling: as meat extract, with statement of composition.

Meat Soup Cubes. Dry matter (100°C.), min. 95%; extract base, min. 12%; total NaCl, max. 60%; fat, max. 4%; creatinine, min. 0.80% of dry matter. Optional: monosod. glutamate and 5′-disod. inosinate and 5′-disod. guanylate (5% of the MSG). Standard wt., 4 g. Labelling: as meat broth conc. (except net wt.). Cubes to be wrapped in moisture-proof paper, bearing name of product, name and address of manuf.

SOUP PRODUCTS

Soups, Concentrated. Prepared from "extract" bases derived from (1) meat, (2) yeast, (3) other veg. substances, (4) milk, (5) mixtures of these; standards as follows: (1) *Meat.* (See under meat products). (2) *Yeast.* Dry matter (100°C.) min. 75%; total nitrogen, min. 9% of dry matter; total ash, max. 25% of dry matter.; NaCl, max. 15% of dry matter. (3) *Other veg. substances.* Dry matter, min. 75%; total nitrogen min. 5.5% of dry matter; total ash, max. 40% of dry matter; NaCl, max. 35% of drymatter. (4) *Milk.* Dry matter, min. 80%; total nitrogen, min. 9% of dry matter; total ash, max. 35 % of dry matter; NaCl, max. 25% of dry matter. (5) *Mixtures.* Mixtures of two either in equal amt. or at least 75% of one kind. (Declar. of character of mixture.)

Soups. % of each constituent (except NaCl) at least four-tenths

ITALY (cont.)

of that reqd. for dry matter of extract used. Labelling: description of product and its composition; name and address of manuf.; net wt.; declar. that product corresponds with standards.

Soup Cubes. Prepared from extract bases as under "soups, concentrated". Min. 12% of extract base. Dry matter (100°C.) min. 95%; NaCl, max. 60%; fat, max. 4%. Standard wt., 4 g. Labelling as for "soups, concentrated" (except net wt.). Cubes to be wrapped in moisture-proof paper, bearing name of product, name and address of manuf.

SUGAR

SO_2, max. 15 p.p.m. residue (no declr.)

VINEGAR AND VINEGAR PRODUCTS

Vinegar. From wine only. Total acidity, as acetic, min. 5%. No addition of acetic or other acids or colour. Preserv. SO_2, max. 50 mg/l. Spirit vinegar: for preserv. purposes only; no added colour.

Pickles. Labelling: wt. of drained veg. (g.); net wt. (g.).

FLAVOURING MATERIALS

Synthetic equivalents of natural products permitted as "natural". "Artificial" flavours limited to: ethyl acetoacetate, ρ-toluene aldehyde, allyl capronate, dimethyl resorcinol, methyl amyl ketone, methyl cyclopentenolone, ethyl-β-naphthol, allyl cyclohexyl propionate, methyl heptyne carbonate, ethyl methyl phenylglycidate, ethyl vanillin, γ -nonalactone, hydroxy citronellal, methylionones, naphthyl methyl ketone, propenyl guaethol and undecalactone. Maximum limits are set for the above in sweets, biscuits, etc. Permitted solvents: ethyl alcohol, diethylene glycol ethyl or propyl ethers, propylene glycol.

COLOURING MATTERS

NETHERLANDS

BEVERAGES, NON-ALCOHOLIC

Fruit Juice. Juice or dil. conc. juice; spec. grav.: strawberry, 1.025; red, white currant, 1.036; black currant, 1.040; apple or pear, 1.045; cherry, pineapple or grape, 1.050; lemon, 1.034; orange, 1.042; grapefruit, 1.036; tomato, 1.018. Raspberry juice: sugar-free solids, min. 3.0%. Alcohol content, max. 0.5% by vol. (raspberry, 1.5%). Optional: citric acid, fruit essence; to tomato juice: salt, max. 1.5%. Preserv. (if not labelled "pasteurized" or "sterilized"): SO_2, max. 150 p.p.m., or benzoic or sorbic acid, max. 400 p.p.m. (citrus juices, SO_2, max. 400 p.p.m., and/or benzoic or sorbic acid, max. 150 p.p.m.).

Sweetened Fruit Juice. Sugar, max. 20% (citrus fruits, 45%); declar. of % added. Preserv. from fruit juice used (as above) only.

"Fruit-ade" Syrups. Syrups for lemonade, etc., bases: fruit juice, sugar soln., citric acid, lactic acid or citrus juice. Sugar, min. 55%;

fruit juice (on sp. grav. basis as above), min. 30% (lemon, pineapple, 20%). Optional: fruits (in whole or part), lemon juice or citric acid, fruit essence, agar, pectin, sod. alginate, gelatine, locust kernel gum, sod. carboxymethylcellulose. (max. all stabilizers, 0.2%), permitted colouring. If citrus, may be called "squash syrup" or "fruit squash syrup". Preserv.: SO_2, max. 75 p.p.m. and/or benzoic acid, max. 250 p.p.m., sorbic acid, max. 250 p.p.m.

Imitation "Fruit-ade" Syrups. Optional: sugar, glucose, citric, tartaric, lactic acids, harmless colourings and essences, fruits, fruit juices, plant parts, herbs, spices, spice extracts. Sugar, min. 55%. Preserv.: SO_2, sorbic or benzoic acid, max. 250 p.p.m. (if fruit or fruit juice present, SO_2 max. 100 p.p.m. *or* benzoic or sorbic acid, max. 250 p.p.m.). Labelling: no use of word "pure", etc., or words implying presence of fruits.

Tonic Water. Sugar, min. 6%. Quinine hydrochloride, min. 40 mg./litre.

COCOA, CHOCOLATE, AND SUGAR CONFECTIONERY

Cocoa Mass. On fat-free dry matter: ash, max. 14%; alk. of ash, max. 155 ml. N/1 alkali/100 g. Max. phosphatides 0·5%.

Cocoa Powder. Fat, min. 20% of dry matter. If less, must be described as strongly defatted with 8–20% fat. Moisture, max. 9%. Shell, ash, alk. of ash, as for cocoa mass.

Chocolate. Total cocoa constits., min. 35%; fat-free dry matter, min. 14%; cocoa butter, min. 18%.

Couverture. Total cocoa constits., min. 35%; fat-free dry matter, min. 2·5%; cocoa butter, min. 31%.

Milk Chocolate. Total cocoa constits., min. 25% fat-free dry matter, min. 2·5%; milk fat, min. 3·5%; total milk solids, min. 14%.
Total fat, min. 25% (for milk couverture min. 31%); sucrose, max. 55%.

Covered and Filled Chocolates. Standards for chocolate part as above. Coating must comprise min. 25% total wt. Detailed labelling regulations cover ingredients declaration, etc.

COFFEE PRODUCTS

Coffee Extract, Powdered Coffee Extract. Coffee solids in liquid extract, min. 6%; caffeine, min. 4% of coffee solids; if described as caffeine-free, caffeine max. 0.4% of coffee solids. Optional: sugar, max. 50% of d.m. (declar.). No foreign subst., incl. artif. colours or preserv., but permission may be granted in certain cases, on application, for addition of agents for maintaining dryness of powders.

Coffee Extract with Caramel, Chicory, etc. Coffee extract solids, min. 50% of d.m. Liquid products: sugar-free dry matter min. 7%, max. 12% caffeine (unless "caffeine-free"), min. 0.2%, reducing sugars after "strong" inversion, max. 35% of dry matter. Solid products: moisture, max. 5%; caffeine (unless "caffeine-free"), min. 1.8% of dry matter; reducing sugars after "strong" inversion, max. 66% of dry matter.
N.B. Coffee extract powders for sale in automatic vending machines may contain certain anti-caking agents, max. 0·5%. The label must state "for automatic vending machines."

NETHERLANDS (cont.)

FATS AND OILS

Moisture, max. 0.5%; traces salt only (both only in animal fats solid at 15°C.). Optional: carotene and substances derived from annatto; octyl, dodecyl gallates, B.H.A., B.H.T., max. 0.01% (of each or of a mixture) (but not in cocoa butter), citric acid (if antioxidant used); or if intended for use in cakes and biscuits specially packed for good shelf-life, max. 0.04% (special labelling in such case, and fat not to be sold for direct consumption). No antioxidant in oils and fats used for bread. Labelling: declar. of "0.01% antioxidant," in prescribed form.

FISH PRODUCTS

Permissible additions (apart from accompanying sauce or liquid): salt, sugar, edible oil, spices and herbs, vinegar, lactic acid, smoke constits., and (to fish paste and fish sausage) farinaceous matter, max. 4% as dry starch. Preservs.: to uncooked products, benzoic or sorbic acid or their salts, max. 0.5%; to peeled shrimps, benzoic or sorbic acid, max. 1%. Artif. colour only in fish paste, shrimps in hermetic packs, smoked salmon substitute (declar. for this), fish roe (declar.). Sod. pyrophos., max. 0.5% only to filleted, breaded frozen fish. Labelling: detailed descriptive requirements and type sizes; unsterilized packs to be marked "keep cool, limited storage."

FLOUR AND FLOUR PRODUCTS

Wheat Flour. Moisture, max. 16.5%; ash, max. 1.5% of dry matter; crude "sand", max. 0.1%; acidity, max. 4 ml. normal alkali per 100 g. of product. Optional (max. per 100 kg. flour): (a) benzoylsuperoxide, 3.5 g., + calcium phosphate, 16.5 g.; (b) *o*- or *m*-toluylsuperoxide, 2 g., + wheat grist, 25 g., or calcium phosphate, 12 g.; (c) ammonium persulphate, 12.5 g., + calcium phosphate, 12.5 g.; (d) *l*-ascorbic acid, 5 g.; (e) rosehip powder, or fruit powder containing 5 g. *l*-ascorbic acid, 100 g.; (f) a mixture of (d) and (e), 500 g., plus malt, malt extract, and/or calcium phosphate, 25 g.; (g) lecithin preps. to max. 200 g. lecithin; (h) mixtures of permissible amts. of above ingreds. with flour or meal. No preservs., artif. sweeteners, or alum, or treatment with NCl_3.

Malt Flour. Ash, max. 1.5% of dry matter, water-sol. starch, min. 20%; otherwise as for wheat flour.

Self-raising Flour. Wheat flour with max. 10% added starch and max. 3% raising agent. Optional: permitted colouring matter. If "egg" mentioned in name, min. 15% egg or 5.5.% yolk, or equiv. dried material, reqd.

Alimentary Pastes. Wheat flour or meal. Optional: salt; additions as for flour, permitted colouring matter. Salt-free ash, max. 1.5% of dry matter. If described as egg product, min. 15% egg or 5.5% yolk, or equiv. dried material.

Pudding Powders, and similar. Flour and/or starch, permitted colour, raising agent (max. 3%). Optional: sucrose, milk constituents, harmless acid, binding agent, salt (max. 5%), flavouring, cocoa, coffee extract, fruits, If "egg" claimed, requirement as for self-raising flour. No artif. sweeteners or preserv.

Cake Powders. Self-raising flour, flavoured, coloured yellow with dried egg or yolk or with permitted colouring matter.

Custard Powders. Starch powder, with permitted colour, vanilla flavour, and salt (max. 1%).

FRUIT AND VEGETABLE PRODUCTS

Canned Fruits. Packing media: "water" (sugar content, max. 13%), "juice" (sugar, 13—25%), "syrup" (sugar, above 25%). Optional: citric acid, lactic acid, permitted colouring. Preserv. (in water and juice packs, if not pasteurized or sterilized): SO_2, max. 75 p.p.m., *plus* benzoic or sorbic acid, max. 250 p.p.m.

Tomato Puree. Optional: salt, max. 1.5%; permitted colour (to concentrates only). If described as "concentrated", "double-," "triple-" etc. concentrates, must have, when diluted with equal, double, triple, etc. wt. of water, a sp. gr. not below 1.018, calcd. on salt-free product.

Jams, Marmalade. *First grade:* sugar used, max. 1.4 times fruit (orange marm. 2.5 times, pineapple, 2.0 times, ginger and ginger mixtures, 3.6 times); water, max. 35%; sugar content of jam (calc. as sucrose), max. 61% (orange marm., pineapple, ginger, 63%) when calc. to basis of corresp. jam with 35% water content; pectin (as calcium pectate), max. 0.7%. Optional: citric acid; (strawberry only), permitted colour; SO_2, max. 50 p.p.m. "*Household*" *grade:* sugar, max. 2.0 times fruit (orange marm. 4 times, pineapple, 2.7 times, ginger and ginger mixtures, 5.5 times); glucose may replace sugar, but min. 30% sugar reqd.; water max. 35%; sugar *plus* glucose solids, max. 62% (orange marm., pineapple, ginger 64%) when calcd. to corresp. jam with 35% water; pectin, citric acid, lactic acid, as for first-grade. Optional: permitted colour; preserv. (SO_2, max. 75 p.p.m., or benzoic or sorbic acid, max. 250 p.p.m. unless product marked "pasteurized" or "sterilized". If in non-sterilizable pack, benzoic or sorbic acid max. 400 p.p.m.).

Low Sugar Fruit Spread (Jam). Fruit, min. 50%; sugar, max. 30%; sorbic acid, max. 0.025% and SO_2, max. 0.005%; pectin, agar, carageenan, sod. alginate, gelatine, carob gum, guar gum, sod. CMC, max. 2%; citric acid, max. 0.8%; calc. citrate, max. 0.35%; calc. phosphate, max. 0.07%; colours in prods containing strawberries, max. 0.05%; water. Must be called "Fruit product with max. 30% sugar".

Fruit Jellies. Sugar used, max. 1.4 times fruit juice (citrus jellies, 2.5 times, pineapple, 2.0 times). Water. max. 35%. Pectin, citric acid, lactic acid, preserv., as for jams, Glucose in "household" grade as for jams. Permitted colour: strawb. jellies only.

Imitation Fruit Products. (Imit. fruit jelly, "fruit-ade" syrups or powders, pudding sauces, imit. jelly powders or pastes, alcohol-free liqueurs, etc.). Optional: sugar, glucose, citric, tartaric or lactic acid, sod. bicarb., permitted colours and essences, binding agent, fruits, fruit juices, egg constits., edible oils and fats, plant parts, herbs, spices and spice extracts. Preserv.: SO_2, max. 250 p.p.m., or benzoic acid, max. 250 p.p.m.; if fruit or fruit juice present, SO_2 max. 50 p.p.m. as well as the benzoic acid; in effervesc. lemonades and lemonade powders, SO_2, benzoic acid, or a mixture of these (max. 75 p.p.m. in each case).

NETHERLANDS (cont.)

Labelling: no words such as "pure", etc., or suggestion of presence of fruits.

Fruit Sauces. Optional: citric, lactic acids; stabilizer (pectin, agar, sod. alginate, gelatine, carob gum, sod. carboxymethyl cellulose), max. 0.2%.

MEAT PRODUCTS

General. Optional additions: salt, salt containing max. 0.6% sod. nitrite, herbs, spices, water, sucrose, glucose, vinegar (not artif. coloured), small amt. sod. citrate (derived from blood as anticoagulant), add. sod. and pot. phosphates (max. 0.5%), glutamic acid or its sod. salt, saltpetre (max. 0.2%); max. sod. nitrite 0.05%. Ratio water to fat-free organic matter, max. 4.0 (except certain special sausage products and pickled meats). (% fat-free organic matter = 100 — % water, fat, starch and ash).

Sausage (Fresh). Preserv.: SO_2, max. 300 p.p.m.

Meat Paste. Farinaceous matter, max. 6% (as dry starch).

Meat Extract. Water, max. 20% total creatinin, min. 6% of dry matter. Optional: salt.

Liquid Meat Extract. Water, max. 68%; total creatinin, min. 1.5% of dry matter. Optional: salt, veg. extracts and/or spices.

Consommé. A meat extract product jelled at 15°C. Water, max. 85%; total creatinin, min. 1.5% of dry matter. Optional: salt, gelatine, spice extracts.

Concentrated Soups. Optional: benzoic acid, max. 250 p.p.m. (or equiv. sod. salt).

Bouillon Cubes. A meat extract product. Total creatinin, min. 0.5%. Optional: salt (max. 65%), fats, spices or spice extracts, veg. extracts.

Soup or Gravy Tablets. Salt-free solids, min. 50%. If presence of meat or meat extract claimed, the soup prepared by dilution (water only) as directed must have creatinine min. 0.08 g./litre. Gravy prepared as directed, min. 0.16 g./litre creatinine. Below these standards, description ". . . flavour" must be used. If no meat content, total nitrogen must be min. 3%, amino acid nitrogen min. 1.5%, and salt-free solids min. 30%; no use of word "meat".

All above soup tablet products, if claimed "with fat", must have fat, min. 10%; if "fat-rich", fat min. 25%. No artif. colour except colour allowed to be present in ingreds. No preservs., or worthless fillers. No alk. reaction to litmus.

MILK PRODUCTS

Condensed Milk (Unsweetened). Milk fat, min. 7.8%; milk fat in dry matter, max. 45.0%; total milk solids, min. 25.9%; stabilizers (only sod. chloride, sod. carbonates sod. phosphate but not polyphosphates, sod. citrate, calc. chloride), max. 0.2%. Streptococci not in considerable numbers; no coli-aerogenes or pathogens; no unusual number of staphylococci in the sediment. Labelling: must be described as "sterilized"; if fat content stated, content of fat-free milk solids must also be given.

Condensed Milk (Sweetened). Milk fat, min. 8.0%; total milk solids, min. 28.0%; otherwise as for unsweetened condensed milk.

Milk Powder. Moisture, max. 5%. Milk fat in dry matter, min. 41% for "fat"; 26% for "full"; 1.5% for "partly skimmed"; max. 1.5%

for "skimmed". Na and Ca salts of HCl, carbonic, phosphoric and citric acids, max. 0.5%.

Milk Powder Mixtures. Milk solids, min. 25%. Fat content of milk portion to correspond with standard for grade claimed.

SPICES, CONDIMENTS, AND FLAVOURINGS

Spices and Herbs. Definitions for many spices, incl. quant. standards for ash, sand, volatile oil, non-volatile ether extract, etc. Max. 50 p.p.m. ethylene oxide as residue from fumigation.

Mustard Paste, Table Mustard. Water, max. 78%; total sulphate, as SO_4, max. 1.5%; salt, max. 15% of dry matter; salt-free ash, max. 8% of dry matter; crude sand, max. 1% of dry matter. Optional: vinegar, water, whey, salt, spices, sugar, permitted colour. Preserv.: sorbic or benzoic acid (each, max. 250 p.p.m.).

Iodised Salt. Pot. iodide content, 39 p.p.m.

Table Salt. Colloidal silicic acid, Ca. Mag. silicate, Sodium-silico-aluminate, tricalc. phosphate, Ca. Mag. carbonate, Ca. stearate, max. 1%. Pot. Sod. ferrocyanide, max. 10 mg/kg.

SUGAR PRODUCTS

Invert Sugar Syrup. Total solids, min. 75%; sucrose, max. 20%; ash, max. 0.5%; SO_2, max. 40 p.p.m.; acidity, max. 7 ml. N. alkali/100 g.

Glucose Syrup. Total solids, min. 80%; reducing sugar (as dextrose), min. 43% of dry matter; dextrin, max. 49% of dry matter; ash, max. 0.6%; SO_2, max. 20 p.p.m., 400 p.p.m. in confectioner's syrup; acidity, max. 2.5 ml. N. alkali/100 g.; arsenic, not detectable in 0.5 g.

VINEGAR AND VINEGAR PRODUCTS

Mayonnaise. Oil, min. 80%, hens egg yolk, min. 6%; no lecithin. Optional: benzoic or sorbic acid, max. 0.1%; colours E 100, E 102, E 103, E 104, E 105, E 110, E 160 (see page 697) only; thickeners, max. 0.3%; E.D.T.A., max. 75 p.p.m.

Salad Cream. Oil, min. 25%, max. 79%; egg yolk, min. 7.5%. Optional: benzoic or sorbic acid, max. 0.2%; thickeners, max. 10% (cellulose ethers, max. 2%).

Vinegar. Acetic acid, min. 4% wt./vol. (wine vinegar, 5.5%). Salt-free dry matter, min. 0.7%. Optional: salt, caramel colour. Solns. of acetic acid 12.5% to 80% wt./vol. to be called "acetic acid solution" and specially labelled as dangerous if undiluted. If over 80% must be called "essence of vinegar" or "acetic essence".

Sauces, Ketchups. Salt-free dry matter, min. 10%. Optional: benzoic or sorbic acid, max. 1,000 p.p.m. No added colouring matter except that from ingreds. (where permitted).

METALLIC CONTAMINATION

Apparently control of metallic contamination is based on prohibition of the use of machinery, utensils, containers, solder, etc., containing harmful metals, and the authorities have powers of inspection of factories to secure compliance.

COLOURING MATTERS

See Tables, pp. 806-812.

PRESERVATIVES

As stated above for particular foodstuffs.

NETHERLANDS (cont.)

LABELLING

Specified size of type prescribed for statements of net weight or measure, and often also for the designation of the article. Special marking arrangements for some classes of foods, *e.g.*, cheese, produced in the country. Exporters should satisfy themselves that labels conform to the very detailed requirements laid down.

NORWAY

BEVERAGES, NON-ALCOHOLIC

Fruit Juice. Obtained by pressing, with or without previous heating and enzyme treatment. Alcohol, max. 0.5%. Optional: CO_2; ascorbic acid; malic, lactic, citric acids and sod., potass. and calc. salts, max. 0.2%; agar, alginates, water sol. cellulose ethers, gelatine, carrageenan, tragacanth, max. 0.5%; pectin; permitted natural colours (see Table, p. 812); antifoam agents (fatty acid esters opt. in comb. with glycerol and paraffin oil, phenyl and methyl silicones); juice other than named juice, max. 5% in single or 2 fruit juices (rhubarb juice may not be added to other juices); preservatives (declr.): p-hydroxybenzoic acid esters and sod. salts, max. 0.09%, sorbic acid and sod., potass. and calc. salts, max. 0.1%, benzoic acid and sod. salt, max. 0.15%, SO_2, max. 0.005%. Two juice mixtures: kind named first must preponderate. Other mixtures to be called "Mixed juice", "Household juice". On rhubarb juice no illustration of other plants on label and must be called "Rhubarb juice". Declr. CO_2.

Sweetened Fruit Juice. Juice, min. 50% (min. 85% in apple juice). Juice, min. 40% for blackcurrant, redcurrant, raspberry, strawberry, cherry juice if called "syrup". Sugar, glucose, glucose syrup (declr. g./l.); sol. solids (refract.) max. 55% (max. 25% in apple and 63% in syrup). Otherwise as for fruit juice.

Fruit Must. Pure juice, sugar (glucose, glucose syrup) and ascorbic acid only. Dry matter, max. 15%; alcohol, max. 0.5%.

Fruit Nectar. Pure juice, sugar (glucose, glucose syrup), ascorbic acid and water only. Pure juice, min. 40% (min. 30% for black- and redcurrant); dry matter, max. 15%; alcohol, max. 0.5%; SO_2, max. 10 p.p.m.

Fruit Juice Concentrate. Min. 2/3 of orig. water removed (declr. degree of conc.). Optional: may add back aroma subs. extracted during concn.; sugar, glucose, glucose syrup. Declr. % sugar added. State degree of concn. and directions for use. Otherwise as for fruit juice.

Fruit Squash. Prepared from juice or juice conc., water, sugar. Sol. solids (refract.), max. 15%. Pure juice, min. 20% (declr. % on label). Optional: CO_2 (declr.), ascorbic acid; malic, lactic, citric acids and sod., potass. and calc. salts, max. 0.2%; pectin; agar, alginates, water sol. cellulose ethers, gelatine, carrageenan, tragacanth, max. 0.5%; permitted natural colours; glucose, glucose syrup; saccharin, max. 0.01% (declr.); antifoam agents (as for fruit juice); quinine and salts (declr.), max. 0.01% in ready-to-drink prod. of squash conc.; preservatives (declr.): benzoic acid and sod. salt, max. 0.15%, p-hydroxybenzoic acid esters and sod. salts, max. 0.09%, sorbic acid and sod., potass. and calc. salts, max. 0.1%, SO_2, max. 0.0035%. Prod. to be called "Fruit squash" with addn. of name of fruit from which it is made.

Lemonades. Prepared from water and natural extracts of fruit, with or without added sugar. May add juice, conc. juice or crushed fruit. Optional: CO_2 (declr.); ascorbic, malic, lactic, citric acids; essential oils and natural essences; phosphoric acid, max. 0.06%; quinine and salts (declr.), max. 0.01%; permitted natural colours; galactamannan; pectin; saccharin and sod. salt (declr.), max. 0.005%; sucrose diacetate hexaisobutyrate, max. 0.05%; preservs. (declr.): benzoic acid and sod. salt, max. 0.05%, sorbic acid and sod., potass. and calc. salts, max. 0.1%; SO_2, max. 0.0015% provided no other preservs. used. Prod. to be called "—— squash" plus name of fruit used if after diln. with water gives drinkable lemonade with min. 8% pure juice. State intructions for addn. of water and poss. sugar to prepare drink. If called "ready-to-drink prod. with sugar added" must contain 10% solids (refract.). Prod. containing artific. sweetener must have sweetness equiv. to 10% sugar. Declr. % pure juice in finished prod. All letters in description to be of same size, shape, colour and design. If contains less than 8% pure juice when ready to drink may not use illustrations of plants or parts of plants.

Substitute or Substandard Beverages. Prods. which do not meet the requirements for fruit juice, fruit squash, squash and lemonade but are considered to be substitutes for them because of flavour and appearance. Must be labelled in Norwegian. Name of prod. must be Ministry approved. May declr. type of flavour, *e.g.*, "with orange flavouring". May not use name of standardised prod. being imitated or words or illustrations of fruit even in trade mark. Declr. all ingreds and declr. whether colours and flavours are natural or artific. If name of prod. consists of two or more words they must be adjacent and in letters of similar size, shape and design.

Soft Drinks, Carbonated Beverages. Substitute for lemonades. Prepared from water and artific. flavour. Optional: sugar; natural fruit flavour; essential oils and essences (declr.); caffeine (declr. caffeine content in proportion to amount in a cup of coffee—one cup of coffee contains 90 mg caffeine), max. 0.015%; water sol. cellulose ethers to prods. sweetened exclusively with artific. sweeteners only, max. 0.05%; sod. cyclamate only to diabetic prods.; otherwise as for lemonades. Prod. must be called "soft drink" or "carbonated beverage" or "soft drink with simulated —— flavour" with name of fruit inserted.

Concentrated Soft Drinks. Prod. which after diln. with water gives soft drink or carbonated beverage as above. Declr. diln. ratio for making prod. ready for consumption. Declr. CO_2. Labelling as for soft drinks above.

COCOA, CHOCOLATE, AND CONFECTIONERY

Cocoa Mass. Cocoa butter, min. 50%; shell and germ, max. 2.5%.

NORWAY (cont.)

Alkalization: sod., potass., or ammon. carbonate or hydroxide, max. 2.5% as K_2CO_3.

Cocoa Powder. Cocoa butter, min. 20% (if less, must be described "low-fat"). Spices or harmless flav. substances, max. 1% unless declar.

Cocoa Butter. Obtained by pressing only. Solvent-extracted material to be called "cocoa fat"; must not be used in chocolate or choc. products.

Chocolate. Cocoa mass *plus* added cocoa butter, min. 40%. No foreign fat, or filling substances. Optional: lecithin; essential oils and essences; vanillin, ethyl vanillin; glycerol; mono and diglycerides; sorbitol; natural waxes (couverture only); sod. silico aluminate, max. 1% (choc. powder only); polyglycerol fatty acid esters, max. 0.5%; sorbitan fatty acid esters. Declar. of more than 1% of spices, or 5% of materials such as nuts, milk, cream, honey.

Couverture. As for chocolate.

Milk Chocolate. Mass *plus* added cocoa butter, min. 30%; full-cream milk solids, min. 12.5%.

Nut Chocolate, Almond Chocolate, etc. Mass *plus* added cocoa butter, min. 30%; nuts, etc., min. 5%.

Confectionery. Optional: paraffin as lubricant, max. 0.5%; alkyl gallates (only in butter croquant, max. 0.01%); ammon. chloride (only in pastilles, max. 10%); glycerine; sorbitol; esters of p-hydroxybenzoic acid and sod. salts (only in marzipan, max. 0.1%), vanillin, ethylvanillin, essential oils and essences; agar, alginates, water soluble cellulose ethers, gelatine, carrageenan, mono and diglycerides, pectin, tragacanth, gum arabic, galactomannan; permitted colours (see Tables, pp. 806-812); gold, silver, alumin., tin, copper, for decorations; sorbitan fatty acid esters; antifoam agents (fatty acid esters optionally combined with glycerol and paraffin, phenyl and methyl silicones). If word "chocolate" or "cocoa" occurs in the designation, choc. or cocoa of above standard must be present in recognizable amt.

EGG PRODUCTS

Optional: alkyl gallates, max. 0.01% of fat content in dried egg yolk; benzoic acid and sod. salt, max. 0.5% (declar.), glucose oxidase; sod. orthophosphate, max. 0.5%, in dried egg white.

FATS AND OILS

Antioxidants. Tocopherols only.

Margarine and Shortening. Optional: diacetyl; essential oils and essences; permitted natural colours; lecithin; lactic, citric acids; mono and diglycerides.

Bakery Fats Mixtures. Optional: amylase; ascorbic acid and sod. salt; water soluble cellulose ethers, max. 5%; enzymes (glucose oxidase, papain, pectinase); glyceryl lactopalmitate (or stearate), max. 7%; Sunset Yellow FCF (declr.); sorbitan fatty acid esters; mono and diglycerides of diacetyl tartaric acid, max. 7%; mono and diglycerides of fruit acids, max. 3%; propionic acid and salts, max. 0.2%; sod. and potass. carb.; sod. orthophosphate; tocopherols; substances permitted in margarine.

FISH PRODUCTS

Fish Paste. Farinaceous matter, max. 5% starch (higher amts. if declar.).

Canned Fish (Sterilized). Optional: citric acid and sod., potass. and calc. salts; antioxidants as for meat products; orthophosphoric acid, max. 0.4% of brine (for shellfish only); permitted natural colour; sod. glutamate; acetic acid (shellfish only); essential oils and essences (declar. artific.); diacetyl in sauces; thickeners as for prepared meat prods. in prods. in jelly or sauces only.

Unsterilized Fish Products. (anchovies, pickled herring, caviar, herring fillets, etc.). Optional: acetic acid; permitted artific. colours (Tables, pp. 806-811) only to caviar substitutes; saccharin and sod. salt, max. 0.04% (declr.); substances permitted in canned fish. Preservs. (declar.): benzoic acid, max. 0.5%; esters of *p*-hydroxybenzoic acid or their salts or mixtures of same, max. 0.05%; hexamethylene tetramine, max. 0.05% (caviar, 0.1%); sorbic acid and Na, K, Ca salts, max. 0.2%; boric acid, max. 0.2% in caviar if other preserv. not used.

Crab Paste, Dressed Crab, (and corresponding lobster products). Crab or lobster content (meat, liver and roe), min. 65%; starch content, max. 4%; no added fish (or added crab in lobster products). Products below this standard may be sold if not given above designations, and if compn. declared (*e.g.*, "prepared from lobster and fresh fish").

FLOUR AND FLOUR PRODUCTS

Flour Confectionery. Optional: water sol. cellulose ethers in cake mix and glazing fat, max. 5%; ascorbic acid and sod. salt; cysteine, max. 0.005% of dough; acetic acid and sod., potass. and calc. salts; citric and lactic acids; enzymes (amylase, glucose oxidase); essential oils and essences to cakes, pastries and creams for filled biscuits; thickeners: agar, alginates, water sol. cellulose ethers, gelatine, alginates, carrageenan, pectin, gum arabic, tragacanth, only to pastries; galactomannan; permitted colours to cakes, pastries and creams for filled biscuits only (Tables, pp. 806-812); gold, silver, alumin., tin, copper for decoration only; calc. saccharate to whipped cream only; lecithin; maltol; mono- and diglycerides of diacetyltartaric acid, max. 0.6% of flour; mono- and diglycerides; mono- and diglycerides of fruit acids, max. 0.3% of flour; sod. stearyl fumarate, max. 0.5% of flour; orthophosphoric acid and sod., potass. and calc. salts; polyglycerol esters of fatty acids, max. 0.5% in biscuits, max. 2.5% in cake mixes; polyoxyethylene sorbitan fatty acid esters; sorbitan fatty acid esters; preservs. (declr.): p-hydroxybenzoic acid esters and sod. salts (*iso*propyl alcohol as solvent), in cake, max. 0.1% of finished prod., sorbic acid and sod., potass. and calc. salts in cake, max. 0.2% of finished prod., propionic acid and sod. and calc. salts (no declr.) in cake, max. 0.5% of finished prod.; propylene glycol monostearate, max. 0.1% in fats for cake mixes. See also Bakery Fats Mixtures on p. 742.

FRUIT AND VEGETABLE PRODUCTS

Fruit Products, General. Arsenic, max. 1 p.p.m. (as As); lead, max. 2 p.p.m.; copper, max. 50 p.p.m.; tin, max. 250 p.p.m. in canned prods.

Canned and Bottled Fruit. Optional: sugar, glucose, dextrose; ascorbic acid; acetic, malic, lactic, citric acids; thickeners: alginates, cellulose ethers, carrageenan, max.

NORWAY (cont.)

0.5%; galactomannan; permitted natural colour; permitted artific. colour to cherries in fruit salad and fruit cocktail only; calc. chloride for ppt. of oxalic acid; pectin; antifoam agents as for fruit juice; SO_2, max. 0.005% (declr.); spices (declr.). Labelling: if dried fruit used word "dried" must be used in name of prod. (may add 5% dried fruit to fruit salad and fruit cocktail without declr.).

Canned Peas (in brine). If alcohol-insol. carbohydrate over 22%, must be labelled "Canned over-ripe peas". Dried peas must be called "Canned dried peas". No added colour.

Tomato Puree. Sol. solids (refract.) min. 25% (sugars, min. 40% and acid, calculated as citric, max. 10% of solids). Water insol. solids, max. 16%. Salt, max. 5% of total solids. No added sugar. Must be packed in lacquered tin-plate or glass or other approved material.

Tomato Ketchup. Prepared from tomato puree, salt, spice, vinegar, onion and sugar. May add max. 10% apple puree (declr.).

Spinach Puree. Dry matter, min. 6%.

Jams. Sol. solids (refract.) max. 60% (*sic*); fruit content, min. 40 g./100g. finished prod. (min. 25 g. blackcurrants, 33 g. rose hips). Two-fruit jams: amt. of each fruit to be min. 30% of total wt. of raw materials; that in larger amt. to be named first (but one of fruits may be min. 20% of total fruit, if name of such fruit follows word "with" in designation). Declr. total % sugar content (inc. glucose solids). Optional: ascorbic acid; antifoam agents as for fruit juice; citric, malic or lactic acid, and their sod. potass. or calc. salts, max. 1%; glucose or glucose syrup; natural colour; colouring with other fruit juice, max. 5% of total fruit used; pectin; agar, alginates, water soluble cellulose ethers, gelatine, carrageenan, gum tragacanth, max. 0.5%. Preserv.: benzoic acid, max. 1,500 p.p.m. (or equiv. sod. salt) (declar. if over 350 p.p.m.); esters of *p*-hydroxybenzoic acid or equiv. salts or mixtures of same, max. 900 p.p.m. (declar. if over 200 p.p.m.); sorbic acid, max. 1,000 p.p.m. (declar. if over 250 p.p.m.); SO_2 from pulp or liquid pectin, max. 50 p.p.m. (declar.).

Citrus Marmalades. Fruit content min. 20% pip-free fruit; sol. solids (refract.) max. 60% (*sic*). Optional: as for jams.

Fruit Jellies. Fruit juice and/or extract, min. 40 g./100 g. finished prod. (min. 25 g. blackcurrants, 33 g. rose hips). Sol. solids (refract.), max. 60% (*sic*). Optional: as for jams.

Candied Fruits, Preserved Fruits. Optional: permitted colour (declar.); essential oils and essences; otherwise as for jams.

Dried Fruit. SO_2, max. 2000 p.p.m. (declr. "contents to be boiled before consumption").

Dried Vegetables. Moisture, max. 8%. Optional: SO_2, max. 2,000 p.p.m. Labelling: swelling properties may be stated (declr. "contents to be boiled before consumption").

INVALID FOODS ETC.

Synthetic sweeteners allowed; declar. of addition and purpose. Declar. also of any sugar present. Products for diabetics require approval and special marking.

Foods to which vitamins and minerals are added must not contain more than 3 times daily requirement, taken as: natural vit. A, 2,500 I.U.; natural carotene, 5,000 I.U.; vit. D, 400 I.U.; vit. B_1, 1.5 mg; vit. B_2, 1.7 mg; nicotinic acid and amide in the B complex, 15 mg; vit. C, 30 mg; calcium, 0.8 g; iron, 12 mg; iodine, 0.1 mg.

MEAT PRODUCTS

Meat Pastes (and similar products). Optional: milk, farinaceous material (not soya). Starch, max. 3.5%; glucono-delta-lactone, max 0.6%.

Prepared Meat Products. Optional: acetic, lactic, citric acids; glucono-delta-lactone, max. 1% in cured sausages; sugars; sod. glutamate; sod. caseinate and other animal or veg. protein, max. 2% (declar.); potass. and sod. polyphosphates for cooked hams and tongues only; thickeners: agar, alginates, water sol. cellulose ethers, gelatine, carrageenan, mono- and diglycerides of fatty acids, pectin, tragacanth, only to prods in jelly or sauces, max. 0.5%; smoke flavour with spec. permission only.

Cured Meat. Nitrite max. 200 p.p.m. Meat rolls etc., nitrite max. 60 p.p.m. Declr. nitrite by name. Cellulose ethers or alginates in combn. with potass. sorbate and benzoic acid or p-hydroxybenzoic acid esters for surface treatment.

Antioxidants. The following may be added to meat products in max. amts. shown, as per cent. of fat content: alkyl gallates, 0.01%; B.H.A., B.H.T., 0.02%; ascorbic acid (only in certain products); tocopherol.

SPICES, CONDIMENTS, AND FLAVOURINGS

Mustard. Declar. of any addition of starch, flour, or colouring.

Vanilla (essence, extract, sugar, etc.). May contain synth. vanillin or other synth. substitute if not described as "genuine".

VINEGAR AND VINEGAR PRODUCTS

Vinegar. Acetic acid, min, 4% (5% if not of fruit origin), max. 12%. (Spirit vinegar, min. 35%). Grades of acetic acid strengths: "table", "household", etc., 50 to 55 g./litre; "pickling", etc., 70 to 75 g./litre; "strong" etc., 115 to 125 g./litre; "preserving", 95 to 105 g./litre (only to preserving factories, in packages of min. 10 litres). Distinctive designations for fermented and synth. products. Malt vinegar must be prepd. from min. 90% of "malt" material. Optional: sugar, salt, caramel colour, alkanna extr., traces of substances formed by catadynizing, SO_2 (max. 200 g./litre), ethereal oils and essences for adjustment of flavour (spirit vinegar only). If declar., aromatic extracts, fruit juices, or ethereal oils may be added to fermented (brewed) vinegar, and artif. flav. to spirit vinegar. Labelling: appropriate designation, strength to nearest whole number, name and address of manuf. or importer, and reqd. declarations. Imports to be marked as foreign. Special sizes of type.

Pickles. Optional: spice (declr.), vinegar, sugar, preservs. (as for jams), org. acid, and salts (as for jams), Pot. alum sulphate, max. 0.1%.

COLOURING MATTERS

See Tables, pp. 806-812. Declaration of artif. colours required, see Labelling below.

NORWAY (cont.)

OTHER ADDITIVES

Detailed permitted list issued annually (similar but not identical to Swedish lists).

LABELLING

Must state name and address of producer or importer; country of origin; net weight or volume (except cakes and biscuits in transparent packs); ingredients, date of production sometimes required; shelf life on perishable goods; declare preservatives, inc. nitrate and nitrite (except if less than 0.035% benzoic, 0.025% sorbic acids, 0.01% SO_2 or 0.02% *p*-hydroxybenzoates), saccharin, artific. colour (except on sugar and choc. confect., cakes, custard), declr. Tartrazine and Amaranth by name, artific. flavour in fruit and veg. prods., carbonated bevs. Type size min. 3 mm. English acceptable.

PORTUGAL

BEVERAGES, NON-ALCOHOLIC

Fruit Juice (for immediate consumption). Preserv. (declar.): SO_2, max. 0.0125 g./100 ml.

Fruit Juice (for further processing except non-alcoholic drinks and syrups). Preserv. (declar.): benzoic acid, max. 0.15 g./100 ml., or equiv. sod. benzoate; SO_2, max. 0.125 g./100 ml.; or *p*-oxybenzoic esters or equiv. sod. salts, max. 0.09 g./100 ml.

COCOA AND CHOCOLATE

Cocoa Nib and Mass. Shell and germ, max. 3%. Alkalisation: volatile or non-volatile alkalis, max. 4% (as K_2CO_3).

Sweetened Cocoa Powder. Declar. of added sugar.

Chocolate. Cocoa ingreds., min. 35%.

FISH PRODUCTS

Fish Pastes. No preserv. or added colour.

Fish Preserves, unsterilized. Preserv. (declar.): benzoic acid, max. 0.5%; *p*-oxybenzoic esters, max. 0.05%; or a mixture of 0.05% of these esters with 0.025% of hexamethylene tetramine. No added colour except in shrimps Tartrazine, Amaranth, Carotene (declr.).

Caviar. Preserv. (declar.): hexamethylene tetramine, max. 0.1%. No added colour.

FLOUR PRODUCTS

Flour, Starches, and substances made from them. No preserv. or added colour.

FRUIT AND VEGETABLE PRODUCTS

Canned Vegetables. Preserv. (declar.) (green veg. only) benzoic acid, max. 0.2% (or equiv. sod. benzoate); or *p*-oxybenzoic esters, max. 0.08%. No added colour,

Dried Fruit. SO_2, max. 2000 p.p.m.

Jams, Jellies. Residual amounts SO_2 allowed. Colour permitted.

CANNED MEAT PRODUCTS

Preservs. prohibited. Nitrate, max. 1% (as KNO_3), allowed. Traces of natural colouring permitted in tongues only (declar.).

SPICES

No preservs., except to table mustard (SO_2, max. 0.05%). No colouring.

SUGAR AND SUGAR PRODUCTS

Refined Sugar. SO_2, max. 150 p.p.m. No added colour.

Glucose Syrup. SO_2, max. 10 p.p.m.

VINEGAR PRODUCTS

Pickled green vegetables. Preserv. (declar.): benzoic acid, max. 1.25 g./100 ml. (or equiv. sod. benzoate). No colouring.

ADDITIVES

List of permitted colours, see Tables, pp. 800-806, and permitted preserv. Use of all other additives, inc. antioxidants, only if permission obtained. Must give specification for additive and details of food in which it is to be used and levels of use. Address of authority: Inspeccao-Geral dos Produtos Agricolas e Industriais, Avenida de Berna, l-Lisbon 1, Portugal.

SOLVENTS

Ethyl alcohol.

ARTIFICIAL SWEETENERS

Prohbd. in foods.

LABELLING

Declr.: name of food; its type or class; list of ingreds; net contents, drained wt.; name and address of producer, packer, importer, wholesaler or retailer; country of origin; where necessary: shelf life, storage instructions, directions for immediate consumption, irradiation; and any other information required by other regulations. Need not declr. list of ingreds. of nature of food widely known. Use specific names for ingreds. except may use following generic names: animal fats and oils, vegetable fat, herbs, spices, starches (except modified starches), anticaking agent, antioxidant, bleaching agent, colours, emulsifiers, flavours, maturing agents, preservatives, stabilizers, thickening agents (including modified starches), vegetable gums. Declr. water if is informative to consumer (no declr. in brine, syrup, broth or sauce in compd. food). On dried foods to which water has to be added may list ingreds as reconstituted if declr. have done so. Declr. "eat by" date, subject to storage instructions, on perishable foods. All obligatory declr. in Portugese (may have other langs. also).

SPAIN

Standards are only guidelines, they have not been passed by Parliament. All foods and labels must be checked with the authorities before exporting to Spain. Address given on p. 749.

BEVERAGES, NON-ALCOHOLIC

Fruit juices. Natural juice only, with or without pulp. Permitted preservs., acids, colouring matters.

Fruit Syrups (Natural). Fruit juice, min. 30%. Optional: Permitted organic acids and colours.

Artificially-flavoured Syrups. Optional: as for fruit syrups; synth. flavours must also be authorized.

Flavoured Soft Drinks. Coloured, may be turbid. Total sugar, min. 6% (as sucrose) or its equiv. artific. sweetener. Tartaric and citric acids, max. 1%, malic, max. 0.5%, lactic, max. 0.3%, phosphoric, max. 0.02% (0.07% in colas) (may use salts of these acids). Optional: artific. sweetener; fruit juice; CO_2; sod. chloride, max. 0.1%; ascorbic

SPAIN (cont.)

acid, max. 0.03%; colours; emulsifiers and stabilisers; preservatives; caffeine, max. 0.015% in colas.

Fruit Flavoured Soft Drinks. Natural extracts and flavourings of veg. origin. No artific. sweeteners. Sugars, min. 8% as sucrose. Acids and other additives as for flavoured soft drinks. Quinine, max. 0.01% in tonics.

Fruit Juice Soft Drinks. Fruit juice: orange, min. 8%; lemon, min. 6% (levels laid down for other fruits). Sugars, min. 8% as sucrose. No artific. sweeteners. Optional: natural flavourings; CO_2; acids and other additives as for fruit flavoured soft drinks.

Soft Drink Powders. Powders for prepn. of soft drinks by addn. of water. Optional: additives permitted in the different categories of soft drinks; sod. bicarb.; adipic acid, max. 0.02%.

Whole Fruit Soft Drinks. Comminuted fruit, min. 4%; sugars, min. 8% as sucrose. No artific. sweeteners. Optional: colours; preservatives; emulsifiers and stabilisers; acids and quinine as for fruit flavoured soft drinks.

CHOCOLATE AND SUGAR CONFECTIONERY

Chocolate. Cocoa constituents, min, 35%. Dry defatted cocoa, min. 14%; cocoa butter, min. 18%. Chocolate "fino", cocoa butter. 26–32%. Chocolate "fundente", cocoa butter, min. 32%.

Milk chocolate. Dry defatted cocoa, min. 4%, total cocoa constituents, 22%; skim milk solids, 10.5%; total fat, 20%.

Chocolate with dried fruit and cereal. As for chocolate. Fruit and cereal, 8–40%.

Chocolate with fruit. As for chocolate. Fruit, 5–40%.

Couverture. Cocoa butter, min. 31%; cocoa constituents, 35%.

Milk couverture. As for milk chocolate but min. 31% total fat. Optional: flavours, lecithin, max. 0.3%; sucrose replaced by other sugars, max. 5% without decl.

Regulations for variety of other chocolate specialities and confectionery.

DIETETIC FOODS

Nat. colours, flavours, artif. sweeteners. Labelling regulations in force.

FLOUR PRODUCTS

Alimentary Pastes. Colouring matters prohibd.

FRUIT AND VEGETABLE PRODUCTS

Jams. "Compota"—max. 15% sugar. "Confetura"—min. 50% sugar. "Mermelada"—45–65% sugar. Optional: Max. 0.5% lactic or tartaric acids. Artif. colours prohbd.

MEAT PRODUCTS

Preserved Meats. No preservs. allowed except the use of potass. nitrate (max. 5%) in pickling salt. Detailed labelling statements requd. in Spanish.

TABLE SALT

May contain Na, Ca phosphate, Mg, Ca silicate, and substances on permitted list.

VINEGAR

Total acid calc. as anhydr. acetic acid, min. 5%, alcohol, max. 1%.

COLOURING MATTERS

Synthetic organic colours as in Tables, pp. 806-811, allowed in certain products such as confectionery.

FLAVOURINGS

List of prohibited natural plants and parts of plants and restrictions on levels of some natural flavourings, e.g. coumarin, max. 10 p.p.m. List of permitted artific. flavourings and additives permitted in them. Solvents: ethyl, *iso*-propyl, *n*-propyl and benzyl alcohols; glyceryl mono-, di- and triacetates; propylene glycol and its mono- and diacetates and dibenzoate; ethyl citrate and lactate.

FOOD ADDITIVES

A positive list of permitted food additives is currently being drawn up and manufs. of food additives are being asked to justify the use of all food additives. All food manufs. must apply for permission to use all additives to: Direccion Consul de Sanidad, Plaza de Spana 17, Madrid.

SWEDEN

NEW FOOD LAW

Eventually all regulations to be renewed, to date new regulations cover labelling, packaging, storage and transport, especially of perishable foods. No sale of imitation meat, milk or butter (other than margarine) nor any nutritional fortification without permit. All food must be imported by registered importer resident in Sweden. Certain foods require certificate proving, e.g., pasteurisation or freedom from aflatoxins.

BEVERAGES, NON-ALCOHOLIC

Pure Fruit Juice. Obtained from fruit by pressing without addition of water. Optional: citric acid; dimethyl polysiloxane only to pineapple juice, max. 10 mg./l.; salt; sugars, max. 50 g./l.; preservs (declr.) see under "Preservatives".

Fruit Juice (Drinks). Juice, min. 9% (citrus, min. 6%). Optional: ascorbic acid; BHA and BHT only in citrus prods, max. 5 mg./l. finished prod.; citric acid and sod., potass. and calc. salts; tragacanth, guar gum, carob gum, gum arabic, CMC and sod. salt, carrageenan, pectin; pectinase; saccharin (declr.), max. 50 mg./l. (blackcurrants, max. 0.1 g./l.) in finished prod.; sugars; sorbitol; preservs (declr.): benzoic acid and sod. salt, max. 0.05%; sorbic acid and sod. and potass. salts, max. 0.05%; SO_2, in citrus only, max. 0.03%. Declr. % total added sugars if exceeds 1.5%. State degree of diln. on conc. prods. Labelling otherwise as for jam.

Fruit Nectar. Fruit juice, min. 35% (apple or pear, min. 45%). State degree of diln. on conc. prods. Labelling otherwise as for jam.

Carbonated Beverages. Permissible additions: citric and malic acids; dimethylpolysiloxane, max. 0.00002%; orthophosphoric acid, max. 0.06%; quinine and salts, max. 0.01% (declar.); caffeine, max. 0.015%; sod. polyphosphate, max. 0.01%; glyceryl abietate, max. 0.01%; certain colours; CMC and sod. salt; polyoxyethylene sorbitan monoleate and/or sorbitan monostearate, max. 0.002%; sucrose octa-acetate, max. 0.003%; sucrose acetate hexaisobutyrate, max. 0.05%; saccharin and sod. and calc. salt 0.005% (declar.); sorbitol, max. 1.5%; permitted preserv. see under "Preservatives" (no declar.). Labelling: no illustrations of fruit if does not meet standard for fruit juice drinks

SWEDEN (cont.)

unless state "with fruit flavour" or similar expression. May use name of fruit and words "soda" or "tonic". May use name of fruit together with words "soft drink" or "carbonated beverage" if drink made from named fruit in such quantity that flavour derived mainly from this fruit.

Other Beverages. Permissible additions: glyceryl abietate, max. 0.01%; quinine only to beverage concentrates, max. 0.01% in ready-to-drink product (declar.); polyoxyethylene sorbitan monoleate and trioleate and/or sorbitan monostearate, max. 0.002%; sucrose acetate hexaisobutyrate, max. 0.05%; saccharin and sod. and calc. salts, max. 0.005%; colours as for carb. bevs.; substances on general list of additives.

COCOA AND CHOCOLATE

No standards for cocoa and chocolate. Optional: non-cocoa fat; ammonium chloride, max. 7%; sod. and calc. hydroxide to cocoa for pH adjustment; polyglycerol fatty acid esters, max. 0.5%; sorbitan tristearate in choc. couverture only, max. 2% sod. silico aluminate and/or silica gel to sweetened cocoa powder only, max. 1.5%; substances on the general list of additives, see p. 753.

COFFEE AND COFFEE POWDER

Coffee. Coffee parts other than beans, max. 7%; other constits. max. 3%.

Instant Coffee. Moisture, max. 5%.

Decaffeinated Coffee. Caffeine, max. 50 mg./100 g. Declr. "low in caffeine".

CONFECTIONERY, SUGAR

Optional: ammonium chloride, max. 7%; calc. hydroxide; potash. alum, max. 0.1%, sod. polyphosphates, max. 0.1% to marshmallows; polyglycerol fatty acid esters, max. 0.5% to cream fillings only; substances on the general list of additives. Gold, silver and alumin. for decorations. Paraffin and paraffin wax for dragees, max. 0.5%.

EGG PREPARATIONS

Dried Egg. Solids, min. 96%; fat, min. 42%. Optional: beta-apo-8'-carotenal ethyl ester, max. 30 p.p.m.

Dried Egg Yolk. Solids, min. 96%; fat, min. 60%. Optional: as for dried egg.

Dried Egg Albumen. Solids, min. 92% (spray dried), 85% (oven dried). Optional (declr.): sod. lauryl sulphate, max. 0.1%; triethyl citrate, max. 0.25%.

Liquid Egg. Solids, min. 25%; fat, min. 11%.

Liquid Egg Albumen. Solids, min. 11%. Optional: triethyl citrate, max. 0.03% (declr.)

Liquid Egg Yolk. Solids, min. 43%; fat, min. 28%. Optional: sodium chloride; sod. benzoate, max. 1%.

FATS AND OILS

Margarine. Fat, min. 80%. Optional: flavourings; sorbic acid and sod. and potass. salts, max. 0.2%; benzoic acid and sod. salt, max. 0.2%; BHA, max. 0.01% of fat; propyl, octyl and dodecyl gallates, max. 0.01% of fat; tocopherol, max. 0.02% of fat; citric, lactic acids; annatto, max. 200 p.p.m.; beta-carotene, max. 25 p.p.m.;

curcumin, max. 5 p.p.m.; glycerides of fatty acids; citric and fatty acid esters of glycerol, max. 0.6%; sod. chloride; lecithin; sod. bicarb.; sod. hydroxide for pH adjustment; starch syrup; in bakery margarine only diacetyl tartaric acid esters of mono- and diglycerides, max. 0.06%.

FISH PRODUCTS

Canned Fish (Sterilized). Optional: agar, max. 0.1%; acetic, citric acid; sod. glutamate, max. 0.2%; salt; sucrose; spices and spice oleresins. For cod's roes only, carrageenan, max. 0.5% mono; and diglycerides of fatty acids from natural fats, max 0.5%; potass. chloride, max. 0.1%.

Canned Fish (Unsterilized). Optional: benzoic acid, max. 0.2% (max. 0.25% together with max. 0.1% sorbic acid or max. 0.025% hexamethylenetetramine for shellfish); *p*-hydroxybenzoic esters (or equiv. sod. salts), max. 0.05%; sorbic acid, max. 0.2% (or equiv. sod. or potass. salts); hexamethylenetetramine, max. 0.05%; sod. or potass. nitrate (declr.) max. 0.05% only to marinated sprats, herrings and roe; citric acid; lactic acid; orthophosphoric acid and its sod. and calc. salt, max. 0.1%; sod. glutamate, max. 0.2%; alginate; certain colours only for fish roe (declar.), salt; sucrose; sod. formate, max.0.05%; acetic acid; spices and spice oleoresins; boric acid, max. 0.04% to sturgeon roe only.

FLOUR AND FLOUR PRODUCTS

Flour (wheat, rye, barley oats, rice, maize, buckwheat). No added colour, oil or fat, glucose or similar. Poisonous plant parts, max. 0.1%. Foreign plant parts, max. 0.5%. Optional: L-ascorbic acid; flour of other kind than that named, max. 5%; potass. bromate, max. 0.005%; magnes. oxide, carbonate, max. 0.005%; citric and lactic acid; α-amylase concentrate.

FRUIT AND VEGETABLE PRODUCTS

Canned Fruits. Optional: All heat treated fruit products may contain substances in the general list of additives: calcium chloride, max. 0.1%.

Canned Vegetables. Optional: All heat treated vegetable products may contain substances in the general list of additives, calcium chloride max. 0.1%; iron lactate to mushrooms; ferrous gluconate, max. 0.0006% to olives; potash alum, max. 0.1% in cucumbers; certain colours in canned veg.

Dried Fruit and Vegetables. SO_2 (declr.): potatoes and root veg., max. 0.04%; apricots, peaches, pears, max. 0.2%; apples, max. 0.15%; other fruit and veg., max. 0.1%.

Jams. Fruit content, min. 30%. Optional: pectin (no declar.); no colour; calc. chloride, max. 0.1%; permitted preserv. see under "Preservatives"; and substances in the general list of additives. Labelling: if several fruits used declr. % of each fruit present and state name of pre-dominant fruit in name of prod. if total of all other fruits max. 15% of total fruit used. If fruit present in less than 15% of total fruit may not mention it.

SWEDEN (cont.)

Marmalade (incl. Jelly Marmalade). Citrus fruit content, min. 25%. Otherwise as for Jam.

INFANT FOODS

Declar. of all raw materials and additions. If quantities not given, list to be in order of amts. by wt.

INVALID FOODS

Claims that any product contains vitamins, minerals or other nutritive substances not contributing substantially to caloric supply must be accompanied by statement of kind and amt. of such substances in the food (but statement of amt. not reqd. for milk, butter, eggs, fruit and vegetables, unprepared meat or fish products, deep-frozen meat or fish).

MEAT PRODUCTS

Meat Products generally. Mixed meat prod., min. 20% meat (corresponding to 3% meat protein) in finished prod. Meat balls, min. 60% meat. Hamburgers, min. 80% meat. Sausages, only meat, pig fat and max. 3% (dry weight), potato flour, milk, milk powder, caseinate, blood products or vegetable protein, calculated on finished prod.; moisture, max. 65%; fat, max. 23% (max. 18% on prods called "low fat"). Black pudding, fat, max. 20%. Liver pate, min. 30% liver, max. 30% fat. Optional: plant or animal prods, flavourings, vinegar, ethyl alcohol, salt; propyl, octyl, dodecyl gallates, max. 0.01% of the fat; smoke condensate (declr.) with special permission only; $NaNO_3$ KNO_3 max. 0.05%; $NaNO_2$, max. 0.02% only as 0.6% of NaCl used; BHA, max. 0.01% of the fat; citric acid, sod., potass. or calcium citrate; L-ascorbic acid, max. 0.02% and Na salt; gelatine; sod. glutamate, max. 0.2%; acetylated potato starch (max. 1.5% acetyl groups) only for sausages. Sorbitol, glycerin, lactic acid, for treatment of sausage skins. Agar to canned tongues and canned jellied veal, max. 0.3%. Glucono-delta lactone, max. 0.8%. No colouring matters. Sod. caseinate max. 3% to poultry rolls. Labelling: declr. average % fat if exceeds 23%. Word "ham" may be used only if prod. consists only of ham.

MILK PRODUCTS

Dried Milk. Full-milk: fat min. 24% of dry matter. If less, to be sold as skim milk pdr. Moisture, max. 5% and declar. of fat content (if above 1.5% fat). Optional: alkyl gallates, max. 0.05% of the fat; butylated hydroxyanisole, max. 0.01% of fat; butylated hydroxytoluene, max. 0.01% of fat; sod. citrate and/or orthophosphate, max. 0.3%.

TABLE SALT

Optional: Ca.silicate, max. 1%, potass. ferrocyanide, max. 0.005%; calc. and magnes. carbonate, max. 1%.

VINEGAR

Spirit vinegar, solely by acetic fermentation of alcohol-containing liquid, acetic acid, min. 11, max. 13% (min. 9% for industrial use). Dilute acetic acid, max. 15% acetic acid (must be called dilute acetic acid); if more than 15% must be called concentrated acetic acid and must carry warning. Wine vinegar, min. 6, max. 10% acetic acid.

CONTAMINATION

Aflatoxin, max. 0.005 p.p.m. Lead in all foods, max. 3 p.p.m. Vinyl chloride in all foods, max. 0.05 p.p.m. Nitrate, max. 20 p.p.m. in milk powder, 200 p.p.m. in whey powder; nitrite, max. 5 p.p.m. in milk powder and whey powder. Food not to be sold in direct contact with paper, etc., coloured, printed, etc., with poisonous colours. Foil wrappings: pure alumin. or tin only, with max. 1% lead.

ADDITIVE SUBSTANCES (GENERAL)*

The only additives permitted are those on an official list (revised annually). For foods shown above with optional ingreds., only such additives as there mentioned are allowed. Additives for use generally: acetylated monoglycerides; agar; alginic acid and its sod. and calc. salts and propylene glycol ester, max. 1%; ammonium orthophosphate, mono and di; cellulose ethers (ethylhydroxyethyl cellulose, hydroxyethyl cellulose, hydroxypropylmethyl cellulose, CMC and sod. salt, methyl cellulose, methylethyl cellulose); citric, lactic acids and their calc., sod. and potass. salts; malic acid; fumaric acid, max, 0.3% (1.6% max. in dessert powders); glutamic acid and sod. salt, max. 0.2%; glycerides of natural fat-forming fatty acids; calc. acetate, max. 1%; calc. gluconate, carbonate, orthophosphate; potass. carbonate; potass. chloride only with carrageenan, max. 0.5%; carrageenan; casein and sod. salt; lecithin; solvents (ethyl alcohol, ethyl acetate, glycerol, glyceryl mono, di and triacetate, isopropyl alcohol, propylene glycol); mannitol, max. 1%; sod. acetate, carb. and bicarb.; sod. 5'-guanylate; sod. 5'-inosinate; sod. orthophosphate; sod. proteinate from defatted soy flour; sod. pyrophosphates; pectin; saccharin, max. 0.04%; sorbitol; stearic acid and sod., potass., calc. and magnes. salts; modified starch (spec. permission); protein hydrolysate; tartaric acid and sod., calc. and potass. salts, max. 0.5%; gum arabic; tragacanth; enzymes. Additives with restricted use: sweetening tablets: adipic acid; coffee whitener: diacetyl tartaric acid ester of mono and diglycerides, max. 0.2%, silico aluminate, max. 0.2%, sod. polyphosphate, max. 0.3%, polyoxyethylene sorbitan monostearate and/or sorbitan monostearate, max. 0.2%; mayonnaise and salad dressing: glyceryl fatty acid-citric acid esters, max. 1%; mashed potato powder: calc. stearoyl-2-lactylate, max. 0.5%, soup powder: silica gel, max. 2%; sod. silico aluminate, max. 1.7% (to broth powder), sod. polyphosphate, max. 1%; drinking choc. powder: silica gel, max. 1.5%, sod. silico aluminate, max. 1.5%, fruit salts: silica gel, max. 0.5%; ice cream and heat stable salad dressing: microcrystalline cellulose; "topping": sod. silico aluminate, max. 0.03%, propyleneglycol monostearate, max. 3.5%; blanc mange powder: calc. acetate, max. 2%; liquid fat emulsions: pot. orthophosphates, max. 0.1%.

FLAVOURING ADDITIONS

Flavourings may be added to foods other than products from milk, lard and tallow, fresh meat, fish, eggs, flour, grain and flakes of cereals, pasta, fruit juice, fruit juice drinks, nectar, sugar, honey, coffee, tea, salt, vinegar.

Only following may be coloured: cheese, margarine cheese, butter, margarine, minarin, ice cream (not vanilla), fish roe, canned shellfish, dried egg, rye bread, pastry products, fillings for biscuits and wafers, pasta, cocktail cherries, canned veg., soft drinks, sugar cobfectionery, soups, sauces (not tomato), mustard, cake mix, malt beverages. Declr. all colours, declr. Tartrazine and caramel by name.

PRESERVATIVES

The following allowed except in products from meat, fish, milk, egg, sugar, honey, salt, vinegar or flour unless stated in sections on those products: benzoic acid and sod. salt, max. 0.2% (must and nectar, juice, jam, carbonated beverages and other fruit products, max. 0.1%); SO_2, max. 0.02% (peeled raw potatoes, max. 0.02%; horseradish, max. 0.04%; juice, must and nectar, max. 0.03%; jam, max. 0.02%; carbonated beverages, max. 0.005%; *p*-hydroxybenzoic acid esters (or equiv. sod. and potass. salts), max. 0.1%; propionic acid and its sod., potass. and calcium salts, max. 0.2%; sorbic acid and its sod. and potass. salts, max. 0.2% (carbonated beverages, 0.1%).

ANTIOXIDANTS

The following allowed except in products from meat, fish, milk, egg or flour unless stated in sections on those products (limits calc. on fat content); propyl, octyl and dodecyl gallates, max. 0.01%; BHA and/or BHT, max. 0.01% (citrus drinks, max. 0.0005%; "topping", max. 0.02%; dried yeast, max. 0.1%; potato powder, max. 0.0025%); thiodipropionic acid, max. 0.02%; dilaurylthiodipropionate, max. 0.02%; ascorbic acid; ascorbyl palmitate, max. 0.2%; tocopherol, max. 0.02%.

BAKING AIDS

The following may be used in baking and bakery products: ammonium chloride only for doughs, max. 0.05% of the flour; diacetyl tartaric acid esters of mono- and diglycerides, max. 0.6% of the flour; glucono - delta - lactone; glycerol fatty acid esters of citric acid, for baking aids, max. 3% of the fat, for bread and other bakery products, max. 0.6% of the flour, for cake mix, max. 2% of the flour; potass. bromate, max. 0.04% of the milk powder content; potass. oleate, max. 0.1%; myristic acid and its sod. and potass. salts, max. 1%; sod. silico aluminate for powdered baking emulsifiers, max. 1%; calc. stearoyl-2-lactylate, max. 0.5% of the flour to bread and other bakery products; sod. stearyl fumarate, max. 0.5% of the flour to bread and other bakery products; polyglycerol fatty acid esters only to sponge cake layers, max. 2.5% and biscuits, max. 0.5%; propylene glycol monoester, max. 1%; sod. and potass. palmitate, max. 1%; propylene glycol monostearate, max. 1%; glycerides of fatty acids polymerized and polymerized and oxidized, max. 3% of fat content; sod. alumin. phos. in baking powder; lactic and palmitic glycerol esters, max. 10% in shortening only; lactic and stearic glycerol esters, max. 10% in peanut oil and shortening only.

LABELLING

Under the new Food Law, 1971 the following required on prepackaged food: name of food (fanciful or trade name may be used also); main ingreds. in descending order by weight; need not declr. water unless required to by special regulations; declr. average g. per 100 g. prod. when sold of meat, fish, vegetable protein, potato, and total of all other vegetables contained in prod.; declr. species of animal on meat and fish prods; declr. average % of meat or fish and meat or fish by-prods separately; may declr. additives under group name (except for certain additives which must be declr. by name such as saccharin, quinine, Tartrazine, SO_2, saltpetre, nitrite, smoke extract): antioxidant, bleaching agent, emulsifier, colouring matter, thickener, anticoagulant, preservative, ripening agent, flavouring, stabiliser, vegetable gum, spices, whipping aids. Other additives to be declr. by name. Declr. net wt. or net vol. (average) and average drained wt. on food in gravy, jelly, sauces, etc.; declr. no. of pieces or lowest and highest nos. on fish, fish fillets, whole or halved fruit. Storage instructions if method important to shelf life. Date of packing on prepacked food with shelf life max. 30 days. Detailed requirements for frozen and chilled food. On foods other than alcoholic drinks declr. alcohol content if more than 1.8%.

A government-sponsored scheme for voluntary quality-declaration, "VDN", with check sampling, is in operation. This requires label declaration in standard form which may cover details of raw materials and preparation, nutritional values, net wt., recommended methods of storage and use. Classes of foods so far covered are: conserves of soup, infants' foods, fruits and vegetables, asparagus, mushrooms; jams, fruit juices and similar; dessert powders; fish balls, frozen fish; fruit and veg. products; cake powders; spices; potato powders; mayonnaise and similar; almond paste; marzipan paste; wheat flour; coffee; oats; breakfast cereals; bakery emulsions; soup cubes. Particulars from VDN, Taptogatan No. 6, S–115 28 Stockholm.

Table Salt. Moisture, max. 0.5%; NaCl, min. 95% of dry matter. Not more than traces of insol. impurities.

ESSENCES AND FLAVOURS

Natural Flavouring Essences. Optional: reinforcement with max. 5% harmless artif. essences. Glyceryl acetate and coumarin prohbd. Glycerol, ethanol, propylene glycol and isopropyl alcohol as solvents.

SUGARS AND SUGAR PRODUCTS

Glucose Syrup. Optional: SO_2, max. 40 p.p.m. (if for direct consumption), or higher (if for manuf. purposes; declar. of amt.).

VINEGAR AND VINEGAR PRODUCTS

Vinegar. Acetic acid, min. 4.5%, max. 14%; total SO_2, max. 400 mg./litre; free SO_2, max. 100 mg./litre; sulphates, max. 2 g./litre (as $K(_2SO_4)$; Fe, max 30, Cu, max. 10, Zn, max. 10, As, Pb, max. 1 (all mg./litre). Optional: natural colour, plant flav. extracts, spices. Various types, incl. malt vinegar. Acetic acid (80%) dil. to max. 14% acetic acid may be sold as "vinaigre d'essence" or "vinaigre d'essence comestible". Labelling: fully descriptive.

Sauces, Salad Creams. Acetic acid (added as vinegar), min. 2%, or tartaric, citric or lactic acid, min. 2%. Mayonnaise: oil, min. 75%; if called salad mayonnaise, min. 60%; no preserv. except SO_2 from mustard and egg used. Optional: thickeners such as pectin, agar, gum trag., etc.; permitted colours; SO_2, max. 80 mg./litre. No gelatine, starch, flour, soya, dextrin, or similar substances. If egg claimed, min. 2 egg yolks/litre. If oil or fat claimed, min. 5% oil or fat (declar. of %, and container inscribed with amt. oil or fat therein). Labelling: if no oil or fat, this to be declar.; date to which good keeping guaranteed must be declar.

Pickles. Preserv.: sod. benzoate, max. 1.5 g./litre (declar.).

VITAMIN ENRICHMENTS

Special regulations apply. No enrichment allowed which would increase daily average intake above normal requirements.

PRESERVATIVES

Benzoic acid, where permitted, may be replaced by the same amt. of sorbic acid or the methyl, ethyl or propyl esters of *p*-hydroxybenzoic acid, or by equiv. amts. of sod. benzoate or potass. sorbate. If more than one preserv. is used, the amt. of each must be reduced proportionately.

ANTIOXIDANTS

In suet, lard, chicken fat, biscuit and confect. fats, soup prepns.: natural substances such as tocopherols, ascorbic acid, lecithin, etc., if normal amt. in total diet not exceeded (but ascorbic acid, max. 400 p.p.m.); also propyl gallate, max. 0.01%, octyl and dodecyl gallates, max. 0.015%, B.H.A., max. 0.02%. If B.H.A. with gallates, total max. 0.02%. Supplier of fats to notify wholesaler or user if antioxidant added.

COLOURING MATTERS

See Tables, pp. 806-812.

HEAVY METALS

Canned fruit and veg.: lead, max. 0.5 p.p.m.; zinc, max. 5 p.p.m.; cadmium, max. 0.05 p.p.m.; tin, max. 250 p.p.m. Fruit and veg. other than canned: lead, max. 1 p.p.m. (on fresh wt.). Juice and various fruit juice drinks: lead, max. 0.3 p.p.m.

STABILISERS

The following may be used where regulations permit: gelatine, pectin, galactomannan (carob, guar), starches, agar, carrageenan, alginates, tragacanth, arabic, methyl cellulose, carboxymethyl starch, CMC, hydroxypropyl methyl cellulose, microcrystalline cellulose.

WRAPPING PAPER

Parchment wrapping paper: optional. benzoic acid, min. 1 g./sq. metre (or equiv. sod. benzoate); may be used for wrapping food in which benzoic acid not permitted if no benzoic acid detectable in 50 g. of food.

LABELLING

Required label statements and declarations may be given in either French or German. Detailed requirements on declar. quantity and unit price on some items.

TURKEY

COLOURING MATTERS

Synthetic colours, as in Tables, are allowed, also the usual vegetable colours, pp. 806-812. Imports may contain colours officially accepted as harmless in country of origin. Declar. reqd. in general when colouring matter added. Condensed Milk, Unsweetened (Evaporated). (1959, S.I. 1098, (S.65); 1966, S.I. 791; 1970, S.I. 1172). Full cream: milk, fat, min, 9%, total milk solids, min. 31%. Half cream: milk fat, min. 4.5%, total milk solids, min. 26.5%. Skimmed: total milk solids, min. 20%. Labelling; as for "Sweetened".

Condensed Milk, Sweetened. (Refs. as for Unsweetened). Full cream: milk fat, min. 9%; total milk solids, min. 31%. Half cream: milk fat, min. 4.5%; total milk solids, min. 26.5%. Skimmed: total milk solids, min. 26%. Labelling: precise naming and declar. of equiv. pints (to nearest ⅛), of (a) milk with milk solids min. 12.4%, incl. milk fat min. 3.6%, or (b), half cream milk with milk solids min. 10.8%, incl. milk fat min. 1.8%, or (c), skimmed milk with non-fatty milk solids min. 9%; if partly skimmed (half cream) to be marked as such and "should not be used for babies except under medical advice"; if skimmed, to be marked as such and "Unfit for Babies" or "Not to be Used for Babies". All in prescribed type and form. No comment allowed on official designations or declarations. Any instructions for dilution must give product conforming with (a), (b) or (c) above; or must state that product is not equiv. to full cream, half cream or skimmed milk, as case may be. (Above standards not applicable to product for export or in containers over 5 lbs. gross wt. But agreed min. 8% fat content for bulk supplies for manufacture.)

Dried Milk. (1965, S.I. 363 (S.35); 1966, S.I. 791; 1970, S.I. 1172). Moisture, max. 5%. Milk fat. min. 26% (full-cream), 17% (¾-cream), 14% (½-cream), 8% (¼-cream), 1.5% (partly skimmed), less than 1.5% (skimmed or low-fat skimmed). Labelling: precise naming and declar. of equiv. pints (to nearest ⅛) of milk of following minimum compn.:

	Milk fat	*Total solids*
Milk	3.6%	12.4%
¾-cream milk	2.7%	11.6%
½-cream milk	1.8%	10.8%
¼-cream milk	0.9%	9.9%
Skimmed or partly skimmed milk	—	9.0% (excl. fat)

If skimmed, to be marked as such and "Unfit for Babies" or "Not to be Used for Babies". All in prescribed type and form. Other labelling requ. for ¾, ½, ¼, and partly skimmed milk.

Dried Milk Mixtures. If dried milk is min. 70%, above standards apply to dried milk used. Labelling: designation to include "Sweetened" if only sugar added; "Modified" if only a milk constituent added; "Compounded" in all other cases: also declar. of substance(s) added.

Malted Milk. See under "Codes of Practice", p. 782.

Skimmed Milk with Non-Milk Fat. (1960, S.I. 2331 (S. 133); 1968, S.I. 1474 (S. 148). Must be sold in container with label declaration "Unfit for Babies" or "Not to be Used for Babies" (except for certain scheduled proprietaries of specified compn.). Wording may optionally be modified in defined manner and to show nature or designations of non-milk fat(s) or oil(s) and any other substances present. Specified lay-out, with type size according to size of pack. If claim made on label as to effect of the food in relation to coronary diseases, label must also show quantities or proportions and name of each fat or oil present and whether or not each such fat or oil is hydrogenated. Labels must not bear any description or picture, etc., suggestive of milk or of anything connected with the dairy interest.

fruit pulp or puree, must either conform with above standard, or total of fat and non-fatty milk solids must be min. 12½%, incl. fat. min. 7½%, and non-fatty milk solids min. 2%. If called Dairy Ice Cream, Dairy Cream Ice, or Cream Ice: milk fat, min. 5% (no other fat except that from egg, flavouring, or emulsifier or stabiliser); otherwise as above. Milk Ice: milk fat, min. 2½% (prohib. of other fat as for Dairy Ice Cream); non-fatty milk solids, min. 7%. "Parev" ice: fat, min. 10%; no milk fat or other milk deriv. No artif. sweetener in any of above. Ice cream mixtures must not be kept more than 1 hr. above 45°F. before heat treatment. Heat-treatment required (except for complete cold mixes, or where mixture has pH of 4.5 or less): mixture must be raised to, and kept at: I, min. 150°F. for min. 30 mins.; or II, min. 160°F. for min. 10 mins.; or III, min. 175°F. for min. 15 secs.; or IV, min. 175°F. for min. 2 secs. (special control apparatus and pump to be used with methods III and IV). Temp. must then be reduced to 45°F. or below within 1½ hrs., and held there until freezing begun (these requirements do not apply with method IV if mixture so treated is immediately placed in sterile airtight containers under sterile conditions, and container is kept unopened; on opening, temp. must immediately be reduced to 45°F. or below and held there until freezing begun). Temp. may be allowed to rise above 45°F. for addition to a mixture with pH 4.5 or less (for prepn. of water ice and similar), if combined mixture is frozen within 1 hr. of combination. Suitable indicating and recording thermometers to be used, and records kept. Cold mixes must be converted into ice cream within one hour of reconstitution. Ice cream must be kept at a temp. not above 28°F.; if temp. at any time exceeds this, the product must again be heat treated as above (this applies also to cold mixes after they have been frozen). Labelling: No words, devices, etc., suggesting butter, cream or milk, or anything connected with the dairy interest, if fat other than milk fat is present (except fat introduced by egg ingred., flav. substance, or emulsifying or stabilizing agent). (But label may state that skimmed milk solids are present). If foreign fat present, declar. "contains non-milk fat" requd. conspicuously, close to description "ice cream", in prescribed min. type size, on prepacked ice cream (if veg. fat only, declar. may be "contains vegetable fat").

Cream Soups. Under Code of Practice (Circ. M.F. 3/54), min. butter-fat content 2½% by wt.; but min. may be 1½% if total fat content is min. 3%; or butter-fat may be absent or less than 1½% if total fat content is min. 3½%. (See also F.S.C Report on Soups, publ. 1968.)

SPICES, CONDIMENTS, AND FLAVOURINGS

Mustard, Compound Mustard, Mustard Condiment. (1944, S.R.O. 275, 1959, S.I. 831; 1961, S.I. 1931). (Except "pickling mustard" and brown mustard flour sold as "brown mustard"). A blend of brown and white mustard flours. Optional: amylaceous flours and spices, max. 20%. Yield of allyl isothiocyanate on maceration with water for 2 hrs. at 37°C., min. 0.35%.

Curry Powder. (1949, S.I. 1816; 1956, S.I. 1166). Spices, aromatic seeds and aromatic herbs, min. 85%. Lead, max. 20 p.p.m.

Essences and Flavourings. See under "Codes of Practice", p. 782.

Solvents. (1967, S.I. 1582 (1968, S.23)). Ethyl alcohol, ethyl acetate, diethyl ether, glycerol, glycerol mono, di- and triacetate, *iso*propyl alcohol, propylene glycol.

SUGARS AND SUGAR PRODUCTS

Sugar, Sugar Syrups, Solid Glucose* (1961, S.I. 1931*; 1975, S.I. 1487). SO_2 residue, max. 70 p.p.m.

Liquid Glucose*. (1961, S.I. 1931; 1970, S.I. 400; 1975, S.I. 1487). SO_2 residue, max. 450 p.p.m.

VINEGAR PRODUCTS

Acetic Acid. (1970, S.I. 400). If more than 15% wt./vol., packages to be labelled in prescribed form with % strength, and as dangerous and not to be used unless diluted. By High Court decision, 21.7.1950, in Kat v. Diment (see Circ. M.F. 15/50) a soln. of synth. acetic acid put up as a condiment may not be described as "non-brewed vinegar".

Pickles, Sauces made from Fruit or Veg. (1975, S.I. 1487). Preserv.: SO_2 max. 100 p.p.m. or p-hydroxybenzoates or benz. acid, max. 250 p.p.m.

Horseradish Sauce. (1975, S.I. 1487). Pres. see p. 774. See under "Codes of Practice", p. 782.

Salad Cream, Mayonnaise. (1966, S.I. 1051 (S.87)). Edible veg. oil, min. 25%; egg yolk solids, min. 1.35%. Other ingreds. optional (preserv. prohib.).

PRESERVATIVES

(1970, S.I. 400; 1973, S.I. 1340; 1975, S.I. 1487 (s. 230).

The following substances are excluded from the definition as preservatives and their use is not governed by the regulations: permitted antioxidants, artificial sweeteners, bleaching agents, colours, emulsifiers, improving agents, miscellaneous additives, solvents, stabilisers or any soluble carbo. sweetening matter, salt, vinegar, herbs, or hop extract, spices used for flavouring, substances imparted to foods by the curing or smoking process.

Schedule II (see pp. 772–775) sets out the preservatives permitted in particular foods and the limits allowed. Where two or more preservatives are permitted the specified food may contain an admixture of those preservatives but the amounts of each present expressed as a percentage of the max. quantity permitted when added together must not exceed one hundred.

No other food may contain added preservative, *except that* (i) any food may contain max. 5 p.p.m. of formaldehyde from wrapping materials or plastic containers; (ii) cheese, clotted cream,

SCHEDULE 2

ARTICLES OF FOOD WHICH MAY CONTAIN PERMITTED PRESERVATIVE AND THE NATURE AND PROPORTION OF PERMITTED PRESERVATIVE IN EACH CASE

Column 1	Column 2	Column 3
Specified Food	Permitted Preservative	Except where otherwise stated, milligrams per kilogram not exceeding—
Beer	Sulphur dioxide and either	70
	benzoic acid or	70
	methyl 4-hydroxybenzoate or	70
	ethyl 4-hydroxybenzoate or	70
	propyl 4-hydroxybenzoate	70
Beetroot, cooked and pre-packed	Benzoic acid or	250
	methyl 4-hydroxybenzoate or	250
	ethyl 4-hydroxybenzoate or	250
	propyl 4-hydroxybenzoate	250
Bread	Propionic acid	3,000 (calculated on the weight of the flour)
Candied peel or cut and drained (syruped) peel	Sulphur dioxide	100
Cauliflower, canned	Sulphur dioxide	100
Cheese	Sorbic acid	1,000
Cheese, other than Cheddar, Cheshire, Grana-padano or Provolone type cheeses or soft cheese	Sodium nitrate or	100
	sodium nitrite	10

Column 1	Column 2	Column 3
Specified Food	Permitted Preservative	Except where otherwise stated, milligrams per kilogram not exceeding—
Provolone cheese	Hexamine	25 (expressed as formaldehyde)
Christmas pudding	Propionic acid	1,000
Cider	Sulphur dioxide or	200
	sorbic acid	200
Coconut, desiccated	Sulphur dioxide	50
Coffee (or coffee and chicory) extract, liquid	Benzoic acid or	450
	methyl 4-hydroxybenzoate or	450
	ethyl 4-hydroxybenzoate or	450
	propyl 4-hydroxybenzoate	450
Coffee extract, solid	Sulphur dioxide	150
Colouring matter, except E150 Caramel, if in the form of a solution of a permitted colouring matter	Benzoic acid or	2,000
	methyl 4-hydroxybenzoate or	2,000
	ethyl 4-hydroxybenzoate or	2,000
	propyl 4-hydroxybenzoate or	2,000
	sorbic acid	1,000
The permitted colouring matter, E150 Caramel	Sulphur dioxide	1,000
The permitted miscellaneous additive, Dimethylpolysiloxane	Sulphur dioxide or	1,000
	benzoic acid or	2,000
	methyl 4-hydroxybenzoate or	2,000
	ethyl 4-hydroxybenzoate or	2,000
	propyl 4-hydroxybenzoate or	2,000
	sorbic acid	1,000
Finings when sold by retail:		
Wine finings	Sulphur dioxide	12,500
Beer finings	Sulphur dioxide	50,000
Flavourings	Sulphur dioxide or	350
	benzoic acid or	800
	methyl 4-hydroxybenzoate or	800
	ethyl 4-hydroxybenzoate or	800
	propyl 4-hydroxybenzoate	800
Flavouring syrups	Sulphur dioxide or	350
	benzoic acid or	800
	methyl 4-hydroxybenzoate or	800
	ethyl 4-hydroxybenzoate or	800
	propyl 4-hydroxybenzoate	800
Flour confectionery	Propionic acid or	1,000
	sorbic acid	1,000
Foam headings, liquid	Sulphur dioxide or	5,000
	benzoic acid or	10,000
	methyl 4-hydroxybenzoate or	10,000
	ethyl 4-hydroxybenzoate or	10,000
	propyl 4-hydroxybenzoate	10,000
Freeze drinks	Sulphur dioxide or	70
	benzoic acid or	160
	methyl 4-hydroxybenzoate or	160
	ethyl 4-hydroxybenzoate or	160
	propyl 4-hydroxybenzoate	160
Fruit, crystallised or glacé	Sulphur dioxide or	100
	benzoic acid or	1,000
	methyl 4-hydroxybenzoate or	1,000
	ethyl 4-hydroxybenzoate or	1,000
	propyl 4-hydroxybenzoate	1,000
Fruit, dried, other than prunes	Sulphur dioxide	2,000
Fruit, fresh:		
Bananas	2-(Thiazol-4-yl) benzimidazole	3
Citrus fruit	Biphenyl or	70
	2-hydroxybiphenyl or	12
	2-(Thiazol-4-yl) benzimidazole	10
Grapes	Sulphur dioxide	15
Fruit juices, sweetened or unsweetened whether concentrated or not	Sulphur dioxide or	350
	benzoic acid or	800
	methyl 4-hydroxybenzoate or	800
	ethyl 4-hydroxybenzoate or	800
	propyl 4-hydroxybenzoate	800
Fruit (other than fresh fruit) or fruit pulp, including tomato pulp, paste or purée	Sulphur dioxide or	350
	benzoic acid or	800
	methyl 4-hydroxybenzoate or	800
	ethyl 4-hydroxybenzoate or	800
	propyl 4-hydroxybenzoate	800
Garlic, powdered	Sulphur dioxide	2,000
Gelatin	Sulphur dioxide	1,000
Ginger, dry root	Sulphur dioxide	150

SCHEDULE 2—*continued.*

Column 1	Column 2	Column 3
Specified Food	Permitted Preservative	Except where otherwise stated, milligrams per kilogram not exceeding—
Glucose drinks containing not less than 23·5 lb. of glucose syrup per 10 gallons of the drink	Sulphur dioxide or	350
	benzoic acid or	800
	methyl 4-hydroxybenzoate or	800
	ethyl 4-hydroxybenzoate or	800
	propyl 4-hydroxybenzoate	800
Grape juice products (unfermented, intended for sacramental use)	Sulphur dioxide and either	70
	benzoic acid or	2,000
	methyl 4-hydroxybenzoate or	2,000
	ethyl 4-hydroxybenzoate or	2,000
	propyl 4-hydroxybenzoate	2,000
Grape juice, concentrated intended for home wine making and labelled as such	Sulphur dioxide	2,000
Hamburgers or similar products	Sulphur dioxide	450
Hops, dried, sold by retail	Sulphur dioxide	2,000
Horseradish, fresh grated and horseradish sauce	Sulphur dioxide or	200
	benzoic acid or	250
	methyl 4-hydroxybenzoate or	250
	ethyl 4-hydroxybenzoate or	250
	propyl 4-hydroxybenzoate	250
Jam (other than diabetic jam)	Sulphur dioxide	100
Jam, diabetic	Sulphur dioxide or	100
	benzoic acid or	500
	methyl 4-hydroxybenzoate or	500
	ethyl 4-hydroxybenzoate or	500
	propyl 4-hydroxybenzoate	500
Meat, cured (including bacon or ham)	Sodium nitrate and	500
	sodium nitrite	200
Mushrooms, frozen	Sulphur dioxide	50
Nut pastes, sweetened	Sorbic acid	1,000
Pectin, liquid	Sulphur dioxide	250
Perry	Sulphur dioxide or	200
	sorbic acid	200
Pickles	Sulphur dioxide or	100
	benzoic acid or	250
	methyl 4-hydroxybenzoate or	250
	ethyl 4-hydroxybenzoate or	250
	propyl 4-hydroxybenzoate	250
Potatoes, raw, peeled	Sulphur dioxide	50
Preparations of permitted artificial sweetener and water only	Benzoic acid and either	750
	methyl 4-hydroxybenzoate or	250
	ethyl 4-hydroxybenzoate or	250
	propyl 4-hydroxybenzoate	250
Prunes	Sorbic acid or	1,000
	sulphur dioxide	2,000
Rennet, liquid	Benzoic acid or	2,000
	methyl 4-hydroxybenzoate or	2,000
	ethyl 4-hydroxybenzoate or	2,000
	propyl 4-hydroxybenzoate	2,000
Sauces, other than horseradish sauce	Sulphur dioxide or	100
	benzoic acid or	250
	methyl 4-hydroxybenzoate or	250
	ethyl 4-hydroxybenzoate or	250
	propyl 4-hydroxybenzoate	250
Sausages or sausage meat	Sulphur dioxide	450
Soft drinks for consumption after dilution not otherwise specified in this Schedule	Sulphur dioxide or	350
	benzoic acid or	800
	methyl 4-hydroxybenzoate or	800
	ethyl 4-hydroxybenzoate or	800
	propyl 4-hydroxybenzoate	800
Soft drinks for consumption without dilution not otherwise specified in this Schedule	Sulphur dioxide or	70
	benzoic acid or	160
	methyl 4-hydroxybenzoate or	160
	ethyl 4-hydroxybenzoate or	160
	propyl 4-hydroxybenzoate	160
Starches, including modified starches	Sulphur dioxide	100
Sugars:		
Glucose syrup and other hydrolysed starches in liquid form	Sulphur dioxide	450

Column 1	Column 2	Column 3
Specified Food	Permitted Preservative	Except where otherwise stated, milligrams per kilogram not exceeding—
Dried glucose syrup and other hydrolysed starches in solid form	Sulphur dioxide	70
Other sugars except lactose	Sulphur dioxide	70
Tea extract, liquid	Benzoic acid or	450
	methyl 4-hydroxybenzoate or	450
	ethyl 4-hydroxybenzoate or	450

any canned food or any food containing these foods may contain nisin. (*Note*: "canned food" is defined as "food in a hermetically sealed container which has been heat processed to destroy any *Clostridium botulinum* in that food or container or which has a pH of less than 4.5.")

Any compounded food may contain preservative introduced in to that food by the use of specified foods (other than unfermented grape juice for sacramental use), provided that (i) the compounded food may contain SO_2 in the proportion introduced by the use of specified foods or 50 p.p.m., which ever is the greater; (ii) the cmpd food may contain benzoates or p-hydroxybenzoates by the use of specified foods or 120 p.p.m., whichever is the greater.

Labelling. Declaration (in a prescribed manner) is required when the following foods contain added preservative: sausages, sausage meat, liquid coffee (or coffee and chicory) extract, liquid tea extract, pickles and sauces, and non-alcoholic sacramental wine (if benzoic acid more than 800 p.p.m.).

COLOURING MATTERS (1970, S.I. 400; 1973, S.I. 1340 (S. 100; 1974, S.I. 1122; 1975, S.I. 1488 (S. 229)). See Tables, pp. 806-812 and p. 698.

No colouring (except for marking) to be used in or on meat, game, poultry, fish, fruit or veg. in raw and unprocessed state, if intended for sale for human consumption and tea, coffee, coffee prods, condensed milk, dried milk (but permitted colour allowed on nut husks). The following colours permitted only in certain foods: alumin., silver, gold on dragees for external colouring only and on sugar coated flour confectionery for decoration only; pigment rubin and burnt umber for rind of hard cheese; methyl violet for marking only of raw or unprocessed meat and citrus fruits.

ANTIOXIDANTS (1970, S.I. 400; 1974, S.I. 1120 (S. 117)). Permitted antioxidants: L-ascorbic acid and its sod. and calc. salts; ascorbyl palmitate; extracts of natural origin rich in tocopherols; synthetic α, γ and δ tocopherols; BHA; BHT; octyl, dodecyl and propyl gallates; ethoxyquin. Of these the latter 6 are permitted only in (*a*) anhydrous edible oils and fats (hardened or not), vitamin oils and concentrates other than those containing more than 100,000 I.U.'s vit. A per g., (*b*) partial glycerol esters, (*c*) butter for manufacturing purposes, and (*d*) essential oils, including their flav. constituents (isolates and concentrates): propyl, octyl or dodecyl gallate or any mixture of these, max. 100 p.p.m. (in *a* and *b*), 80 p.p.m. (in *c*), 1000 p.p.m. (in *d*); butylated hydroxyanisole (B.H.A.) or butylated hydroxytoluene (B.H.T.) or any mixture of these, max. 200 p.p.m. (in *a* and *b*), 160 p.p.m. (in *c*), 1000 p.p.m. (in *d*). The gallates, B.H.A. and B.H.T. may be used together, each within the limits above, with max. total antioxidant 300 p.p.m. (in *a* and *b*), 240 p.p.m. (in *c*), 1000 p.p.m. (in *d*). Prepns. containing more than 100,000 I.U.'S vit. A: B.H.A., B.H.T. or mixt. 10 p.p.m. for ea. 1,000 I.U.'s vit. A per g. Ethoxyquin, max. 3 p.p.m.

only in apples and pears. Antioxidants prohbd. in infant foods. Food containing *a, b, c or d* as ingreds. may contain antioxidant as allowed in, and in proportion appropriate to the amt. of, the ingred. Food containing milk fat in a dairy product ingred. may contain antioxidant as allowed in an amt. of anhydrous fat equal to the milk fat content. Labelling requirements covered by Labelling of Food Regulations.

EMULSIFIERS AND STABILISERS (1970, S.I. 400; 1975, S.I. 1486 (S. 228)).

The following are permitted: lecithins; ammonium phosphatides alginic acid and its sod. potass., ammon., calc., and propylene glycol salts; agar; carrageenan; furcelleran; gums: locust bean (carob), guar, tragacanth, acacia (arabic), ghatti, karaya, xanthan; pectins; microcrystalline cellulose; methyl-, ethyl-, hydroxypropyl-, hydroypropylmethyl-, ethylmethyl-, carboxymethyl (sod. salt) cellulose; mono- and diglycerides of fatty acids; acetic, citric, lactic and diacetyltartaric acid esters of mono- and diglycerides of fatty acids; sucrose esters, sucroglycerides; polyglycerol esters of fatty acids; polyglycerol esters of ploycondensed fatty acids of castor oil; propylene glycol esters of fatty acids; lactylated fatty acid esters of glycerol and propylene glycol; sod. and calc. stearoyl-2-lactylates; stearyl tartrate; polyoxyethylene (8) stearate; polyoxyethylene (40) stearate; polyoxyethylene (20) sorbitan monostearate, tristearate, monopalmitate, monolaurate and mono-oleate; sorbitan stearate, tristearate, monopalmitate, monolaurate and monooleate; dioctyl sod. sulphosuccinate.

Permitted only in certain foods: extract of quillaia, max. 200 p.p.m. (of dry matter) in soft drinks; sod., potass., calc. salts of fatty acids, max. 15,000 p.p.m. (as sod. oleate on wt. of flour) in Dutch type rusks (emulsifiers in these salts, max. 60,000 p.p.m. as sod. oleate); oxidatively polymerised soya bean oil and polyglycerol esters of dimerised fatty acids of soya bean oil in tin-greasing emulsions (GMP).

Exceptions. No emulsifier or stabilizer is permitted in flour intended for sale as such or in milk (see 1962, S.I. 721). Bread may only contain lecithins, mono- and diglycerides, lactic, citric and diacetyl tartaric esters of fatty acids and stearyl tartrate (GMP) and sod. and calc. stearoyl-2-lactylates, max. 5,000 p.p.m. Soft cheese, whey cheese, processed cheese, cheese spread may only contain lecithins, alginic acid, sod. and calc. alginate, carrageenan, locust bean gum, tragacanth, acacia ghatti gum, karaya gum, xanthan gum (GMP).

MISCELLANEOUS ADDITIVES (1974, S.I. 1121 (S. 116); 1975, S.I. 1485 (S. 227)). Includes any acids, anti-caking agent, anti-foaming agent, base, buffer, firming agent, glazing agent, humectant, liquid freezant, packaging gas, propellant, release agent or sequestrant but does not include any natural food substance; permitted antioxidants, artificial sweetener, bleaching agent, colouring matter, emulsifier, improving agent, preservative, sol-

vent, stabiliser; starches, modified or not; caseinates; proteins, protein concentrates and protein hydrolysates sod. chloride; normal straight chain fatty acids derived from food fats. The list of permitted miscellaneous additives is: acetic acid and its sod., potass. and calc. salts; adipic acid; beeswax; calc. phytate; CO_2; carbonates (ammon., ammon. hydrogen, sod., sod. hydrogen, magnes., potass., potass. hydrogen, calc., sod. sesquicarbonate); citric acid and its ammon., sod., potass., calc. and ferric ammon. salts; dimethylpolysiloxane; sod. and potass. ferrocyanide; fumaric acid; D - glucono - 1.5 - lactone; sod., potass. and calc. gluconate; glycine; 1,4-heptonolactone; sod. and calc. heptonate; HC1 and ammon., potass., and calc. salts; hydrogen; ammon., sod., magnes., potass. and calc. hydroxide; magnes. and calc. oxide; lactic acid and its sod., potass., calc. salts; DL-malic acid; L-malic acid and its sod. hydrogen, sod., potass., calc. salts; mannitol; nicotinic acid; nitrogen; nitrous oxide; oxygen; oxystearin; o-phosphoric acid and its ammon. dihydrogen, diammon. hydrogen, sod. dihydrogen, disod. hydrogen, trisod., potass. dihydrogen, dipotass. hydrogen, tripotass., calc. tetrahydrogen diortho., calc. hydrogen, tricalc. diortho., calc. hydroxy, sod. alumin. salts; disod. dihydrogen diphos., tetrasod, diphos., tetrapotass. diphos., dicalc. diphos.; pentasod. triphos., pentapotass. triphos.; ammon., sod., potass., and calc. polyphosphates, inc. sod. and potass. polyphosphates; edible bone phosphate; shellac; silicon dioxide; bentonite; kaolin; silicates (alumin. sod. alumin. calc., calc., magnes., magnes. trisilicate); talc; sorbitol; spermaceti; sperm oil; magnes., calc., butyl stearate; succinic acid; sulphuric acid and its ammon., sod., magnes., potass. and calc. salts; tannic acid; tartaric acid and its sod., potass., potass. hydrogen and potass. sod. salts.

Permitted only in certain foods: octadecylammon. acetate, max. 500 p.p.m. in ammon. chloride: dichlorodifluoromethane, max. 100 p.p.m. in frozen food; disod. dihydrogen EDTA, max. 25 mg/1 in brandy; calc. disod. EDTA (GMP) in canned fish and shellfish; carnauba wax, max. 200 p.p.m. in chocolate and sugar confectionery; calc. disod. EDTA (GMP) in glace cherries; alumin. potass. sulphate, max. 10,000 p.p.m. on dry matter basis in glace cherries; metataratric acid, max. 100 mg/1 in wine.

METALLIC CONTAMINATION

Arsenic. (1959, S.I. 831 (S.51); 1960, S.I. 2261 (S.126); 1973, S.I. 1052). General limits: beverages ready to drink, 0.1 p.p.m.; other foods, 1.0 p.p.m. as As.; higher limits for certain beverages and foods specified in schedule to regs. Does not apply to fish, edible seaweed, products containing same, where natural As. content exceeds 1.0 p.p.m. Lower limit 0.5 p.p.m. for ice cream, etc. (Foods and food additives with max. levels prescribed by other regulations exempt from these regs.).

Copper. (F.S.C. Report on Copper, 1956; and revision to schedule of special limits, 1958). General limits: beverages ready to drink, 2 p.p.m.; other foods, 20 p.p.m.; but higher limits recommended at present for a number of beverages and other foods. (No legislation.)

Lead. (1961, S.I. 1931 (S.114); 1966, S.I. 1203; 1972, S.I. 1843;

1973, S.I. 1053). General limits: beverages ready to drink, 0.2 p.p.m.; dextrose, refined sugars, edible oils and fats and infant and baby foods, 0.5 p.p.m.; other foods, 2 p.p.m.; but higher limits permitted for a number of beverages and other foods; and a limit of 1 p.p.m. for ice cream, tomato juice, conc. soft drinks. (Foods and food additives with max. levels prescribed by other regulations exempt from these regs.).

Tin. (F.S.C. Report on Tin in Canned Foods, 1953). General limit (canned foods only): 250 p.p.m. (No legislation.)

Zinc. (F.S.C. Report on Zinc, 1953). General limits: beverages ready to drink, 5 p.p.m.; other foods, 50 p.p.m.; but a limit of 100 p.p.m. for gelatine is statutory.

Waiver where contamination is of natural origin: Where there is a high natural content of above metals in certain animal and veg. products, no objection should be taken to amounts in such products in excess of general limits if it can be shown that the metal is of natural occurrence. Products mentioned in this connection are:—lead: shell-fish and crustacea; copper: shell-fish and crustacea, offals, etc.; zinc: herrings, shell-fish and crustacea, cereal and animal offals, etc.

Mineral Hydrocarbons. (1966, S.I. 1073 (S.96)). Mineral hydrocarbons prohibited in food except for dried fruit, max. 0.5%; citrus fruit, max. 0.1%; sugar confectionery, max. 0.2%; chewing compound, max. 60% solid mineral hydrocarbon; rind of whole pressed cheese; eggs (declar. "sealed"); and any food, max. 0.2% where present as residue from release agents.

HYGIENE

The Food Hygiene (Scotland) Regulations, 1959. (1959, S.I.413 (S.16), 1153 (S.67); 1961, S.I. 622 (S.38); 1966, S.I. 967 (S.76).

The Food Hygiene (General) Regulations, 1970. (1970, S.I. 1172) The regulations lay down requirements in respect of the cleanliness of premises, vehicles, etc. and of the apparatus and equipment used for the purposes of a food business; the hygienic handling of food; protection of food from risk of contamination, the cleanliness of personnel and the action to be taken where persons suffer from or are carriers of certain infections liable to cause food poisoning; the construction of premises etc. and repair and maintenance; sanitary conveniences and provision of water supply and washing facilities; and the temp. at which certain foods particularly liable to transmit disease are to be kept on catering premises.

The Food Hygiene (Docks, Carriers, etc.) Regulations, 1960. (1960, S.I. 1602). The Food Hygiene (Markets, Stalls and Delivery Vehicles) Regulations, 1966 (1966, S.I.'s 791, 1487) and the Slaughterhouses (Hygiene) Regulations, 1958 (1958, S.I. 2168; 1959, S.I. 1543; 1962, S.I. 1287; 1966, S.I. 1318; 1968, S.I. 1553). Similar to above but applying to specific premises.

LABELLING

Labelling of Food Regulations, 1970. (1970, S.I. 400 (S.91; 1972, S.I. 1510). Prepacked food must be labelled with an appropriate designation if the food consists of one ingredient, if it consists of 2 or more ingreds. state approp. design or common or usual name (unless an approp. design laid down else-

where) and list all ingredients (need not list water) in descending order by weight. (Dried or concentrated foods may be listed as if they had first been reconstituted with water; for food sold retail dried or concentrated for reconstitution with water before consumption may list ingreds in descending order of weight as when reconstituted; on mixed fruit and vegetables where no fruit or veg. predominates may list them in alphabetical order, providing do not mislead purchaser.) If an ingred. made from 2 or more constituents may give approp. design. of constituents only or may give both providing it is made clear that they are the constituents of that ingred. If an ingred. or constituent contains preservative, antioxidant, colour, emulsifier, stabilizer, artificial sweetener, bleaching agent, improving agent, solvent, flavouring or mineral hydrocarbon and the total quantity of that substance is insufficient to exert its effect on the food may state "X with preservative" etc. in the list of ingreds. (may add "permitted" and name of substance). No declar. preserv. or antioxidant if present in amount insufficient to have preserv. or antioxidant effect on the ingred. or is less than 5% of the max. permitted level in the ingred. Head list with word "Ingredients" or "Ingredients in order of quantity" or "Ingredients in order by weight, when reconstituted" or "Ingredients when reconstituted" or "Ingredients in alphabetical order" as appropriate.

State name of packer or labeller of the food and a business address. If packed or labelled for another person may give name and business address in the U.K. of that person.

Exemptions: containers 5 cm max. approp. design only (ingreds. optional); no declar. packer or labeller on food prepacked for sale by the retailer on his premises and, if consists of one ingred., need not declar. approp. design; flour confectionery or bread sold on the premises by the producer, no declar. packer or labeller; if name and business address or registered trade mark given (until 5.1.1976) soft drinks are exempt from declar. approp. design and ingreds.

Foods exempt from declar. ingreds: (1) any meal, biscuits, bread (not breadcrumbs), butter, cheese (not processed and cheese spread), chocolate, sugar and flour confectionery, flour, fresh fruit and veg., ice cream, Parev or Kosher ice; (2) artificial sweetening tablets, condensed milk, coffee and chicory mixts. inc. French coffee, coffee with fig flavour, curry powder, dried milk, edible gelatine, natural spa waters, preparations with B.P. or B.P.C. monographs, flavourings. Must declar. preserv., antioxidants, colour, saccharin on all foods except (1) (unless greatest dimension of container 5 cm. max.) except if amount of preserv. or antioxidant insufficient to affect the food or the ingred. or less than 5% of amount permitted in the ingred. May declar. quantity of preserv. antioxidant or saccharin.

The following generic terms may be used in the list of ingreds. for specified substances: edible, vegetable or animal oil or fat or shortening, emulsifying salts, edible or food starch, imitation cream, fish, cheese, fruit acids, vine fruits, vinegar, spices or mixed spices, herbs or mixed herbs (1% max. for herbs or spices) edible gums, meat or other meat (under special circumstances), cereal binder.

There are requirements for prepacked food for sale other than retail and food, other than prepacked, for sale by retail, vending machines, and food as respects flavours. Special requirements for acetic acid, chocolate liqueurs, dried food, dry mixes, intoxicating liquor, other liquor, tenderised meat, processed peas, use of the words "milk", "butter" and "cream". Claims: general, energy, calorie and protein claims; vitamins and minerals; slimming claims; diabetic claims; tonic, restorative and medicinal claims—specific requirements laid down. Details given of manner of labelling inc. type size and position of certain declarations. Approp. design for certain fish species listed.

THE WEIGHTS & MEASURES ACT, 1963

This Act lays down requirements for marking the labels of prepacked food by weight, capacity, or number.

Marking by Weight. Packages of less than one ounce are exempted. Net weights are normally required, except where the wt. of the wrapper or containers does not exceed certain specified figures (which vary for particular classes of food), when declaration by gross weight is optional.

The following foods must only be packed in fixed net weights, i.e. 1, 2, 4, 8, or 12 oz., 1, 1½, or multiples of 1 lb.: cereal breakfast foods* (except biscuit breakfast foods), tea, cocoa, chocolate powder, coffee (or mixtures with chicory) except liquid essences, honey (except chunk or in the comb), jam, jellies, and marmalade (except diabetic products), molasses, syrup, treacle, salt* (except lump), sugar* (caster, granulated, cube, or icing), dried beans, lentils, or peas*, barley kernels, pearl barley, rice, sago, semolina, tapioca, cereal flours*, and flour products* (cake flour, cornflour, macaroni, etc., except cake or sponge mixtures, blancmange, and custard powders). The following may be labelled with gross weight where the package in quantities of 2, 4, 8, or 12 oz., 1, 1½, or multiples of 1 lb. does not exceed the stipulated maximum: butter, cooking fat, lard, margarine, shredded suet, dried fruits or fruit salad, oatflakes, oatmeal, rolled oats, sugar (other than caster, gran., cube, or icing) (metric sizes proposed).

Foods Exempted from Marking of Contents. Meat pies, or puddings, poultry, poultry pies, sausage rolls, natural cheeses other than Cheddar or Cheshire, biscuits in packs of less than 4 oz., bread, condensed or dried milk, flour confectionery (except uncooked pastry), iced lollies and water ices, shortbread less than 4 oz., or in pieces of 8 oz. or more, single toffee apples, easter eggs, figurines of chocolate or sugar, rock or barley sugar sticks, single articles of sugar or chocolate confectionery weighing less than 3 oz.

Foods to be Sold by Number. Cereal biscuit breakfast food where biscuits over ⅓ oz., fruit preservative tablets, rennet tablets, saccharine or sweetening tablets, soft drink tablets, shell eggs, vanilla pods.

Trade Descriptions Acts, 1968 and 1972. Prohibition of false trade descriptions on product and in advertising, false or misleading indications of price, royal approval, supply of goods or services. The 1972 Act requires country of origin to be marked on goods where a

CODES OF PRACTICE

Codes of Practice were negotiated several years ago between a number of manufacturers and the Ministry of Food, and published in the Advertising, Labelling & Composition of Foods (H.M.S.O. 1949, but now out of print). Several of them have either since been cancelled, revised, or out-dated by Food Standards Orders. For some years, however, the Ministry has ceased to interest itself in Codes of Practice and in recent years a newly formed Local Authorities Joint Advisory Committee on Food Standards (LAJAC) has been negotiating new Codes and revising existing ones. Six LAJAC Codes have so far been issued. See Table below.

Chutneys. Fruit named to be min. 50% of total fruit and/or veg. (N.S.W., Queens.); in greater proportion than any other (Vict., Tas.). Colour: caramel only (N.S.W., Vict., Tas.). (For tomato chutney see p. 789).

Pickles. Optional (besides usual ingred.): Modif. agents, farinaceous subst., calc. chloride, max. 0.02% (N.S.W., W.A., Queens.); lactic acid; permitted colour (declar.); saltpetre, max. 14 grains/lb. (as KNO_3) (N.S.W. no limit); SO_2 from bleached veg. only, max. 5 grains/lb. (S.A., 700 p.p.m., Tas., 2 grains/lb.). Saccharin to onions only, no limit (N.S.W.).

MODIFYING AGENTS

Group I. Gums acacia, benzoin, tragacanth, karaya, guar, locust bean; agar, Irish moss, pectin, alginates (not propylene glycol deriv. S.A., Tas.), tamarind extract (N.S.W., S.A.), arabinogalactan (S.A.)

Group II. Na and Ca *o*-phosphates, Na pyrophosphate, Na and K polyphosphates, Na polymetaphosphate; potass. hydrogen tartrate; ammonia, Na and K carbonates and bicarbonates; Ca and Mg carbonates, Ca chloride and oxide.

Group III. Acetic, citric, lactic, malic, and tartaric acids. Fumaric acid (Vict., W.A., S.A. only).

Group IV. Mono- and diglycerides of fatty acids, lecithin, amm. salt of phosphatidic acid, phospholipids from natural sources (S.A., N.S.W.), glyceryl lactostearate, diacetyl tartaric acid ester of mono and diglycerides, sodium stearyl fumarate (S.A.).

Group V. Sorbitol, glycerol (used as humectants).

Group VI. Gelatine, starch, dextranised or pregelatinised starches.

Permitted uses. As in regulations (e.g. confectionery) and spreads and extracts, mayonnaise and salad dressing (except Grp. V); Pickles (Grp. I and VI in certain States); Soups, incl. canned or dried (except Grp. V); dessert mixes (except Grp. IV and V).

COLOURING MATTERS

See Tables, pp. 806-812.

LABELLING

General requirements for all States regarding declar. of net contents (metric compulsory, imperial optional). Detailed type size requirements in all States.

NEW ZEALAND

Food and Drug Regulations issued 1973.

BEVERAGES, NON-ALCOHOLIC

Fruit Syrups or Cordials. Fruit juice, min. 25% (min. 25% whole fruit for citrus); sugar and/or glucose, min. 35%. Optional: fruit acids, orthophosphoric acid, ascorbic acid, colours (see Tables, pp. 806-812), emulsifiers, stabilizers, solvents [Flavouring Substances] (see p. 805), SO_2, max. 350 p.p.m., benzoic and sorbic acids, max. 1000 p.p.m.

Fruit Flavoured Syrup or Cordial. Fruit or fruit extracts with or without vegetables or cereal; sugar and/or glucose, min. 35%. Optional: as for fruit syrups and permitted flavouring substances. Labelling: no use of words "pure", "real" etc.

Artificial Syrup or Cordial. Permitted flavouring substances; sugar and/or glucose, min. 35%. Optional: as for fruit flavoured syrup and caffeine, max. 1000 p.p.m. Labelling: no use of words "pure", "real" etc.

Fruit Drink. Fruit juice, min. 5%; sugar and/or glucose. Optional: CO_2, ascorbic acid, permitted colour (Tables pp. 806-812), food acids, emulsifiers and stabilizers, solvents [Flavouring Substances] (see p. 805), SO_2, max. 115 p.p.m., benzoic and sorbic acids, max. 400 p.p.m. Labelling: no use of word "pure" if colour added.

Fruit Flavoured Drink. for As fruit flavoured cordial except no min. sugar or glucose content. Preservs: as for fruit drink.

Artificial Drink. As for artificial syrup except no min. sugar or glucose and caffeine, max. 200 p.p.m.

Drink Flavour or Concentrate. Mixture requiring dilution with water and does not comply with any of the above. Similar to fruit flavoured drink. Preservs: SO_2, benzoic and sorbic acids, max. 3000 p.p.m.

COCOA, CHOCOLATE, AND SUGAR CONFECTIONERY

Cocoa Paste, Mass, or Slab. Fat, min. 48%. In dry, fat-free matter: crude fibre, max. 7%; total ash, max. 8%; water-insol. ash, max. 5.5%.

Cocoa Powder. No min. fat.

Soluble Cocoa or Cocoa Essence. No min. fat. In dry, fat-free matter: added alkali (as K_2CO_3), max. 3%. Dry, fat-free, alkali-free cocoa matter as for cocoa paste.

Chocolate. Min. 15% fat-free cocoa solids or fat-free cocoa solids and non-fat milk solids. Min. 3% fat-free cocoa solids. Max. 5% milk fat (max. 3% in dark chocolate). No foreign fats. Optional: cocoa butter; lecithin, max. 0.8% or mono- and dilgycerides, max. 0.5%; sugar; spices; permitted flavours; milk solids.

NEW ZEALAND (cont.)

Milk Chocolate. Min. 4.5% milk fat and min. 10.5% non-fat milk solids.

COFFEE PRODUCTS

Coffee Essence (or Extract). Caffeine min. 0.5%.

Coffee and Chicory Essence (or Extract). Caffeine, min. 0.25%. Coffee extract, min. 50%. Optional: sugar, glycerine, permitted flavouring.

FATS AND OILS

Fats and Oils Generally. Antioxidants: BHA, BHT, propyl, octyl, dodecyl gallates, max. 0.01%; ascorbic acid, sod. ascorbate, ascorbyl palmitate, *iso*ascorbic acid and sod. salt, alpha tocopherols, max. 0.2%.

FISH PRODUCTS

Fish Paste. Fish, min. 70%. Optional: other foods, permitted flavouring, ascorbic and *iso* ascorbic acids, annatto and caramel.

Smoked Fish. Optional: annatto, caramel.

Canned Fish. Optional: annatto, caramel, phosphates, max. 0.8% as P_2O_5, calc. disod. EDTA, max. 300 p.p.m., citric acid.

FLOUR AND FLOUR PRODUCTS

Flour (Wheat). Moisture, max. 15%. Ash, max. 0.75%. No foreign matter, no artif. bleaching.

Self-raising Flour. Baking powder added. CO_2 liberation, min. 0.64%.

Chlorinated Flour. For manuf. of cakes and pastry, chlorine, max. 1500 p.p.m.

Self-raising Cake Flour. As for self-raising flour, except CO_2 liberation, min. 0.40%.

Cornflour or Corn Starch. From any variety of corn or grain. Ash, max. 0.5%. Labelling: if other than maize, a statement of variety of grain used.

Custard Powder, Blancmange Powder and Similar. Optional: permitted colour, harmless flav., permitted thickeners (see under "Stabilizers").

Labelling: no use of name of a fruit unless conjoined with word "artificial" or "imitation"; no words or devices suggesting presence of egg or equiv. of egg.

FLOUR CONFECTIONERY MATERIALS

Almond Paste, Marzipan. Almonds, sugar, and other wholesome foodstuffs (incl. permitted stabilizer). Almonds, min. 30%. Optional: permitted colour.

Almond-Flavoured Paste (or Icing). Sugar, almond, apricot or peach kernels, other wholesome foodstuffs (incl. permitted stabiliser), and almond oil or almonds or defatted almond. Optional: permitted colour, permitted flav. Prescribed labelling as "almond-flavoured paste (or icing)".

FRUIT AND VEGETABLE PRODUCTS

Jams and Conserves. Sol. solids, min. 65% (uncorr. at 20°C). Fruit content, min.: blackberry, greengage, strawberry, 38%; blackcurrant, gooseberry, gooseberry and raspberry, gooseberry and strawberry, loganberry, plum, raspberry, raspberry and loganberry, raspberry and redcurrant, 35%; all other varieties, 40%.

Optional: glucose, citric acid, pectin, spices. Labelling: name of prod. in letters min. 3 mm high. If more than one kind of fruit declr. all fruits in descending order by wt.

Marmalade. Sol. solids, min. 65%. Optional: glucose, pectin, spices. Labelling: as for jam.

Fruit Jelly. Jam made from pulped fruit which has been strained.

Mincemeat. Fruit, preserved fruit, spices. Optional: nuts, sugar, suet, alcoholic bevs., citric acid, salt, preserv.: benzoic or sorbic acid, max. 1,000 p.p.m.

GELATINE AND GELATINE PREPARATIONS

Gelatine. Moisture, max. 16%. Ash, max. 3%. SO_2, max. 1000 p.p.m.

INFANT FOODS

No preservatives, antioxidants, artific. sweeteners, colours, nitrates or nitrites. Labelling: statement (if food when prepared as directed does not approx. conform to comp. of human milk) that the food should not be given to infants under six months old except under skilled supervision (prescribed wording).

INVALID FOODS

Statement of ingredients on which claim of suitability for invalids is based. Foods for diabetics: saccharin, max. 0.01%; sod. cyclamate, max. 0.15% (both may be used if amts. reduced proportionately); declar. of % of carbohydrate.

MEAT PRODUCTS

Manufactured Meat Products. Meat, min. 75%; fat, max. 35%; organic N, min. 1.7%. Optional: cereal, sod. caseinate; salt, spices and herbs, sugar, vinegar; other foods; textured vegetable protein; permitted flavours; phosphates, max. 0.8% as P_2O_5; nitrate, max. 500 p.p.m.; nitrite, max. 200 p.p.m.; ascorbic acid, *iso*ascorbic acid; SO_2, max. 400 p.p.m. in uncooked meat only.

Meat Paste. Meat, min. 75%.

SOUP POWDERS

Cereals, grains, dried veg., spices, salt, other wholesome foodstuffs (incl. permitted stabilizer). Optional: harmless veg. colour, permitted flavours. Labelling: no name of a fruit, veg, or meat unless a substantial proportion present.

Imitation Soup Powders. Wholesome foodstuffs (incl. permitted stabilizer). Optional: permitted colour, permitted flav. Prescribed labelling, incl. list of ingreds.; no pictures of fruit, etc.

SPICES, CONDIMENTS, FLAVOURINGS

Mustard Paste. Optional: water, vinegar, acetic acid, salt, sugar, turmeric, other spices; flour or starch, max. 10%.

Table Salt. Calcium sulphate, max. 1.4%; calcium and magnes, chloride. max. 0.5%; water-insol. max. 0.1%. Optional: free flowing agent, max. 2%.

Iodized Salt. Iodide, as potass. iodide, min. 40 p.p.m., max. 80 p.p.m. Labelled as "iodized".

SUGAR AND SUGAR PRODUCTS

Icing Sugar. Sugar, min. 97%; starch, max. 2%; other free flowing agents, max. 1%. Colours and flavours permitted.

NEW ZEALAND (cont.)

Glucose Syrup. Moisture, max. 21%. Sulphated ash, max. 1%. SO_2, max. 400 p.p.m.

COLOURING MATTERS

See Tables, pp. 806-812.

EMULSIFIERS AND STABILISERS

Acetylated monoglycerides; dimethylpolysiloxane; glyceryl esters of lactic, tartaric, citric acids; lecithin; mono- and diglycerides and their diacetyl tartaric acid and propylene glycol esters; orthophosphoric acid and salts; polyphosphates; sorbitan fatty acid esters; polyoxyethylene sorbitan esters; propylene glycol alginate; gums (arabic, carob, guar, karaya, tragacanth, xanthan); alginates, carrageenan, casein and salts, methyl cellulose, methyl ethyl cellulose, sod. CMC; agar; dextrin; furcelleran; gelatine; glyceryl mono- and distearate; modified starches; pectin and salts; sorbitol.

FLAVOURING SUBSTANCES

All flavouring subs are permitted except: cade oil; coumarin; nitrobenzene; pyroligneous acid; safrole and isosafrole; sassafras oil. Solvents: ethyl acetate; ethyl alcohol; glycerol and its mono-, di- and triacetates; *iso*propyl alcohol; propylene glycol.

OFFICIAL PERMITTED COLOURS

FOR ease of reference, the colours officially approved for use in foods in different countries are presented in the following tables.

Colours permitted only for the colouring of cheese rinds have been omitted.

Belgium, Denmark, France, Germany (West), Ireland, Italy, Luxembourg, the Netherlands and the United Kingdom have all complied with the E.E.C. directive.

N.B. Not all foods may be coloured. It is essential to check in each country as to whether a particular food may be coloured.

In this industry, what you don't know CAN hurt you.

The food processing industry doesn't stand still. There's so much to know, so much to keep up with in frozen, canned and dehydrated foods; prepared meals; sugar, cocoa and flour confectionery, dairying, soft drinks, and many other aspects of food technology.

In today's complex constantly-changing marketing situation, you must keep up-to-date. And there's one sure way: Read Food Processing Industry, the journal that exists to inform the qualified executive* about every major technical development in every relevant field

The value of the information it provides is literally incalculable to you and your career. And yet, in all probability, it won't cost you a penny to have a regular copy. Send now for a reader registration application form on the coupon below.

*Food Processing Industry is circulated free on written application to qualified executives in the food processing industry, government departments and research institutions within the food industry and processors of edible raw materials for the food industry in the United Kingdom. Overseas readers and those outside the terms of control: £10 per annum.

TECHNICAL CONSULTANTS

THE following list contains the names of those who specialise in consulting or analytical work connected with foods or food processing. The particulars have been supplied by the consultants themselves.

The food processor occasionally requires the services of an expert in connection with some problem outside the field of food processing, such as fuel analysis, atmospheric pollution, paints and varnishes, and building materials

It has not been considered appropriate to include the names of such specialists here. They may, however, be found in the "Directory of Independent Consultants in Chemistry and Related Subjects", published by the Royal Institute of Chemistry; copies may be obtained, free of charge, upon application to the Registrar, 30, Russell Square, London, W.C.1.
